TF17212B138B61	T1X MTR SYNTHETIC/BLUED 17HMR N/S 10RD 20" MT - LH

### SAFETY

A two-stage safety that's easy and quiet to operate and clearly indicates when the rifle is on safe or ready to fire.

### BOLT

Tikka T1x has a stainless steel bolt, which offers smooth and weather resistant movement.

### ACTION

The action shares the same bedding surfaces and inlay footprint with the centerfire T3x rifles.

### SIGHT ATTACHMENT

### BARREL

A cold hammer forged barrel with a crossover profile offers the benefits of a heavier barrel without much added weight.

### STOCK

Light and durable stock with carefully designed grip patterns for maximum comfort. From a vertical pistol grip to coloured grips, the T1x stock can be fitted with most T3x accessories. The length of the stock can be increased with spacers. This allows the rifle to grow alongside the shooter.

### TRIGGER

The mechanism shares the same high quality trigger unit offered in Tikka centerfire rifles for achieving maximum accuracy.

### MAGAZINE

A 10 round magazine comes as standard for both 22 LR and 17 HMR calibers.

### PISTOL GRIP

Compatibility with most T3x accessories makes it easy to adapt the rifle to the preferences of any shooter.

The ample 10 round magazine and an exceptionally high quality trigger mechanism make each shot count, whether you are at the range or exploring the great outdoors.

Experience the most versatile rimfire rifle on the market.

Tikka T1x rimfire rifle has been designed from the ground up to handle a variety of shooting tasks. Its barrel has a cross-over profile, so you can enjoy the benefits and stability of a heavier barrel without noticeably increasing the weight.

Experience the rimfire rifle that performs perfectly at the range and in the rough.

# MADE IN FINLAND

Revered all over the world.

All Tikka rifles are engineered and manufactured by Sako, in Finland. We take pride in our products and deliver what we promise. Every Tikka rifle has to group three shots under one inch at a distance of 100 m prior to being sold anywhere. Tikka rifles are both innovative and durable, but most importantly, they can be relied on under any circumstances.

A rifle comes with a purpose – to successfully hit the target. When it comes to accuracy and performance, Tikka is second to none.

## T1x UPR

High performance in all situations.

T1x Ultimate Precision Rifle introduces a new kind of lightweight stock construction: the bedding features an extra layer of carbon fiber mixed with fiberglass for increased rigidity and accuracy. The stock is coated with a rough surface for the best grip in any condition and has attachments for QD slings. T1x UPR rifles are all muzzle threaded with 1/2" -28 UNEF thread.

### ADJUSTABLE CHEEK PIECE

Features a robust adjustable cheek piece for optical scope alignment.

### MAGAZINE

T1x UPR comes with a 10 round magazine as standard for both 22 LR and 17 HMR calibers

T3x UPR can be adjusted to suit all your needs: QD slings can be attached, the recoil pad length can be adjusted with spacers, and you can choose between single stage or set trigger.

Caliber options:  
22 LR | 17 HMR

Product Code	Description
TF17539A598B68	T1x UPR 22 LR N/S 10RD 20" MT1/2X28
TF17239A598B61	T1x UPR 17 HMR N/S 10RD 20" MT1/2X28

## TIKKA T3x SERIES

# THE BEST OF EVOLUTION

Features and improvements – you wished, we listened.

### STOCK NOISE REDUCTION

Be as silent as the forest. T3x synthetic stocks now have a foam insert within the interior of the rear stock. This lowers the stock-generated noise and can help you keep your target in sight. Not available for models with an adjustable cheek piece.

### SAFETY

Tikka rifles provide you with a two-stage safety, blocking both the trigger and bolt handle. The safety is easy to operate and indicates when the rifle is ready for firing.

### IMPROVED BOLT SHROUD

Robustness and quality go hand in hand. Our T3x models come with a durable metallic bolt shroud that covers and shields the rear of the bolt body and the firing pin.

### ACTION

The action is designed for accuracy, reliability and easy servicing. Tikka rifles provide you with an extremely rigid action with a two-locking lug T3 bolt. The bolt features a spring-loaded plunger ejector and a removable bolt handle, with 70° opening angle leaving plenty of room for handling the bolt. This is one of the smoothest actions on the market.

### IMPROVED RAIL ATTACHMENT

Always keep the target in your sight. The T3x models have extra screw placements on top of the receiver so that you can robustly attach a picatinny rail – even when using larger scopes.

### SIGHTS

Most rifles are delivered without open sights; they are optional. Integral rails are installed on top of the receiver for Tikka's unique Optilock scope mounts. The receiver is also tapped for a Picatinny scope mount base.

