SQUARE D
GROUPE SCHNEIDER

General Information

Class 8538 and 8539 Type S combination starters combine the requirements of motor overload and short circuit protection into one package. These starters are manufactured in accordance with NEMA standards and are UL Listed (although some FORM numbers may not be listed – contact your local Square D representative for information). Class 8538 and 8539 combination starters are designed to operate at 600 Vac maximum, 50 to 60 Hz – and are supplied with melting alloy overload relays as standard.

Type 2 Coordination

Square D is one of the leaders in North America and Europe in providing starters that are verified by UL to comply with IEC 947-4-1 and Type 2 coordination. This means that the components of a motor branch circuit protective device (fuses and circuit breaker), contactor, and overload relay will be suitable for further use following a short circuit fault (even though contact welding is recognized but can be easily broken) allowing for replacement of components during normal scheduled maintenance.

Square D starters and specified fuses have been tested by UL and CSA (at 100,000 Amps fault current) for operation at 600 volts AC. Class 8538 Type S Combination Starters, NEMA size 0 through 5, with fusible disconnect switches have tested to Type 2 performance criteria.

Class 8538 Disconnect Switch Type

Class 8538 combination starters can be supplied with either a fusible or non-fusible disconnect switch. Class 8538 combination starters are available in NEMA Sizes 0-6.

The fusible disconnect switch type combination starter design utilizes a flange operated visible blade switch. Interchangeable fuse clips, straight through wiring, space for a fused control transformer with additional capacity, and provisions for adding a disconnect switch electrical interlock are key features of the combination starters.

The fusible disconnect switch type can be supplied with Class R fuse clips increasing the short-circuit rating to 100,000A.

Size 0-2 non-fusible combination starters can be converted to a fusible type. See Catalog 999CT9701 for fuse block kits and fuse clips.

Class 8539 MAG-GARD® Motor Circuit Protector or Thermal Magnetic Circuit Breaker

Class 8539 combination starters can be supplied with either a MAG-GARD® motor circuit protector (MCP) or a thermal magnetic circuit breaker. Class 8539 combination starters are available in NEMA Sizes 0-7.

The circuit breakers in Class 8539 combination starters can be supplied with a factory installed auxiliary switch for remote indication of an open and/or tripped or closed breaker. For one auxiliary switch, specify **Form Y74**. For two auxiliary switches, specify **Form Y75**. The switches are supplied with normally open and normally closed circuits with a common connection. Contacts must be used on the same polarity and are rated 15 Amps at 240 Volts AC.

An alarm switch can be factory supplied only, specify **Form Y742**. The alarm switch only operates when the breaker is tripped. It is used to actuate bell alarms and warning lights. The alarm switch consists of a normally open single pole single throw switch. The contacts are rated 4 Amps at 240 Volts AC.

Enclosures – Class 8538 and 8539 combination starters are available in the following enclosures:

NEMA Type 1 General Purpose

NEMA Type 4 & 4X Watertight and Dusttight Stainless Steel

NEMA Type 4X Watertight, Dusttight, and Corrosion Resistant Glass-Polyester

NEMA Type 7 & 9 Bolted and Spin-Top® for Hazardous Locations (Class 8539 only).

NEMA Type 12 Dusttight and Driptight for Industrial Use

The NEMA Type 4 & 4X stainless steel enclosure (Sizes 0 - 5) has a brushed finish. Sizes 6 & 7 are painted sheet steel enclosures and are rated NEMA Type 4 only. For an electropolished finish, specify **Form G16** and add 15% to the price of the standard device. Hubs are supplied as standard on NEMA Type 4 & 4X enclosures.

Hubs are supplied as standard on NEMA Type 4X enclosures.

NEMA Type 12 enclosures may be field modified for outdoor applications. Specify **Form G26** for NEMA Type 3R (no additional charge). See Catalog 9999CT9701 for additional information. Also, NEMA Type 12 devices are available UL Listed for use in Class II, Division 2, Group G and Class III, Divisions 1 and 2 locations. Request **Form G21** (no additional charge).

Oversized Enclosures – Class 8538 disconnect switch type and Class 8539 MAG-GARD® MCP (Sizes 0-2) are available in NEMA Type 1, 4 & 4X and 12 enclosures. The oversized enclosures provide additional panel

space for customer installation of control transformers, fuse blocks, terminal blocks, relays, and other auxiliary equipment. These enclosures have three Class 9001 Type “K” holes as standard for installation of push buttons, pilot lights, and other cover mounted control units.

Coil Voltages – AC coils are available for application on 50-60 Hz. NEMA Sizes 00 - 5 are supplied with coils that are designed to operate satisfactorily on line voltages of 85% - 110% of rated voltage. NEMA Size 6 and 7 contactors are supplied with a DC coil operated by a solid state rectifier circuit that is powered by an AC source and is designed to operate satisfactorily on line voltages of 90-110% of rated voltage.

Please note that Voltage Codes have been added to the Type designations in order to improve customer service. It is necessary to include the Voltage Code when ordering combination starters. Also, 120 Volt polyphase combination starters will be wired for separate control.

Auxiliary Contacts – Additional auxiliary contacts may be added to Type S starters. Refer to Page 14 for maximum number of auxiliary units and Form designations for factory installed auxiliary contacts. See Catalog 9999CT9701 for auxiliary contact kits for field installation.

Type S Accessories – Additional accessories such as fuse blocks, fuse clip kits, disconnect switch and circuit breaker interlocks, and cover mounted control stations are available for field modifications, see Catalog 9999CT9701. For factory modifications (Forms), see Pages 30-34.

Combination Starters – NEMA Rated Class 8538 – Fusible Disconnect Switch Type

3-POLE POLYPHASE - 600 VOLTS AC MAXIMUM - 50-60 HERTZ

Devices require 3 thermal units. See catalog 9065CT9701 for selection information. For Class J fuse clip, use Form Y91 (no additional charge).

▲ NEMA Type 12 enclosures may be field modified for outdoor non-corrosive and non-service-entrance-rated applications; see Page 17 for more information.

* Coil voltage code must be specified to order this product. Refer to standard coil voltage codes listed in selection table above or additional standard voltage codes shown below.

† NEMA Size 6 starters are NEMA Type 4 painted sheet steel enclosures.

NOTE: Some control transformers may require the use of oversized enclosures. Refer to the control transformer selection table on Page 35.

