Email's Outgoing SMTP Setting

Charts can be emailed either through Ensign's server settings, or through your own email server. To use your own email server, the 'Use Ensign's' box would be unchecked on the Internet Services | Email form.

Internet Services						
Download 🛃 Email						
Send to:	 Ensign Support Ensign Software 		Enter your email address here:	_	Send	
🗖 O <u>t</u> her			Outgoing mail server (smtp)	Port	🗖 Use Ensign's	
🗖 List	ensign@ensignsoftware.net	*	smtp.gmail.com	587	V Use TLS	

The example shows a typical SMTP setting for a gmail account with port 587 and Use TLS checked. Look in your email program to find your 'Outgoing mail (SMTP)' setting. Here is an example of finding the SMTP setting in Outlook Express.

🗐 Inbox - Outlook Express						
File Edit View Tools Message Help						
Create Mail Reply Reply All Forward Print Delete	Send/Recv Ac					
Inbox Internet Accounts Selection Tools Accounts Counts						
Cutle All Mail News Directory Service	<u>A</u> dd ►					
Account Type Connection	Remove					
👷 🛱 Ensign Software mail (default) Any Available 💳						
🚽 🚘 Ensign Software Properties 🛛 🕐 🔀	Set as Default					
General Servers Connection Security Advanced	Import					
Server Information My incoming mail server is a POP3 server.	Export					
Incoming mail (POP3): localhost	Set Order					
Outgoing mail (SMTP): mail.cableone.net	Close					

Your setting would be different, of course. Enter the same Outgoing mail setting in the Ensign program. Click menu Setup | Internet Services. Select the Email tab and put the entry in the Outgoing mail server (smtp) edit box.
