

Whether you're planning for retirement, already enjoying it, or opening your first investment account, we believe dividends can be an important piece of your investment strategy. When you stop working, income may become a concern, and a regular income stream could help pay for groceries, health care costs and vacations. If additional income is not needed now, dividends can be reinvested to grow wealth for your future needs. The Edward Jones Equity Income Buy List includes attractively priced stocks with appealing dividends in each sector. Keep in mind that dividends can be increased, decreased or eliminated at any time.

The Equity Income Buy List

Robin Diedrich, CFA, CFP® Senior Area Analyst James Shanahan, CFA Senior Equity Analyst

Ashtyn Evans, CFA Senior Equity Analyst

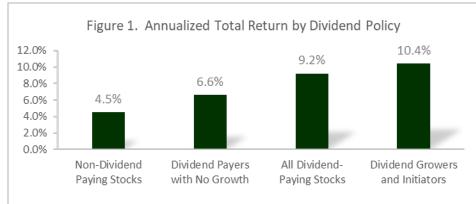

Investment Strategy Summary

The Equity Income Buy List's primary objective is to provide an above-average dividend yield with the potential for dividend increases. Secondarily, this income strategy seeks to provide a competitive total return with less price volatility than the market.

The Case for Dividends

We believe dividend-paying stocks can be an important part of a complete equity portfolio. We recommend owning high-quality companies that pay an attractive dividend and are able to raise it over time. If owning individual stocks is right for you, a dividend-focused strategy offers several potential benefits including:

- A regular income stream Most dividend-paying stocks pay dividends quarterly. By staggering your stock holdings based on the date they pay their dividend, you can potentially receive a dividend check every month. Our Monthly Income Strategy on Page 2 can help you accomplish this.
- Offset inflation risk Inflation is a common concern when investing for a long time horizon. A stream of rising dividend income can help offset higher costs of living over time.
- The power of reinvestment Dividends have been an important part of a stock's total return on investment. Historically, dividends that have been reinvested have accounted for nearly 40% of the total return on stocks.¹
- Track record of good performance Over long periods of time, dividend-paying stocks have outperformed those without dividends. And the stocks of companies that grew their dividends performed even better. See Figure 1.

Source: Ned Davis Research, S&P 500 Index total return data 12/31/1971 – 12/31/2020. An index is not managed and is unavailable for direct investment. Past performance is no quarantee of future results.

• Lower volatility - Dividends can be a signal of strong corporate financial health. Historically, stocks with attractive dividend profiles perform better during market downturns, as investors value the steadiness of dividends. See Figure 1.

Please see important disclosures and analyst certification on Page 4 of the report.

Individuals can obtain the full research report with full disclosures on any of the companies mentioned in this report by contacting a local Edward Jones financial advisor, or write to: Edward Jones,12555 Manchester Road, St. Louis, MO 63131. Information about research distribution is available through the Investments & Services link on edwardjones.com.

How We Build the List

The stocks on the Equity Income Buy List are are selected using a bottom-up approach with Buy recommendations by Edward Jones Research. Our Buy-rated stocks focus on quality companies with strong financial positions, sound fundamentals, and attractive valuations. We then apply sector and subsector diversification to this dividend-focused strategy, favoring sectors that meet our income and volatility objectives. Selected stocks typically behave more consistently than the general market with Average or Below-average price movement and display the following dividend characteristics:

1 Attractive current dividend yield.

The average dividend yield of the overall list is well above the current market yield.

Source: FactSet, S&P 500

2 Solid track record of paying and growing the dividend. The average dividend increase for the list is approximately 8% over the past 12 months.

Source: FactSet, S&P 500

3 Continuing ability to pay and grow dividends over time.

Rising income can help offset the impact of inflation.

Portfolio Fit: Equity vs. Fixed Income

The Equity Income Buy List may be included as part of the overall equity portion of a diversified portfolio. Many of the stocks on the list are large-sized companies that satisfy the Growth & Income Investment Category. Keep in mind, dividend-paying stocks are not a replacement for fixed-income investments. We believe you should have adequate exposure to bonds to fulfill the income allocation that is consistent with your overall investment objective. Bonds offer investors attractive diversification benefits, as they typically move in the opposite direction from stocks.

Plan for Monthly Income

Most dividends are paid quarterly, but companies pay their dividends during different months. By selecting one stock from each column in the following chart, you can potentially receive dividend payments every month of the year.

Performance as of November 30, 2021

| Dividend Yield & Growth | Equity Income Buy List | Russell 1000 Value | S&P 500 |
|-------------------------------|------------------------------|--------------------------|---------|
| Current Yield % | 3.0 | 1.9 | 1.3 |
| 1 YR Dividend Growth % | 10.5 | 0.4 | 2.8 |

| Total Return % | YTD | 1 YR | 5 YR | 10 YR |
|------------------------------|------|------|------|-------|
| Equity Income Buy List | 18.3 | 21.2 | 13.3 | 13.0 |
| Russell 1000 Value | 17.7 | 22.2 | 10.4 | 12.5 |
| +/- Index | +0.6 | -1.0 | +2.9 | +0.5 |

Source: Morningstar & Factset. All periods show annualized returns. All data is for the period ending November 30,2021. Past performance is not a guarantee of future results. Since inception in April 2005, the Edward Jones Equity Income Buy List has provided an average total return of 10.4% compared to 8.1% for the Russell 1000 Value Index and 10.7% for the S&P 500. Total returns assume reinvestment of dividends, capital appreciation and an annual management fee of 0.30% (prior to 2009 a transaction fee of 1% was assessed). The investment return and principal value of an investment will fluctuate. An investor's equity, when liquidated, may be worth more or less than the original cost. Performance results do not represent actual trading or the performance of an actual account. The Russell 1000 Value Index and the S&P 500 are unmanaged indexes and unavailable for direct investment.

Opinion Rating Definition:

Buy (B) - We believe the valuation is attractive and total return potential is above average over the next 3-5 years compared with industry peers.

Price Movement:

Above Average (AA) - This stock will likely move up and down to a greater degree than the average stock in the S&P 500 Index. These companies are often growing faster than the average company and/or are in industries that are more sensitive to the economy. Average (A) - This stock will likely move up and down to a similar degree of the average stock in the S&P 500 Index. Below Average (BA) - This stock will likely move up and down to a lesser degree than the average stock in the S&P 500 Index. These companies are often more mature, growing slower than the average company and/or are in industries that are less sensitive to the economy.