Coil Voltage Codes

Voltage	Code
60 Hz	50 Hz

Standard unit

Explosion proof unit

Note that not all units have an explosion proof rating. Consult factory.

- ◆ NEMA Size 6 & 7 starters are NEMA Type 4 painted sheet steel enclosures.
- ▲ NEMA Types 7 and 9 Bolted are not UL Listed.
- ▲ NEMA Type 12 enclosures may be field modified for outdoor non-corrosive and non-service-entrance-rated applications; see Page 17 for more information.
- * Coil voltage code must be specified to order this product. Refer to standard coil voltage codes listed in selection table above or additional standard voltage codes shown below.

NOTE: Some control transformers may require the use of oversized enclosures. Refer to control transformer selection table on Page 35.

Form Y534 may be used to substitute an FAL circuit breaker for a GJL circuit breaker (no additional charge).

Coil Voltage Codes

Voltage	Code

‡ NEMA Size 6 & 7 starters are NEMA Type 4 painted sheet steel enclosures.
 ★ NEMA Type 7 & 9 bolted are not UL Listed.
 ▲ NEMA Type 12 enclosures may be field modified for outdoor non-corrosive and non-service-entrance-rated applications; see Page 17 for more information.
 * Coil voltage code must be specified to order this product. Refer to standard coil voltage codes listed in selection table above or additional standard voltage codes below.

NOTE: Some control transformers may require the use of oversized enclosures. Refer to control transformer selection table on Page 35.

Tables and footnotes are taken from NEMA Standards.

† Ratings shown are for applications requiring repeated interruptions of stalled motor current or repeated closing of high transient currents encountered in rapid motor reversal, involving more than five openings or closings per minute and more than ten in a ten-minute period, such as plug-stop, plug-reverse or jogging duty. Ratings apply to single speed and multi-speed controllers.

* Per NEMA Standards ICS 2-1993 clause 4, the service-limit current represents the maximum rms current, in Amperes, which the controller may be expected to carry for protracted periods in normal service. At service-limit current ratings, temperature rises may exceed those obtained by testing the controller at its continuous current rating. The ultimate trip current of over-current (overload) relays or other motor protective devices shall not exceed the service-limit current ratings of the controller.

★ FLUORESCENT LAMP LOADS – 300 VOLTS AND LESS – The characteristics of fluorescent lamps are such that it is not necessary to derate Class 8502 contactors below their normal continuous current rating. Class 8903 contactors may also be used with fluorescent lamp loads. For controlling tungsten and infrared lamp loads, and resistance heating loads, Class 8903 ac lighting contactors are recommended. These contactors are specifically designed for such loads and are applied at their full rating as listed in the Class 8903 Section.

‡ Ratings apply to contactors which are employed to switch the load at the utilization voltage of the heat producing element with a duty which requires continuous operation of not more than five openings per minute. Class 8903 Types L and S lighting contactors are rated for resistance heating loads.

• When discharged, a capacitor has essentially zero impedance. For repetitive switching by a contactor, sufficient impedance should be connected in series to limit inrush current to not more than 6 times the contactor rated continuous current. In many installations, the impedance of connecting conductors may be sufficient for this purpose. When switching to connect additional banks, the banks already on the line may be charged and can supply additional available short-circuit current which should be considered when selecting the impedance to limit the current.

The ratings for capacitor switching above assume the following maximum available fault currents:

NEMA Size 2-3: 5,000 A RMS Sym.

NEMA Size 4-5: 10,000 A RMS Sym.

NEMA Size 6: 18,000 A RMS Sym.

NEMA Size 7: 30,000 A RMS Sym.

If available fault current is greater than these values, connect sufficient impedance in series as noted in the previous paragraph.

▲ For NEMA Size 6 and 7, the operation rate is as follows: Continuous operation rate is 3 operations per minute maximum; Jogging or Plugging Duty operation rate is 15 operations per minute for a maximum of three minutes.

The motor ratings in the above table are NEMA standard ratings and apply only when the code letter of the motor is the same as or occurs earlier in the alphabet than is shown in the table below.

Motors having code letters occurring later in the alphabet may require a larger controller. Consult local Square D field office.

Motor HP Rating	Maximum Allowable Motor Code Letter
1 1/2-2	L
3-5	K
7 1/2 and above	H

Full Voltage Contactors and Starters – NEMA Rated Application Data

Power Contact Ratings: All contactors and starters are rated in accordance with NEMA standards. The ratings shown in the selection tables are for normal service. For complete data on power contact ratings, refer to Page 12.

Short Circuit Protection: According to the National Electrical Code branch circuit overcurrent protection must be provided for each contactor or starter. For starters refer to instructions furnished with the thermal unit selection table. For contactors (Class 8502 or 8702) provide branch circuit overcurrent protection in accordance with the National Electrical Code, except do not exceed the maximum protective device ratings in table below.

NEMA Size	Maximum Voltage	Class K5, RK5 or RK1 Fuse (Ampere)	Class J or T Fuse (Ampere)	Inverse-Time Circuit Breaker (Ampere)

* Solid or stranded copper wire. One wire per connector.

Coil temperature: Not more than 85°C rise in 40°C ambient (125°C max.).

Full Voltage Contactors & Starters – NEMA Rated Application Data

Auxiliary Units

Auxiliary contacts, power poles, and timer attachments can be added by the factory or in the field on all Type S starters and contactors. The table below shows the maximum number of auxiliary units (**in addition to the holding circuit contact**) that can be added to a given size starter or contactor. In addition, it is possible to add a second internal contact on NEMA Size 0, 1, and 2 contactors and starters.

