Fortune's Bones Sep 17 2021 Winner of the Coretta Scott King Book Award For young readers comes a poetic commemoration of the life of an 18th-century slave, from a past poet laureate and three-time National Book Award finalist For over 200 years, the Mattatuck Museum in Connecticut has housed a mysterious skeleton. In 1996, community members decided to find out what they could about it. Historians discovered that the bones were those of an enslaved man named Fortune, who was owned by a local doctor. After Fortune's death, the doctor rendered the bones. Further research

revealed that Fortune had married, had fathered four children, and had been baptized later in life. His bones suggest that after a life of arduous labor, he died in 1798 at about the age of 60. The Manumission Requiem is Marilyn Nelson's poetic commemoration of Fortune's life. Detailed notes and archival photographs enhance the reader's appreciation of the poem.

**Front Desk** Mar 16 2024 An empowering story of empathy, courage, and hope, based on the author's real-life experience immigrating to the US as a child and working at the front desk of the motel where her parents work. Ten year-old Mia Tang moved to the US for a better life, a freer life, but so far, it's a life where she runs the front desk of a motel while her parents clean rooms. And she's not even allowed to use the swimming pool. Based on author Kelly Yang's real-life experience immigrating to America from China and running a motel with her parents, this novel explores how one little girl overcomes language barriers, discrimination, and her own lack of confidence to find her voice – and use it to make a difference. This is a sensitive story of tolerance and diversity that will resonate with readers of all cultures who have experienced the challenges of feeling like an outsider.

**The Writing Revolution** Jan 02 2023 Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.
