

## 2022 Coding & Payment Quick Reference

### Lung and Airway Management Coding Guide

Payer policies will vary and should be verified prior to treatment for limitations on diagnosis, coding or site of service requirements. The coding options listed within this guide are commonly used codes and are not intended to be an all-inclusive list. We recommend consulting your relevant manuals for appropriate coding options.

The following codes are thought to be relevant to airway management procedures and are referenced throughout this guide. All rates shown are 2022 Medicare national average payments. Actual reimbursement will vary for each provider and institution for a variety of reasons including geographic difference in labor and non-labor costs, hospital teaching status, and/or proportion of low-income patients. On average, private payers pay more than Medicare.<sup>5</sup>

Please note: this coding information may include codes for procedures for which Boston Scientific currently offers no cleared or approved products. In those instances, such codes have been included solely in the interest of providing users with comprehensive coding information and are not intended to promote the use of any Boston Scientific products for which they are not cleared or approved, including the EXALT™ Model B.

## C-CODE Information

For all C-Code information, please reference the C-code Finder: <http://www.bostonscientific.com/reimbursement>.

Health economic and reimbursement information provided by Boston Scientific Corporation is gathered from third-party sources and is subject to change without notice as a result of complex and frequently changing laws, regulations, rules, and policies. This information is presented for illustrative purposes only and does not constitute reimbursement or legal advice. Boston Scientific encourages providers to submit accurate and appropriate claims for services. It is always the provider's responsibility to determine medical necessity, the proper site for delivery of any services, and to submit appropriate codes, charges, and modifiers for services rendered. It is also always the provider's responsibility to understand and comply with Medicare national coverage determinations (NCD), Medicare local coverage determinations (LCD), and any other coverage requirements established by relevant payers which can be updated frequently. Boston Scientific recommends that you consult with your payers, reimbursement specialists, and/or legal counsel regarding coding, coverage, and reimbursement matters. Boston Scientific does not promote the use of its products outside their FDA-approved label. Information included herein is current as of December 2021 but is subject to change without notice.

+ Add-on codes are always listed in addition to the primary procedure code.

† Comprehensive APCs (C-APCs): In 2014, CMS implemented their C-APC policy with the goal of identifying certain high-cost device-related outpatient procedures (formerly "device intensive" APCs). CMS has fully implemented this policy and has identified these high-cost, device-related services as the primary service on a claim. All other services reported on the same date will be considered "adjunctive, supportive, related or dependent services" provided to support the delivery of the primary service and will be unconditionally packaged into the OPPS C-APC payment of the primary service with minor exceptions.

‡ The 2022 National Average Medicare physician payment rates have been calculated using a 2022 conversion factor of \$34.6062. Rates subject to change.

N/A Medicare has not developed a rate for the ASC setting as the procedure is typically performed in the hospital setting.