NEMA Size	Type	No. of Poles of Basic Contactor	Maximum Number of External Auxiliary Units (In addition to holding circuit contact)
00	SA	2-3	4 single circuit auxiliary contacts (N.O. or N.C.) if second internal auxiliary contact is not used.
0, 1 and 2	SB SC SD	1, 2 or 3	4 single circuit auxiliary contacts (N.O. or N.C.)
			3 single circuit auxiliary contacts (N.O. or N.C.) plus 1 attached timer (ON or OFF delay).
			2 single circuit auxiliary contacts (N.O. or N.C.) plus 1 power pole adder (1 or 2 poles, N.O. or N.C.)
		4 or 5	1 attached timer (ON or OFF delay) plus 1 power pole adder (1 or 2 poles, N.O. or N.C.) plus 1 auxiliary contact.
3, 4 & 5	SE SF SG	2-5 (Size 3 & 4)	2 single circuit auxiliary contacts (N.O. or N.C.)
			2 single circuit (Sizes 3 & 4) or 3 single circuit (Size 5) auxiliary contacts plus 1 attached timer (ON or OFF delay).
		2-3 (Size 5)	2 single circuit auxiliary contacts (N.O. or N.C.) plus 1 NEMA Size 0-1 or Size 2 power pole adder (1 or 2 poles, N.O. or N.C.)
			4 single circuit auxiliary contacts (N.O. or N.C.)
6 and 7	SH SJ	2-3	3 single circuit auxiliary contacts (N.O. or N.C.) plus 1 attached timer (ON or OFF delay).
			2 single circuit auxiliary contacts (N.O. or N.C.) plus 1 NEMA Size 0-1 or Size 2 power pole adder (1 or 2 poles, N.O. or N.C.)
			4 single circuit auxiliary contacts (N.O. or N.C.)

Factory Installed Auxiliary Contacts

The table below lists the Form designations for factory installed electrical contacts. See Factory Modifications (Forms) section for pricing.

See Class 9999 for field modification kits.

Form Number Of Additional Auxiliary Contacts

When ordering factory installed auxiliary contacts, the Form designations listed should be used.

Number of N.O. Contacts	Number of N.C. Contacts	Form Number
0	1	X01
0	2	X02
0	3	X03
0	4	X04
1	0	X10
1	1	X11
1	2	X12
1	3	X13
2	0	X20
2	1	X21
2	2	X22
3	0	X30
3	1	X31
4	0	X40

Control Circuit Transformers

Class 9070 Type T control transformers are normally used when it is necessary to provide a lower voltage to the control circuit. This transformer with fused protection may be ordered from the factory by specifying Form F4T. The addition of a transformer often requires the use of a larger enclosure (refer to dimensions on Page 17–19). The table below shows the transformer selection for given sized starters and contactors with or without auxiliary units.

NEMA Size	Type	No. of Poles	Auxiliary Units	Transformer Class 9070 Type
0 & 1	SB SC	1-3	With max. of 2 auxiliary contacts	T50
			With timer and maximum of 1 auxiliary contact	
			With 3 or 4 auxiliary contacts With timer and 2 or 3 auxiliary contacts	T100
0 & 1	SB SC	4 & 5	With or without auxiliary contacts or timer	T100
0 & 1 Mechanically Interlocked Devices	SB SC	1-5	With or without attachments	T100
2	SD	2-5	With or without attachments	T100
3	SE	2-3	With or without attachments	T150
3	SE	4 & 5	With or without attachments	T300
4	SF	2-5	With or without attachments	T300
5	SG	2-3	Any	T500
6, 7	SH, SJ	2-3	Any	‡

‡ A Class 9070 transformer is an integral part of the Size 6 and Size 7 control circuit providing 120 volt control circuit voltage as standard.

Power Poles

Single or double circuit power pole adders may be factory or field installed on 2 and 3 pole Type S contactors and starters. The table below lists the Form designation for factory installed power pole adders. Only one power pole adder may be installed per contactor. See Factory Modifications (Forms) section for pricing.

See Class 9999 for field modification kits.

Type	NEMA Size	Class 9999 Type	Form Designation
1 N.O.	0, 1	SB6	Y428
	2	SB11	Y436
1 N.C.	0, 1	SB7	Y429
	2	SB12	Y437
1 N.O., 1 N.C.	0, 1	SB8	Y435
	2	SB13	Y440
2 N.O.	0, 1	SB9	Y430
	2	SB14	Y438
2 N.C.	0, 1	SB10	Y434

Full Voltage Contactors and Starters – NEMA Rated Application Data

NEMA Size 6 Starter
8536 SH

NEMA Size 6 Type SH and NEMA Size 7 Type SJ contactors and starters have a DC coil operated by a solid state rectifier circuit mounted on the device and powered from an ac source. The NEMA Sizes 6 and 7 are equipped as standard with a fused control circuit transformer (Form F4T) rated 240/480-120 volts 60 Hz, 220/440-110 volts 50 Hz. The purpose of this transformer is to provide an isolated 120 volts 60 Hz, 110 volts 50 Hz, supply for the control circuit. NEMA Sizes 6 and 7 may be ordered for other system voltages by specifying the voltage and frequency desired.

Operation Rates – Continuous operation rate: 3 operations/minute maximum. Jogging or Plugging Duty: 15 operations/minute - 3 minutes maximum.

Field conversion for other system voltages is accomplished by one of the following methods, NOT BY THE USUAL PRACTICE OF CHANGING THE COIL:

1. If the factory wiring is indicated as being for 480 volts 60 Hertz, 440 volts 50 Hertz, conversion to 240 volts 60 Hertz, 220 volts 50 Hertz, can be accomplished by reconnecting the control transformer as illustrated on instruction sheet supplied with the controller. This is the same method that would be used on Class 9070 control circuit transformers.

Conversion to any other voltage requires replacement of the control transformer. For other system voltages: i.e. 208, 277, 380, 600 volts, a new transformer with single voltage primary must be selected from table at right. Control transformer connections are illustrated on the instruction sheet supplied with the controller.

2. If the factory wiring is indicated as being for any voltage other than 480 volts 60 Hertz, 440 volts 50 Hertz, conversion to any other voltage requires replacement of the control transformer. Refer to table at right.
3. In Square D combination starters, the standard transformer supplied may be used to power a maximum of five Class 9001 Type K illuminated operators powered with transformer type light modules. When extra capacity to power control relays or other inductive loads is required, a second transformer must be added. Extra capacity can be purchased as Form F4T with additions in 100 VA increments.
4. Standard controllers are wired for common control and are not convertible for operation of the control circuit from a separate source of supply voltage. Controllers designated Form S have special wiring designed for separate control. They are furnished with an isolating transformer, usually having a 120 volt primary and 120 volt secondary, that must not be bypassed. Form S controllers are not convertible for operation on common control.

NEMA Size 7 Starter
8536 SJ

The tables below give the replacement transformers for Type S NEMA Sizes 6 and 7 contactors and starters. To change voltages on these devices, coils are not changed, instead transformers with the desired voltage are changed.

