## What is Sumdog?

Sumdog is an online learning platform that helps kids aged 4-14 practice math and spelling skills through games. It was founded in 1994 by Andrew Hall, a former teacher who wanted to make learning more fun and engaging for students. Since then, Sumdog has grown to become one of the most popular educational apps in the world, with over 6 million users in more than 100 countries.

### A fun and engaging learning platform for kids

One of the main features of Sumdog is that it uses games to make learning fun. There are over 100 games on Sumdog, ranging from racing, shooting, puzzles, sports, arcade, adventure, and more. Each game is designed to cover a specific skill or topic in math or spelling, such as addition, subtraction, multiplication, division, fractions, decimals, percentages, shapes, angles, measurement, time, money, vocabulary, grammar, punctuation, etc. The games are colorful, interactive, and appealing to kids of different ages and interests.

### A personalized and adaptive curriculum for math and spelling

Another feature of Sumdog is that it adapts to each student's level and progress. When a student first joins Sumdog, they take a diagnostic test that determines their starting point in math or spelling. Then, as they play games on Sumdog, the platform tracks their answers and adjusts the difficulty and content accordingly. This way, each student gets a personalized curriculum that matches their needs and goals. The curriculum also aligns with the Common Core State Standards (CCSS) and other national curricula.

### A gamified and social experience for students and teachers

A third feature of Sumdog is that it rewards students for their efforts and achievements. As students

play games on Sumdog, they earn coins that they can use to buy items for their avatar or their virtual house. They can also unlock new games and levels as they improve their skills. They can also compete with other students from their class, school, or around the world in challenges and contests. Teachers can also use Sumdog to monitor their students' progress, assign homework, and create quizzes and tests.
