CUMMINS RESIDENTIAL GENERATORS	71
CUMMINS ENGINES	72

Nameplate / Description

Each Onan generator has a model/spec number description, which is shown on the serial number tag attached to the generator. Here is a representation of the tag on an Onan QG 4000.

Note the highlighted letter code, in this case P, which denotes the specification type of the particular generator, which can then be referred to as spec P. This information is helpful in determining which parts to use if service is needed at some point in the future. Note your new Cummins model identifier and spec code in the boxes below. Then if you need to obtain service parts in the future, you'll have an easily accessible record to speed the process.

Model/Serial Number Record

When contacting a Cummins authorized RV service and parts dealer for service, maintenance or parts questions, always refer to the complete model, spec and serial number of your Onan RV generator. These numbers are printed on your generator unit nameplate. Write them below for easy reference.

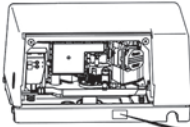

Model No:

Serial No:

Photograph Your Nameplate

Anytime you contact Cummins or your dealer for service, parts or questions about your generator, it is important to have your nameplate information handy. One way to do this is to take a photograph of your generator's nameplate and store it on your phone. The next page shows you where to find the nameplate on your generator.

Nameplate / Location

ONAN QG - 5500 - 7000

ONAN QD 6000 - 8000

WHEN YOU'RE LOOKING FOR AN AUTHORIZED ONAN RV GENERATOR SERVICE DEALER, YOU DON'T HAVE TO LOOK FAR.

Cummins has recently transitioned the branding on our RV generators from Cummins Onan to Onan RV generators under the Cummins brand and family. This directory will provide you a listing of authorized Onan RV generator service dealers. Cummins has an extensive network of dealers who are trained and tested in all aspects of generator operation and maintenance, and their locations cover every major market in the United States and Canada. With their expertise, they can help you select and install the right generator for your RV, add accessories to a generator, or provide experienced advice and answers to questions on proper generator operation and maintenance procedures.

SELECTING A CUMMINS AUTHORIZED SERVICE DEALER

The authorized RV service dealers shown in this directory should be your primary contact for your RV generator parts, service and warranty needs.

This directory includes both Cummins Sales and Service locations as well as Authorized RV service dealers organized alphabetically by state.

Cummins Sales and Service locations have a new and improved Coach Care™ Program which now offers complete engine, chassis and major systems service. While all of our Cummins Sales and Service facilities can repair your Cummins engine and generator, we've partnered with Spartan at 60+ U.S. Coach Care™ locations to offer chassis service to get you back on the road again.

Authorized RV Dealer locations listed as Emerald have completed the required training courses. RV dealers listed as Platinum have completed the Emerald dealer requirements, as well as supplemental troubleshooting training class. We suggest you follow these steps to obtain the most responsive service from your local dealer.

1. Locate the authorized RV service dealers closest to your home or destination. If near a state border area, also refer to the dealers listed in an adjacent state.
2. Before calling the authorized RV service dealer, have the following information available:
 - Onan generator model and serial number
 - Date of purchase
3. Call the authorized RV service dealers first, explain the problem, and make an appointment.

If you have difficulty arranging for service from the authorized RV service dealer, please call 1-800-CUMMINS. They will assist you in resolving any problems.

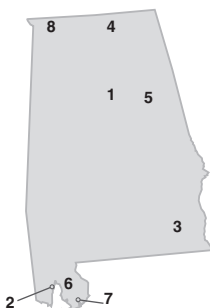

READILY AVAILABLE PARTS AND ACCESSORIES

Our authorized dealers also offer a complete line of accessories, replacement and tune up-parts, and oil and maintenance chemicals specifically designed for your Onan RV generator. For optimum generator life and operation, insist on Genuine Cummins parts and chemicals.

KEEP THIS DIRECTORY AT YOUR FINGERTIPS

We suggest you keep this directory in your RV for quick reference to easily locate and contact your nearest authorized RV service dealer. And you can easily locate your nearest authorized RV service and parts dealer online at **locator.cummins.com**

CUMMINS RESIDENTIAL GENERATORS — PEACE OF MIND COMES AUTOMATICALLY.

POWERING YOUR LIFE

A long tradition of power and legendary durability comes standard in every quiet-running Cummins home standby generator. Take a look at our products and see why we're trusted to back up police, firefighters and hospitals across America, and learn how we can back up your home, too.

Cummins residential generators:

- Are fully automatic... they run even when you are not home
- Provide the same trusted reliability that you've seen from our RV generators
- Offer remote monitoring capability so you can check and run your generator wherever you are

Visit us at homegenerators.cummins.com for more information.

You Deserve a Diesel.

The Cummins Advantage for Motorhomes

If you are choosing between a gasoline-powered RV and a diesel coach, there's more to consider than just the initial price. Comfort, driveability, towing capability, safety, durability, maintenance and resale value are all impacted by this decision. Owning a motorhome is about enjoying life and all that you've accomplished — you deserve a diesel!

Torque and Driveability

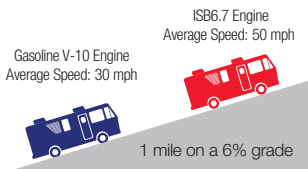

Compared with gas-powered RVs, diesel coaches:

- Deliver 50 percent more torque for stronger uphill acceleration
- Allow you to tow boats, trailers or vehicles with confidence
- Deliver stronger performance without working as hard

Braking and Safety

The braking systems on diesel coaches provide drivers with greater confidence going downhill:

- Hydraulic anti-lock braking systems on gas-powered RVs don't provide the stopping power of air brakes on diesel pushers
- Most diesel coaches come with exhaust or engine brakes for additional braking horsepower over that of normal service brakes; reduced service brake use minimizes the need for expensive brake jobs
- Reduced risk of glazing, overheating or fading increases safe control on steep downhill grades