Replacement Control Transformers (150VA) For Type S Size 6

Voltage		Class 9070 Type
60 Hertz	50 Hertz	
240/480-120	220/440-110	31104-512-50
208-120	31104-512-52
277-120	31104-512-53
.....	380-110	31104-512-54
600-120	550-110	31104-512-51
120-120	110-110	31104-512-55
240-120	220-110	31104-512-56

Replacement Control Transformers (200VA) For Type S Size 7

Voltage		Class 9070 Type
60 Hertz	50 Hertz	
240/480-120	220/440-110	31123-501-50
208-120	31123-501-52
277-120	31123-501-53
.....	380-110	31123-501-54
600-120	550-110	31123-501-51
120-120	110-110	31123-501-55
240-120	220-110	31123-501-56

Auxiliary Contacts: A N.O. holding circuit contact and a N.C. auxiliary contact are provided as standard. The holding circuit contact may or may not be required for either 3-wire or 2-wire control. NEMA Sizes 6 and 7 have an additional N.C. auxiliary contact which is wired in the coil control circuit. **DO NOT USE THIS N.C. CONTACT FOR ANY OTHER PURPOSE.**

Combination Starters – NEMA Rated

Application Data – Class 8538, 8539

Class 8539 – UL Listed Short Circuit Ratings

7	0-480	Standard†	30,000
7	481-600	Standard†	22,000

† Standard enclosure includes non-oversize NEMA Types 1, 4 & 4X Stainless, and 12.
 * Consult factory for higher withstand ratings.

Table 1: MAG-GARD Trip Range

Suffix No.	Range Amps	Suffix No.	Range Amps	Suffix No.	Range Amps	Suffix No.	Range Amps
M01	9-33	11M	8-28	25M	625-1250	33M	1500-3000
M02	21-77	12M	18-70	26M	750-1500	35M	1750-3500
M03	45-165	13M	50-180	29M	875-1750	36M	2000-4000
M04	90-330	15M	100-350	30M	1000-2000	40M	2500-5000
M05	150-550	16M	150-580	31M	1125-2250	42M	3000-6000
M06	225-825	18M	300-1100	32M	1250-2500	44M	3500-7000

The MAG-GARD adjustable trip range is determined by the suffix of the circuit breaker catalog number. Table 1 indicates the trip range which corresponds to a given suffix number. The MAG-GARD Motor Circuit Protector should be adjusted to a level just above Locked-Rotor Current of the motor. This setting will provide optimum overcurrent protection for the motor. For more information on MAG-GARD instantaneous trip circuit breakers, refer to the MAG-GARD circuit breaker section of this Catalog.

Thermal Magnetic Circuit Breaker Type			
NEMA Size	Voltage	Enclosure	Available Amperes RMS Symmetrical
0-3	600	Standard†	5,000
4 & 5	600	Standard†	10,000
6	600	Standard†	18,000
7	0-480	Standard†	30,000
7	481-600	Standard†	22,000

† Standard enclosure includes non-oversize NEMA Types 1, 4 & 4X Stainless, and 12.

Table 2: Motor Code Letter Table

Horsepower	Motor Code Letters
½ or less	A-L
¾ — 1½	A-K
2 — 3	A-J
5 — 25	A-H
30 — 125	A-G
150 or more	A-F

The combination starter selection tables on Pages 7 — 9 are suitable for motors with Locked-Rotor Current letters per NEC Table 430-7(b) as listed in Table 2. For other motors a special thermal magnetic circuit breaker with adjustable magnetic trip settings for the specific motor is required. When ordering for these special applications, specify the motor horsepower, voltage, frequency, full load current and code letter (or locked rotor current) to assure proper protection.

NEMA Type 12 Enclosures Modified for Outdoor Applications (not to be used in salt air or corrosive environments)

Field Modifications for NEMA Type 3 dusttight, raintight and sleet resistant outdoor applications are as follows:
Watertight conduit hubs or equivalent provision for watertight connection at the conduit entrance shall be used.

Field Modifications for NEMA Type 3R rainproof and sleet resistant outdoor applications are as follows:

1. Watertight conduit hubs or equivalent provision for watertight connection at the conduit entrance, when the conduit enters at a level higher than the lowest live part, shall be used.
2. Drain holes of 1/8 inch diameter shall be added to the bottom of the enclosure.

Combination Starters — NEMA Rated Panel Layout Drawings – Class 8538, 8539

Standard NEMA Type 1, 4 & 4X Stainless, 12

The following table is provided to identify open panel space on standard NEMA Type 1, 4 & 4X stainless steel and 12 combination starters. Space and mounting holes are provided in all combination starters (except NEMA Type 7 & 9 SPIN TOP®) for the field addition of a control transformer – see Page 35 for control transformer selection.

* Size 5 combination starter does not contain a full size panel. No usable panel space is available.

Class 8538

Class 8539

Oversize Enclosures, NEMA Type 1, 4 & 4X Stainless, 12

Combination starters in oversized enclosures provide additional panel space for field addition of control relays, timing relays, terminal blocks or other auxiliary equipment. Disconnect type devices offer over 130 square inches of available panel space. Circuit breaker type devices offer over 180 square inches of available panel space.

Class 8538

Class 8539

Reversing Combination Starters — NEMA Rated Class 8738, 8739

General – Class 8738 and 8739 Type S reversing combination starters combine the requirements of motor overload and short circuit protection into one convenient package. Type S reversing combination starters are manufactured in accordance with NEMA standards, are UL Listed, and CSA certified. ● Class 8738 and 8739 reversing combination starters are designed to operate at 600 Volts AC, 50-60 Hz. Type S reversing combination starters are supplied with melting alloy overload relays as standard.

Enclosures – Class 8738 and 8739 reversing combination starters are available in the following enclosures:

- NEMA Type 1 General Purpose
- NEMA Type 4X Watertight, Dusttight, and Corrosion Resistant Glass-Polyester
- NEMA Type 7 & 9 Bolted and Spin-Top® for Hazardous Locations (Class 8739 only)
- NEMA Type 4 & 4X Watertight and Dusttight
- NEMA Type 12 Dusttight and Driptight for Industrial Use

The NEMA Type 4 & 4X stainless steel enclosure (Sizes 0 - 5) has a brushed finish. Size 6 & 7 are sheet steel enclosures and are rated NEMA Type 4 only. For an electropolished finish, specify **Form G16** and add 15% to the price of the standard device. Hubs are supplied as standard on NEMA Type 4 & 4X enclosures.

