1. Dollar Cost Averaging (DCA) Program

If DCA is elected, an initial Premium Payment must be made to the money market Sub-Account or Fixed Account.

Account to DCA from (check one): Fixed Account money market Sub-Account

The transfer amount will be automatically determined each month by dividing the balance of the DCA "from" account by the number of months remaining in the DCA Program. This balance will include additional premium(s) received during the DCA period.

DCA Transfers will continue monthly until the first policy anniversary. Backdating will cause the DCA period to shorten, as DCA ends not later than the first policy anniversary.

2. Automatic Rebalancing

All policies will be issued with Quarterly Automatic Rebalancing which is required to maintain the Value Protection Rider. If Dollar Cost Averaging is elected, Automatic Rebalancing will begin at the end of the first quarter following the end of the DCA Program, which ends not later than the first policy anniversary.

4. Premium Payment Allocations

The Allocations elected will be used for **initial** and **future** premium payments, DCA (if elected) and Automatic Rebalancing. Allocation to any one line must be 1% or more. Use whole percentages only. Grand Total of all allocations made in this section must equal 100%. **DCA from and to the same Account is not allowed.** Please see Prospectus for Sub-Account details and availability.

*** Important limitation: In order to maintain the Value Protection Rider, for any allocations elected to the Tier 3 classified funds, at least 20% must be allocated to the Tier 1 classified funds. See the Product Prospectus for any such limitations.**
