Good Friday: _____ (1)

Easter Sunday: _____ (1)

4.2 Why are household products considered to be dangerous? Give two reasons.

A) _____ (1)

B) _____ (1)

Question 5**[5]**

Read the following passage and answer the questions that follow:

Water is an important basic need for all people

There is a great need for water because there are many people living in our country. Pollution, and people who waste water, make this problem worse. All living things rely on water and will die without it.

We get our water from rivers, reservoirs, and dams. We need clean water for drinking, cooking and to grow healthy food. Humans, animals and plants cannot drink seawater because it is salty. Farms can only produce healthy crops if there is a good clean supply of water.

Detergents like washing powder and dishwashing liquid are made from chemicals. These chemicals cause dirt to attach itself to water. This water must be cleaned before we can use it again. All water that we drink and use in our houses has been cleaned. Our water is cleaned at a water purification point.

5.1 Name 3 ways that you can save water by using it wisely.

(3)

5.2 Give two reasons why water is important to mankind.

(2)

Question 6

[2]