The NEMA Type 4X glass-polyester enclosed devices are UL Listed. Hubs are supplied as standard on NEMA Type 4X enclosures.

NEMA Type 12 enclosures may be field modified for outdoor applications with **Form G26**. Contact your local Square D Field Sales Office for additional information.

Also, NEMA Type 12 devices are available UL Listed for use in Class II, Division 2, Group G and Class III, Divisions 1 and 2 locations. Request **Form G21**, no additional charge.

Coil Voltages – AC coils are available for application on 50/60 Hz. NEMA Sizes 00 - 5 are supplied with coils that are designed to operate satisfactorily on line voltages of 85%-110% of rated voltage. NEMA Size 6 and 7 contactors are supplied with a DC coil operated by a solid state rectifier circuit that is powered by an AC source.

Please note that Voltage Codes have been added to the Type designations in order to improve customer service. It is necessary to include the Voltage Code when ordering combination starters. Also, 120 Volt Polyphase combination starters will be wired for **separate control**.

Auxiliary Contacts – Additional auxiliary contacts may be added to Type S starters. See Page 14 for maximum number of auxiliary units and Form designations for factory installed auxiliary contacts. See Catalog 9999CT9701 for auxiliary contact kits for field installation.

Type S Accessories – Additional accessories such as fuse blocks, fuse clip kits, disconnect switch and circuit breaker interlocks, and cover mounted control stations are available for field modifications. For factory modifications (Forms), see Pages 30-34. For field modification kits, see Catalog 9999CT9701.

3-Pole Polyphase - 600 Volts AC Maximum - 50-60 Hz

Thermal Units - Devices require 3 thermal units, see Catalog 9065CT9701 for selection information.

‡ NEMA Size 6 starters are NEMA Type 4 painted sheet steel enclosures.
 ★ NEMA Type 7 & 9 Bolted are not UL Listed.
 ▲ NEMA Type 12 enclosures may be field modified for outdoor non-corrosive and non-service-entrance-rated applications; see Page 17 for more information.
 * Coil voltage code must be specified to order this product. Refer to standard coil voltage codes listed in selection table above or additional standard voltage codes below.
 Form Y534 may be used to substitute an FAL circuit breaker for a GJL circuit breaker (no additional charge).

Coil Voltage Codes

Voltage		Code
60 Hz	50 Hz	
24†▲	..	V01
120†	110	V02
208	..	V08
240	220	V03
480	440	V06
600	550	V07
Specify	Specify	V99

▲ 24V coils are not available on Sizes 4-7. On Sizes 00-3, where 24V coils are available, Form S (separate control) must be specified.
 † These voltage codes must include Form S (supplied at No Charge).

Dimensions	Page 28

Type S Accessories (Class 9999)	Catalog 9999CT9701

Reversing Combination Starters – NEMA Rated MAG-GARD® Circuit Breaker – Class 8739

3-Pole Polyphase – 600 Volts AC Maximum – 50-60 Hz

Devices require 3 thermal units. See Catalog 9065CT9701 for selection information.

‡ NEMA Size 6 starters are NEMA Type 4 painted sheet steel enclosures.

* NEMA Type 7 & 9 Bolted are not UL Listed.

▲ NEMA Type 12 enclosures may be field modified for outdoor non-corrosive and non-service-entrance-rated applications; see Page 17 for more information.

* Coil voltage code must be specified to order this product. Refer to standard coil voltage codes listed in selection table above or additional standard voltage codes below.

Form Y534 may be used to substitute an FAL circuit breaker for a GJL circuit breaker (no additional charge).

Coil Voltage Codes

Voltage		Code

Reversing Combination Starters — NEMA Rated Application Data – Class 8738, 8739

Control Circuit Transformers

Space and drilling are provided in all combination starters, in NEMA Types 1, 4 & 4X stainless and 12 enclosures, for the field addition (or factory installation) of a Class 9070 transformer. For standard control transformer selection in reversing combination starters, see table below. For primary fusing of the control circuit, use of the Class 9999 Type SF4 fuse holder kit is suggested. This kit can be either panel mounted or side mounted on the Type S starter.

Factory Modifications (Forms) For Full Voltage Contactors and Starters

Factory installed modifications are available for the classes of control equipment listed in the respective tables. Prices shown are **additions** to standard equipment prices and are **not** to be used as separate selling prices. Kits are also available for many field modifications and normal parts replacement on most control items. Refer to Classes 9998 and 9999 for complete listings.

Standard equipment dimensions and enclosure construction may not apply when certain special features are added. Such cases should be referred to the factory with complete description when accurate dimensions are required. **Note:** If UL label is required, consult local Square D Field Sales Office. Some forms are **not** UL Listed.

Full Voltage Starters

	With Operating Interlock: Add price of each interlock per light	1, 4, 4X■, 12	X*

- ★ All push buttons are momentary contact unless specified otherwise.
- This adder, used with a NEMA Type 4X enclosure, applies to Classes 8538, 8539, 8738, 8739.
- ▲ Indicate pilot light color as Form P1 (red) or Form P2 (green), etc. as shown in the table below. Unless otherwise requested, standard practice is to wire red pilot light to indicate device is energized. No additional auxiliary contact is required. Also, standard practice is to wire green pilot light to indicate device is de-energized. An additional normally-closed auxiliary contact is required. A wiring diagram must be supplied for other pilot light colors and/or arrangements.
- ♦ Pilot lights available at 120 to 600 volt only.
- ▼ Specify marking and/or Class 9001 Type KN or Type SKN legend plate required.
- † Specify appropriate Class 9001 Type K or SK operator required.
- * To determine the maximum number of auxiliary contacts which can be added to each Type S device and for the appropriate "X Form", refer to the tables in the Class 8736 section on Page 12-81 (for reversing or two-speed devices).