### BARREL

A cold hammer-forged Sako barrel of highest-grade stainless steel is fastened to the receiver by a sturdy thread for safety and accuracy. Barrel is hand-crowned, as a precise and even muzzle crown is essential for accuracy.

### IMPROVED GRIP

A grip that never slips. The T3x synthetic stock has a new asymmetrical grip pattern and shape that has been specifically designed to give a solid grip in all conditions.

### STOCK

The T3x stock are designed to be light and durable. Carefully engineered use of walnut or fiberglass-reinforced synthetic materials guarantee a solid performance. An optional recoil pad system with spacers provides adjustability in length of pull. Grip patterns are carefully designed for added comfort and a firm grip.

### MAGAZINE

The single-column detachable magazines are manufactured from strong fiberglass-reinforced synthetic material. The magazine holds 3, 5 or 6 rounds depending on the model and caliber. A flush release is installed at the front of the magazine to prevent accidental releases.

### REDESIGNED EJECTION PORT

The new T3x receiver introduces a widened angular ejection port that makes it easier to feed one cartridge at a time.

### TRIGGER

A single-stage pull with a comfortable trigger feel. The steel trigger has vertical grooves for added grip, even when wearing gloves. It is easily adjustable through the magazine well from 1 to 2 kg (2 to 4 lbs).

### NEW MODULAR STOCK

T3x has a new modular synthetic stock that has interchangeable pistol grips, making it possible to modify the angle of the grip. This allows for multiple shooting positions. Additional grips are sold separately.

The T3x synthetic stock also has an additional attachment point which allows you to change the width of the stock's fore-end.

### NEW RECOIL PAD

T3x models come with a new recoil pad technology that reduces the impact of recoil on the shooter. The new robust pad allows you to fully concentrate on the accuracy of your shots.

The Tikka T3x contains the same features that have made all Tikka rifles world-famous. When you have a Tikka rifle, you know it is second to none.

# T3x COMPACT

A rifle that fits like a glove.

T3x compact is an adjustable rifle that adapts to its user. This rifle has a 12.5" length of pull, creating ideal ergonomics for shooters who struggle with long stocks. It is suitable for long term use, as you may adjust the length of pull according to your needs – making it especially valuable for young shooters as they are able to adjust it with the years.

The calibers chosen are milder in recoil, easy to control and therefore great for training as well as for serious hunting.

Caliber options: 204 Ruger | 22-250 Rem | 243 Win | 308 Win | 7mm-08

Tikka T3x Compact comes with 30mm (aprox. 1") spacer and larger recoil pad to enable longer length of pull.

# T3x VARMINT

If you're looking for a true stalking or long distance tool, look no further.

T3x Varmint has consistent accuracy, be it at the range or on the plains. The free-floating barrel of the Tikka T3x Varmint effectively eliminates vibration, offering a solid accuracy performance round after round. The synthetic T3x Varmint stock comes with a vertical pistol grip, better suited for prone shooting.

The stock has an extra wide fore-end for more solid support, and the swivel stud accommodates either a bipod or a sling. The ergonomically designed Varmint cheek piece provides a comfortable optimal head position.

A barrel and action made of stainless steel with a satin matte finish. Also available as left-handed.

Caliber options: 204 Ruger | 223 Rem | 22-250 Rem | 243 Win | 308 Win | 6.5x55 SE | 6.5 Creedmoor | 7mm Rem Mag | 300 Win Mag

The Beasley Brothers are born and raised Canadian boys who have always loved the great outdoors. They were raised hunting, fishing and playing hockey like most Canadian kids. Their extreme passion and love of family led them down a path into the hunting industry. They now work full time as hosts of Canadas most watched hunting TV series Canada in the Rough. The documentary series features the greatness of Canada as the brothers explore the country's vast unspoiled wilderness from coast to coast to coast filming their hunting adventures and sharing their love of family, conservation and the great nation they call home. Canada in the Rough is currently airing nationally in Canada in both English and French, nationally in the USA and in 25 countries around the world.

# T3x LAMINATED STAINLESS

Tikka T3x laminated stainless is a weather-resistant, sharp-looking grey stock for the adventurous hunter. T3x Laminated Stainless is designed to withstand demanding weather conditions. To achieve this, the Laminated Stainless model comes with a stainless steel barreled action and hard-laminated stock. Compared to normal wood the laminated wood cell structure does not expand during shifting weather conditions. This will minimize the change in point of impact from where the rifle was zeroed.

