

# Why purchase Sumdog Starter?

Sumdog Starter helps you accelerate students' progress, quickly develop fluency and build confidence in math with fun, personalized practice for grades K-8.

Students practicing math on Sumdog for 1 hour a week achieved 1½ years' progress in 6 months.

## Welcome to Sumdog Starter

- ✓ **Inspire and succeed** - give students the confidence to make progress by answering curriculum-aligned questions from all areas of math as they play their favourite games.
- ✓ **Develop multiplication tables fluency** - set fun multiplication tables practice and use the heatmap report to target support.
- ✓ **Encourage friendly competition** - take part in one of Sumdog's beloved regional or national contests and watch as your students climb your local leaderboard by answering personalized math questions.
- ✓ **Plan next steps** - use the Sumdog diagnostic tool and stranded report to identify each student's strengths and areas for development.
- ✓ **Engage and motivate** - make math practice fun with 6 exciting games and a fun rewards system, including Sumdog coins, the Sumdog house, and your students' very own inclusive avatars!

“ I specifically had students who usually struggle with math become motivated to participate due to Sumdog contests. I was also able to differentiate through the skills-based challenges and assign different ones to students who struggle with prior skills that we have covered in class. This has allowed them a different avenue to continue their learning through practice and engagement. Students were able to build on these skills at school but also at home through a fun and safe site that parents can trust.”

Allison Renner, Canaan Middle School, OH

Personalized math practice that students and teachers love