Standard Pilot Light Form	Push -to-Test Pilot Light Form	LED Pilot Light	Color
P1	P21	P51	Red
P2	P22	P52	Green
P3	P23	—	Amber
P4	P24	—	Clear
—	P25	P55	Yellow

Factory Modifications (Forms) For Full Voltage Contactors and Starters

Full Voltage Controllers Only

Classes 8538, 8539, 8738 and 8739

Factory Modifications		Enclosure Type	Form Letters
	Separate Control Circuit — (specify voltage and frequency)	Any	S★
	Fused Control Circuit (without control transformer)		
	One fuse	1, 3R, 4, 4X, 12	F
	Two fuses	1, 3R, 4, 4X, 7, 9, 12	F4
	Control Circuit Transformers■		
	Standard capacity (50 or 60 Hz)		
	NOTE: All orders requesting Form FT will be supplied as Form F4T.

TROLLERS	2 2	1, 4, 4X, 12	F4F10T
ONLY	Additional Capacity (50 or 60 Hz)		
CLASSES	Two fuses in primary		
8538	100 VA additional capacity	1, 4, 4X, 12	F4T110
8539	100 VA additional capacity	7 & 9	F4T110
8738	200 VA additional capacity	1, 4, 4X, 12	F4T120
8739	Two fuses in primary and one fuse in secondary		
	100 VA additional capacity	1, 4, 4X, 12	FF4T11
	100 VA additional capacity	7 & 9	FF4T11
	200 VA additional capacity	1, 4, 4X, 12	FF4T12
	300 VA additional capacity	1, 4, 4X, 12	FF4T13
	400 VA additional capacity	1, 4, 4X, 12	FF4T14
	500 VA additional capacity	1, 4, 4X, 12	FF4T15
	Substitute non-standard single primary, and/or single secondary voltage rating on control transformer■	Any	T1▼
	Substitute dual-voltage magnet coil.	Any	Y5†

★ All combination style devices such as 8538, 8539, 8738, 8739, that use Form S should also use Form Y74 (auxiliary contact installed on disconnect switch) per NEC Article 430-74.

■ Table at right.

▲ Single primary voltage must be specified.

▼ Must be used with another form of F4T. (Ex. Standard capacity transformer required, 208-24V. Order as Form F4TT1, 208-24V.)

† Not available on Size 2 or Size 3 devices with 4 or 5 poles.

* Not available on this Size. Select appropriate transformer with secondary fuse protection.

□ Not available with 24V secondary on Size 3. Select appropriate transformer with secondary fuse protection. See Table at right for 24V secondary restrictions.

○ Not available with 24V secondary. Select appropriate transformer with secondary fuse protection. See Table at right for 24V secondary restrictions.

‡ Single phase with one leg grounded or grounded B phase applications ONLY.

■ Selection of Control Circuit Transformers

The standard primary/secondary voltages for control circuit transformers are indicated in the following table.

AC-OPERATED DEVICES With Control Transformers

Voltage	Code
60Hz (Primary-Secondary)	
120-12▲	V88
120-24▲	V89
208-120	V84
240-24▲	V82
240-120	V80
277-120	V85
480-24▲	V83
480-120	V81
480-240	V87
600-120	V86
Specify	V99

▲ 12V coils are not available on Sizes 3-7. 24V coils are not available on Sizes 4-7.

To order, select the desired device with the appropriate transformer form designation. Then convert the previously selected voltage code (V_) to reflect the desired primary/secondary voltage for the transformer. The secondary voltage should equal the previously selected coil voltage of the device.

Example:

You have previously selected a Class 8536SDG1V02S. V02S means that you need a coil voltage of 120-60/110-50 wired for separate control. You would like to add form FF4T with the transformer voltages being 48 volt primary, 120 volt secondary with Solid State Overload Relay Protection Class 20 Trip Class (H20).

The new and complete class, type, voltage code and form number will be:

Class	Type	Voltage Code	Form*
8536	SDG1	V81	FF4TH20

* Form numbers should always be shown in alphabetical order.

Marine Control

Class	Factory Modification	Enclosure Type	Form
8538	Modification of standard device for use as marine control per UL508	12/3R	M10
8539		4/4X (S.S. only)	
8738	Modification of standard device for use as marine control like Form 10 standards in addition to IEEE45.	12/3R	M11
8739		4/4X (S.S. only)	

Factory Modifications (Forms) For Full Voltage Contactors and Starters

Full Voltage Controllers Only

CLASSES 8538, 8539, 8738 and 8739

Factory Modifications		Enclosure Type	Form Letters
OVERLOAD RELAYS	Non-Compensated Bimetallic Overload Relays		
	Single Phase:		
	Types SB-SD (Sizes 0-2)Ⓜ	Any	B1
	Polyphase:

	Type SG (Size 5)	Any	BY500
	Type SH (Size 6)	Any	B
	Overload Relays - General		
Substitute Class 9065 SSRO100			
For Standard Overload Protection	Any	B11	
Omit overload protection from combination starters. (Classes 8538, 8539, 8738, 8739 only)			
Do not use with MAG-GARD® Circuit Breakers.			
Deduct per starter	Any	Y76	
Modify Size 3 Type SE starters with melting alloy overload relays to accept Type FB quick trip or SB slow trip thermal units and Size 4 Type SF starters to accept Type FB quick trip thermal units. (Rejects Type CC standard trip thermal units.)	Any	Y81	
Substitute 9999 SO4 isolated alarm contact (N.O.) on melting alloy overload relay	Any	Y342	
Substitute 9999 SO5 isolated alarm contact (N.C.) on melting alloy overload relay	Any	Y344	

Ⓜ Size 7 uses a solid state overload relay as standard. See Class 8536 for complete details.
 Ⓜ Single phase bimetallic overload relays for Type S Sizes 0-2 require two (2) thermal units per starter.
 Ⓜ For Classes 8736, 8738 and 8739, Type SG, consult Local Square D Field Office.

Solid State Overload Relay Factory Modifications (Forms)

The solid state overload relay is available on NEMA Size 00-7.
 For Class 8536, 8538, 8539, 8736, 8738, 8739 and 8810 devices.

Form Description

Type S Starter with Motor Logic
 Solid State Overload Relay

- 1 - Motor Logic, Base Unit, Trip Class 10
- 2 - Motor Logic, Base Unit, Trip Class 20
- 3 - Motor Logic, Feature Base Unit
- 0 - No additional modifications
- 1 - N.O. Aux. Contact (Field Convertible to N.C.)