# T3x ARCTIC

The rifle that Canadian Rangers trust

When Canadian Rangers were choosing their new rifle, the T3x Arctic beat all of its rivals. The rifle is designed to operate in some of the toughest conditions in the most remote areas of world. The Canadian Rangers chose the T3x because it combines second to none weather resistance and performance.

# T3x UPR

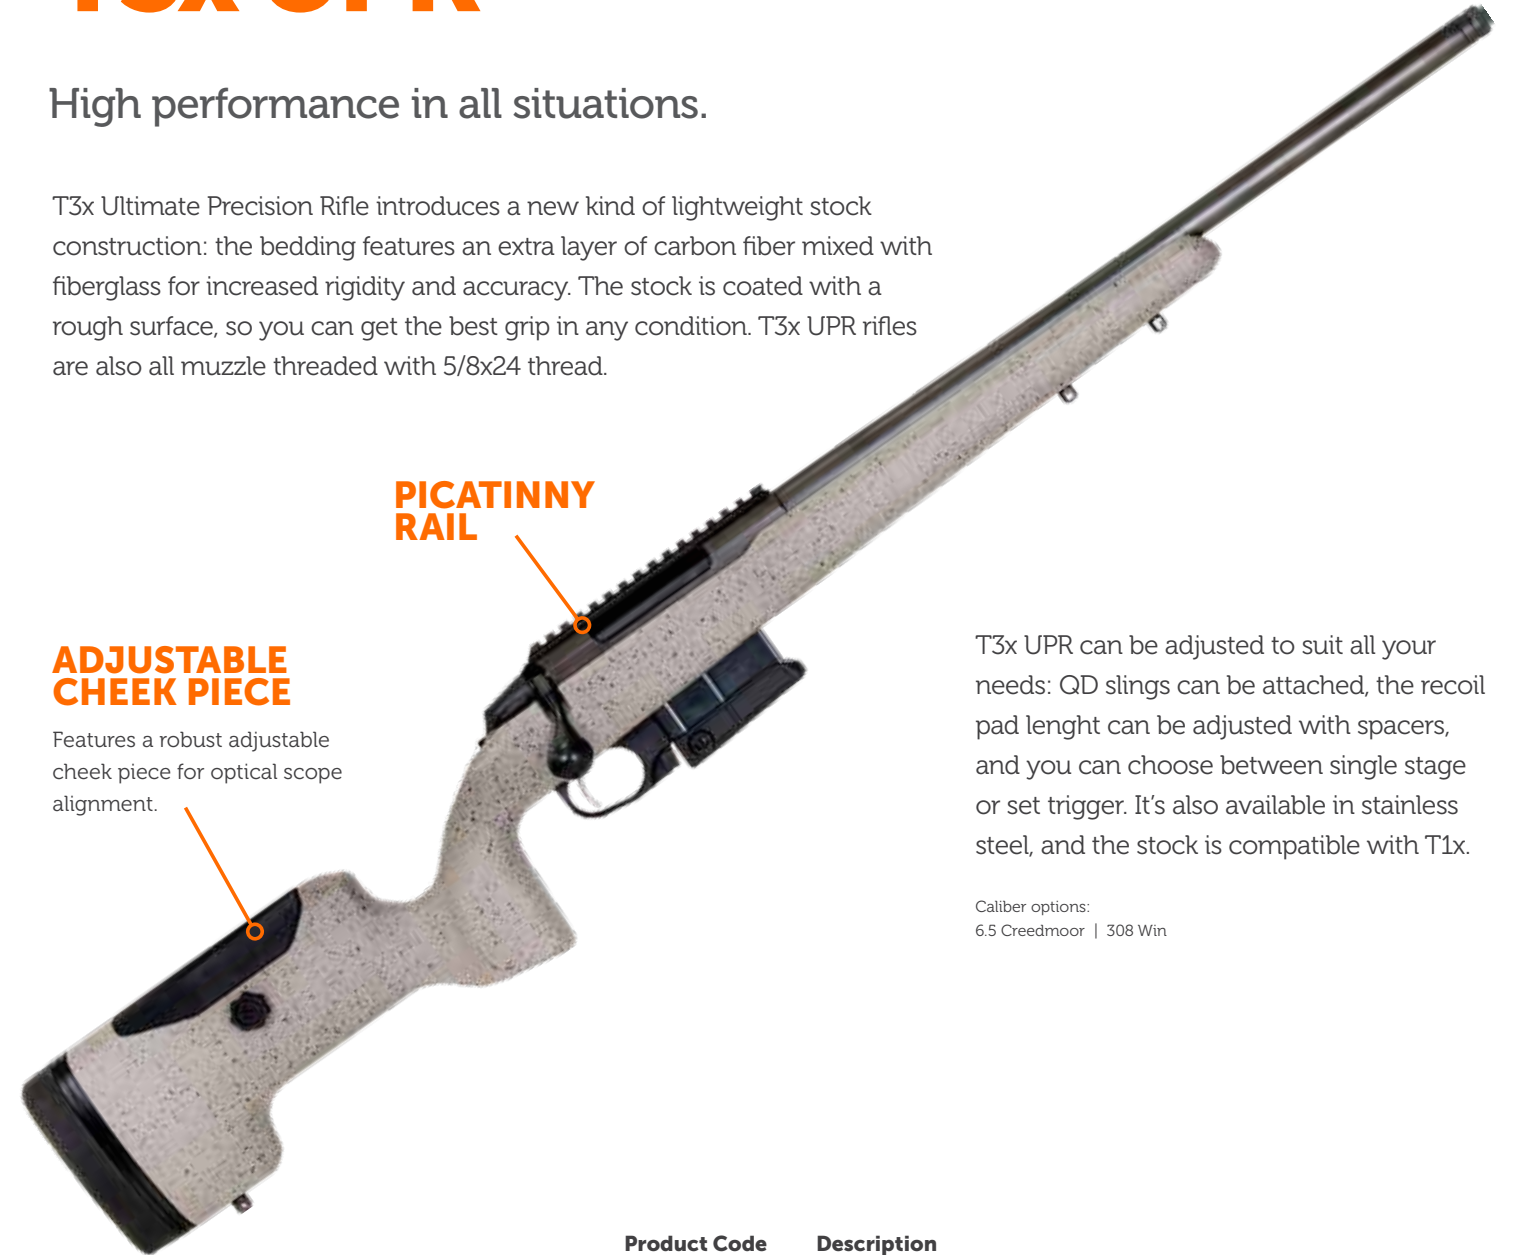

High performance in all situations.

T3x Ultimate Precision Rifle introduces a new kind of lightweight stock construction: the bedding features an extra layer of carbon fiber mixed with fiberglass for increased rigidity and accuracy. The stock is coated with a rough surface, so you can get the best grip in any condition. T3x UPR rifles are also all muzzle threaded with 5/8x24 thread.

**PICATINNY  
RAIL**

**ADJUSTABLE  
CHEEK PIECE**

Features a robust adjustable cheek piece for optical scope alignment.

T3x UPR can be adjusted to suit all your needs: QD slings can be attached, the recoil pad length can be adjusted with spacers, and you can choose between single stage or set trigger. It's also available in stainless steel, and the stock is compatible with T1x.

Caliber options:  
6.5 Creedmoor | 308 Win

# T3x CTR

High performance in all situations.

T3x Compact Tactical Rifle is a multipurpose rifle that adapts to any given situation. The Tikka T3x Compact Tactical Rifle features a 10-round steel magazine and comes standard with vertical angled grip for prone shooting.

Caliber options: 223 Rem | 308 Win | 6.5 Creedmoor

