

HOUSTON METHODIST IMAGING SERVICES

HOUSTON
Methodist[®]
LEADING MEDICINE

OUR SERVICES

Houston Methodist offers a full range of advanced diagnostic imaging services.

MRI

3 Tesla MRI

The 3 Tesla MRI has the highest field strength magnet available for routine MRI imaging. This ensures superior image quality, helping doctors make a more precise diagnosis.

1.5 Tesla MRI

The 1.5 Tesla MRI, considered the industry standard, is used for routine imaging and is ideal for imaging patients with MRI-conditional implanted devices, including pacemakers.

Wide-Bore MRI

A wider opening and redesigned table cushion enhance patient comfort during the exam. Without sacrificing image quality, the wide-bore MRI accommodates larger, claustrophobic, elderly or young patients, or those who are in pain.

CT scan

128-slice CT

The 128-slice CT delivers detailed anatomical structures, which would include cardiac and whole-body visualization.

64-slice low-dose CT

We offer our CT patients “low dose” software that uses approximately 40 percent less radiation than traditional CT scans.

PET/CT

PET/CT

The Nuclear Medicine Department at Houston Methodist Hospital has one of the most technologically advanced PET/CT scanners on the market. PET/CT performs multidimensional scanning, which allows physicians to see tumor anatomy and function simultaneously.

Digital Cardiac PET/CT

Using the newest available advanced technology, cardiac and respiratory motion are minimized, resulting in clear and crisp functional images that define tracer distribution, wall thickness and more precise defect definition.

Additional Services

Angiography

Barium X-ray

Bone density testing

Echocardiogram and stress testing

Fluoroscopy

Heart screen/calcium score

Holter monitoring

Interventional radiology

Mammography

Myelogram

Nuclear cardiology

Nuclear medicine

Ultrasound