Special Overload/Contactor Size Combinations (Base Unit & Feature Base Units):
 (Must Be Specified On Size 00 Starter Orders)

- Blank - Overload Matched to Starter Size (i.e. Size 1 contactor & 9-27A overload)
- 0 - A 6 - 18A overload on a starter size as indicated by the Starter Catalog Number
- 1 - A 9 - 27A overload on a starter size as indicated by the Starter Catalog Number
- 2 - A 15 - 45A overload on a starter size as indicated by the Starter Catalog Number
- 3 - A 30 - 90A overload on a starter size as indicated by the Starter Catalog Number
- 4 - A 45 - 135A overload on a starter size as indicated by the Starter Catalog Number
- 8 - A 1.5 - 4.5A overload on a starter size as indicated by the Starter Catalog Number (only offered on Feature Base Units)
- 9 - A 3 - 9A overload on a starter size as indicated by the Starter Catalog Number

SPECIAL NOTE FOR Class 8810 devices:
 You MUST SPECIFY TWO SEPARATE FORM NUMBERS TO GET MOTOR LOGIC OVERLOADS ON TWO SPEED STARTERS. The first form number is for the low speed winding and the second is for the high speed winding.
 EXAMPLE: Open Style, Size 4 Two Speed Starter with Motor Logic Overloads Required.
 Single Winding, 460V, Constant Horsepower
 High Speed FLA = 96A
 Low Speed FLA = 27A (use Size 2 Overload)

Catalog Number to Order: 8810 SF01V02 form S H20 H202
 Where: Form H20 is a Size 4 Contactor with a 45-135A Motor Logic Overload for the High Speed and form H202 is a 15-45A Motor Logic Overload on the low speed contactor.

Classes 8538, 8539, 8738 and 8739

Factory Modifications	Form
Motor Logic Solid State Overload	Base Unit, Trip Class 10 H10
	Base Unit, Trip Class 20 H20
	Feature Base Unit H30
Motor Logic Solid State Overload with Auxiliary Contact	Base Unit, Trip Class 10 H11
	Base Unit, Trip Class 20 H21
	Feature Base Unit H31

Factory Modifications (Forms) For Full Voltage Contactors & Starters

Full Voltage Controllers Only

CLASSES 8538, 8539, 8738, 8739 and 8810			
Factory Modifications		Enclosure Type	Form Letters
POWER POLES	Addition of one NEMA Size 1, 30 Amp single pole N.O. unit	Any	Y428
	Addition of one NEMA Size 1, 30 Amp single pole N.C. unit	Any	Y429
	Addition of one NEMA Size 1, 30 Amp double pole N.O./N.O. unit	Any	Y430
	Addition of one NEMA Size 1, 30 Amp double pole N.C./N.C. unit	Any	Y434
	Addition of one NEMA Size 1, 30 Amp double pole N.O./N.C. unit	Any	Y435
	Addition of one NEMA Size 2 single pole N.O. unit	Any	Y436
	Addition of one NEMA Size 2 single pole N.C. unit.	Any	Y437
	Addition of one NEMA Size 2 double pole N.O./N.O. unit	Any	Y438
	Addition of one NEMA Size 2 double pole N.C./N.C. unit	Any	Y439
MISCELLANEOUS	Coil transient suppressor (120 Volt only), Per Coil	Any	Y145
	Addition of terminal blocks (specify wired or unwired). Wired, per terminal. Each	1, 4, 12	G50★
	Unwired, per terminal. Each	1, 4, 12	G50★

★ Addition of terminal block type 9080 CA or 9080 GR6 only. Number of circuits is same as ending of form number. (Ex.: G507 is 7 wire terminal block.)
 ■ When adding a power pole to a Size 2 device, it is necessary to also specify **Form Y118**.

MAG-GARD®

Circuit Breaker	Factory Modifications	Enclosure Type	Form Letters
8539 8739	Substitute FAL for GJL circuit breaker. (Note that the GJL breaker must be used with the SSOLR.)	1 4, 4X 12	Y534

Factory Modifications (Forms) For Full and Reduced Voltage Contactors & Starters

Full Voltage and Reduced Voltage Controllers*

CLASSES 8538, 8539, 8738 and 8739

Factory Modifications		Enclosure Type	Form Letters
Auxiliary Relays	Control relay (1 thru 4 poles) — specify pole arrangement, voltage and type required♦	1, 12 4, 4X*, 9	R17# R17#
	Pneumatic Timing Relay — specify Class 9050 Type A or B, “On” or “Off” delay and wiring instructions.		
	0.2 Sec. to 1.0 Min.	1, 12 4, 4X*, 7, 9	K K
	1.0 Min. to 3.0 Min.	1, 12 4, 4X*, 7, 9	K16 K16
	Solid State Timing Relay (specify timing range) and timer (120V control req'd.)	1, 4, 4X, 7, 9, 12	K1
	Pneumatic Timing Attachment — 0.2 sec. to 1.0 min.		
	Addition of Class 9999 Type SK3 (off delay) attachment	1, 4, 4X*, 12	K36
	Addition of Class 9999 Type SK4 (on delay) attachment.	1, 4, 4X*, 12	K35
	Motor driven timing relay♦▼	1, 4, 12	K5
	Phase Failure and Reverse Phase Relay▼	1, 4, 12	Y444
Undervoltage Relay▼	1, 4, 12	Y447	
Overvoltage Relay▼	1, 4, 12	Y448	
Under and Overvoltage Relay▼▲	1, 4, 12	Y449	
Meters And Metering■	Ammeter in cover (includes current transformer if req'd.)	1, 12	G91
	Ammeter and switch with two current transformers	1, 12	G92
	Ammeter and switch with three current transformers	1, 12	G93
	Voltmeter mounted	1, 12	G94
	Voltmeter and switch mounted	1, 12	G95
	Elapsed time meter	1, 12	G97
	Operation counter	1, 12	G99
	Wattmeter	1, 12	G911
Varmeter	1, 12	G913	
Power factor meter	1, 12	G914	
Auxiliary Contacts	Additional starter (contactor) auxiliary contacts (Specify number of additional normally open or closed contacts required per contactor.) Each	Any	X†
	Auxiliary contacts installed on disconnect switch or circuit breaker operating mechanism. SPDT	1, 4, 4X, 12	Y74
	DPDT (Note: Above contacts do not switch with automatic tripping of circuit breaker. If such operation is required, consult your local Square D field office.)	1, 4, 4X, 12	Y75
Enclosures	Space heater with N.C. auxiliary contact	1, 4, 4X, 12	G51
	Function identification plate, with marking as specified	Any	G11
	Convenience receptacle (2-wire) mounted in side of enclosure	1, 12	Y31
	Drain and breather installed	7 & 9	Y41
	Cover gaskets added to NEMA Type 1 enclosures: For Classes 8538 and 8539	1	Y47
For Classes 8738 and 8739	1	Y47	
For other full voltage controllers	1	Y47	
For reduced voltage controllers	1	Y47	