The T3x Compact Tactical Rifle has a durable aluminium trigger guard and a magazine release lever that enables rapid magazine changes. Its compact size, Picatinny rail, Teflon® bolt and 20" or 24" semi-heavy barrel contour with 5/8x24 muzzle thread make this rifle a reliable tool for all training purposes. This rifle can be used as a hunting rifle as well.

# T3x TACT

T3x TACT is the ultimate choice for hunters who need a rifle that can handle the same forces that they can.

Compact size, Picatinny rail, vertical grip, wide fore-end, Teflon® bolt and 20" semi-heavy barrel contour make this a reliable precision tool in all circumstances. The T3x TACT rifle is in a class of its own. This rifle has free-floating matchgrade barrel and with phosphate coating on both barrel and action will give this rifle a lasting protection against external conditions. The M18x1 muzzle threading enables you to attach an accessory muzzle break or suppressors.

# THE OPTILOCK™ IDEA

The Optilock™ mounts keep the scope aligned and secured during all circumstances.

The scope is mounted with the revolutionary ball-bearing rings. Unlike conventional mounts, the Optilock's polymer rings evenly distribute the clasp force along the shaft of the scope, protecting your optics. The limiter pin in the mount base and the limiter pin slot on the receiver enable fast, secure and accurate mounting of the scope.

Optilock bases and rings are machined from a solid block of steel creating a high strength and dimensionally accurate product.

Rings of different height and diameter are available (please see data table). This allows for adjusting sights to suit each shooter and scope model.

## RING MOUNTS