- ♦ If controller has a control transformer, price that transformer with additional capacity for the relay provided.
- * This adder, used with a NEMA Type 4X enclosure, applies only to Classes 8538, 8539, 8738, 8739 and 8810 non-reversing.
- ▼ Specify control and line voltage.
- Motor HP and voltage required when placing order. Meters will be panel mounted in NEMA Type 12 enclosures.
- † To determine the maximum number of auxiliary contacts which can be added to each Type S device and for the appropriate “X Form”, refer to the tables in the Class 8536 section on Page 12-29 (for non-reversing single-speed devices) or the Class 8736 section on Page 12-81 (for reversing or two-speed devices). For Class 8600 Reduced Voltage controllers, consult local Square D Field Office.
- ‡ Addition of control relay one (1) thru eight (8) poles. Number of poles is same as ending of form number. (Ex: R174 = 4 pole relay).
- * NEMA Type 7 & 9 enclosures not available with Class 8600 devices.
- ▲ For single phase applications only.

Selection of Control Circuit Transformers

The standard primary/secondary voltages for control circuit transformers are indicated in the following table.

Voltage	Code
60 Hz (Primary-Secondary)	
120-12	V88
120-24	V89
208-120	V84
240-24	V82
240-120	V80
277-120	V85
480-24	V83
480-120	V81
480-240	V87
600-120	V86
Specify	V99

To order, select the desired device with the appropriate transformer form designation. Then convert the previously selected voltage code (V__) to reflect the desired primary/secondary voltage for the transformer. The secondary voltage should equal the previously selected coil voltage of the device. (24Vac coils for NEMA Sizes 4-7 are not available).

Example:

You have previously selected a Class 8606SDG1V02S. V02S means that you need a coil voltage of 120-60/110-50 wired for separate control. You would like to add **Form FF4T** with the transformer voltages being 480 volt primary, 120 volt secondary.

The new and complete class, type, voltage code and form number will be:

Class	Type	Voltage Code	Form*
8606	SDG1	V81	FF4T

* Form numbers should always be shown in alphabetical order.

Combination Starters – NEMA Rated Class 8538, 8539, 8738 and 8739 – Accessories

An electrical interlock may also be factory installed in either a disconnect switch or circuit breaker combination starter. Specify **Form Y74** for single pole, or **Form Y75** for two pole interlocks. For pricing see factory modifications (FORMs).

INTERLOCKS AND CONTROL TRANSFORMERS

A one or two pole electrical interlock can be added to the disconnect switch or circuit breaker. Thus if a separate control circuit is used, the magnetic starter can be de-energized when the disconnect is switched to the OFF position. See Table 1 for proper interlock selection. For electrical ratings of disconnect and circuit breaker interlocks, see Table 2 below.

Table 1: Disconnect Switch and Breaker Interlocks

Class	Type	Class 9999	
		SPDT Type	DPDT Type
8538	SB†, SC†, SD† (Series B)	R6	R7
	SD (Series C)	R43	R44
	SB, SC (Series C)	R45	R46
8538 & 8738	SE, SF (Series A)	R8	R9
	SE (Series B & C)	R41	R42
	SF (Series B & C)	R39	R40
	SG	R35	R36
8539, 8739	SB, SC, SD, SE, SF, SG▲	R26	R27
8538	SBA, SCA, SBG, SCG (Series D)	TC11	TC21
8538	SBAS8, SCAS8, SBGS8, SCGS8 (Series D)	TC10	TC20
8738	SBAS8, SCAS8, SBGS8, SCGS8 (Series E)	TC10	TC20
8738	SBA, SCA, SBG, SCG (Series E)	TC11	TC21
8538	SDA, SDA†, SDG, SDG† (Series D)	TC10	TC20
8738	SDA, SDG (Series E)	TC10	TC20
8538, 8738	SEA, SEG (Series D)	TC10	TC20

▲ No interlocks available for the GJL circuit breaker.
† Class 8538 type numbers ending in suffix "S8".

Table 2: Disconnect Switch and Breaker Interlock Electrical Ratings

Class 9999 Type R6, 8, 26, 35, 39, 41, 43, 45, TC10, & TC11 AC – 50 or 60 Hz				Class 9999 Type R7, 9, 27, 36, 40, 42, 44, 46 & TC 20, 21 AC – 50 or 60 Hz

Internal Auxiliary Switch – Circuit breakers can be supplied with a factory installed auxiliary switch for remote indication of an open and/or tripped or a closed breaker. One (specify **Form Y741**) or two (specify **Form Y751**) auxiliary switches can be supplied. The switches are supplied with normally open and normally closed circuits with a common connection. Contacts must be used on the same polarity and are rated 15 Amps at 240 volts AC. The auxiliary switches are located internally and are furnished with 19-20 inch long leads.

Alarm Switch – The alarm switch only operates when the breaker is tripped. It is used to actuate bell alarms and warning lights. The alarm switch is factory installed only (specify **Form Y742**) and consists of a single pole single throw switch which is normally open except when the breaker is tripped. The contacts are rated 4 Amps at 240 volts AC. This switch is located in the breaker and is supplied with 19-20 inch long leads.

Transformer Selection – Space and drilling are provided in all disconnect switch and circuit breaker combination starters in NEMA Type 1, 4 & 4X stainless and polyester, 12 and 7 & 9 bolted enclosures for the field addition (or factory installation) of a Class 9070 control circuit transformer and Class 9999 Type SFR4 fuse holder. This kit can be either panel mounted or side mounted on the Type S starter. For standard control transformer selection in combination starters, see Table 3. Consult field office for transformer additions to NEMA Type 7 & 9 SPIN-TOP® enclosures.

Fuse Block Mounting Brackets – The standard capacity transformer, Class 9070 Type T50, for the Size 0 and 1 starters mounts to the right of the magnetic starter.

Standards – Most combination starters and forms are UL Listed in file E152395, Category NKJH. Many combination starters have or are pending CSA Approval for File CR 584.
