

Board of Medicine and Board of Osteopathic Medicine

Data Tables Physician Certification Pattern Review 2022 Annual Report

Under section 381.986(4)(j), Florida Statutes, “The Board of Medicine and the Board of Osteopathic Medicine shall jointly create a physician certification pattern review panel that shall review all physician certifications submitted to the medical marijuana use registry. The panel shall track and report the number of physician certifications and the qualifying medical conditions, dosage, supply amount, and form of marijuana certified. The panel shall report the data both by individual qualified physician and in the aggregate, by county, and statewide.”

The Physician Certification Pattern Review Panel (Panel) is responsible for reporting its findings and recommendations by January 1 of each year to the Governor, the President of the Senate, and the Speaker of the House of Representatives.

Physician Certification Pattern Review Panel

Chair and Vice Chair

Sandra Schwemmer, D.O., Chair

Andre Perez, Consumer Member, Vice Chair

Members

Jorge Gadea, D.O.

William Kirsh, D.O.

Jorge J. Lopez, M.D.

Luz Pages, M.D.

Michael Wasylik, M.D.

Data Notes

1. All physician certification data came from the Medical Marijuana Use Registry (MMUR).
2. Physician licensure information (the county for primary practice location) came from the Division of Medical Quality Assurance (MQA) Licensure Database and was accessed on October 1, 2021. Physicians who provided an out of state primary practice location or have indicated they are not practicing were grouped as “Other” at the bottom of the county lists.
3. Datasets are accessed from live databases, reflecting the information at that moment, and therefore are subject to change. For example, physicians may change their primary practice locations at any time, which may change the county of their address.
4. Routes of administration (Edibles, Inhalation, Oral, Smoking, Sublingual, Suppository, or Topical) are measured in milligrams (mg) or ounces (oz).
5. County and physician average doses are reported as in previous years (arithmetic mean). Statewide averages are taken from the data presented in the report (geometric mean).
6. Where reporting data may pose an identification risk, numbers are suppressed by using an “*”.

Data Table Terms and Definitions

Average (AVG) daily dose is the average of all *maximum* daily doses ordered within a physician certification by route of administration and type (low-THC cannabis or medical marijuana).

Average ounces are the average of all “total ounces per 35-day order period of marijuana in a form for smoking” by certification, physician, county, or state.

Cannabidiol (CBD) for low-THC cannabis ordered by route(s) in the Medical Marijuana Use Registry is measured in milligrams per day.

Chronic nonmalignant pain means pain that is caused by a qualifying medical condition or that originates from a qualifying medical condition and persists beyond the usual course of that qualifying medical condition.

County is based on the primary practice location (address) physicians provided in the Medical Quality Assurance Licensure Database.

Dose is the milligrams (mg) per day for each route of administration a physician recommends in the Medical Marijuana Use Registry as part of a certification for marijuana. The “total mg/day” is the sum of all doses for a given form and type of marijuana ordered. All dose data entered was used.

Form is a term referenced in section 381.986, F.S., to describe the routes of administration.

Geometric mean is a method for describing the central tendency of a set of numbers by finding the product of their values. An arithmetic mean adds numbers instead of multiplies them. The geometric mean is used when there are large fluctuations in a data set to prevent outliers from skewing result, yet still included those data points in the analysis.

Low-THC cannabis means a plant of the genus *Cannabis*, the dried flowers of which contain 0.8 percent or less of tetrahydrocannabinol and more than 10 percent of cannabidiol weight for weight; the seeds thereof; the resin extracted from any part of such plant; or any compound, manufacture, salt, derivative, mixture, or preparation of such plant or its seeds or resin that is dispensed from a medical marijuana treatment center.

Marijuana is all parts of any plant of the genus *Cannabis*, whether growing or not; the seeds thereof; the resin extracted from any part of the plant; and every compound, manufacture, salt, derivative, mixture, or preparation of the plant or its seeds or resin, including low-THC cannabis, which are dispensed from a medical marijuana treatment center for medical use by a qualified patient.

Medical Marijuana Use Registry (MMUR) is a secure, electronic, online medical marijuana use registry for physicians, patients, and caregivers that is accessible to law enforcement agencies, qualified physicians, and medical marijuana treatment centers.

Medical Quality Assurance (MQA) Licensure Database contains information on health care practitioners in the state of Florida licensed under chapter 458, F.S., and chapter 459, F.S. The information includes an indicator for physicians who have qualified to order low-THC cannabis and medical marijuana for qualified patients.

Office of Medical Marijuana Use (OMMU) is charged with writing and implementing the Florida Department of Health rules for the use of marijuana, overseeing the statewide Medical Marijuana Use Registry, and licensing Florida businesses to cultivate, process, and dispense marijuana to qualified patients. More information about the Medical Marijuana Use Registry is available online at

the Office of Medical Marijuana Use website: <https://knowthefactsmmj.com/>

Orders refer to consecutive order periods, up to three, each with a maximum number of 70 days. Within the 70-day period, physicians can choose to order 10 options: low-THC cannabis and/or medical marijuana in up to five different routes of administration.

Physician certifications for medical marijuana in a form for smoking may have up to six order periods, each with a maximum number of 35 days.

Physician certification is a qualified physician’s authorization for a qualified patient to receive marijuana and a marijuana delivery device from a medical marijuana treatment center.

Physician county data is pulled from the most recent data available relative to the end of the reporting period. “Other” physicians were those listed as “Not Practicing” and had an active status in the MQA Licensure database when county information was accessed or as “Out of State” with out-of-state addresses but were otherwise listed as active status.

Practitioner Profile information is drawn from MQA’s licensure database and contains physician information that is posted in the online License Verification search.

Qualified patients are residents of this state who has been added to the Medical Marijuana Use Registry by a qualified physician to receive marijuana or a marijuana delivery device for medical use and who has a qualified patient identification card.

Qualified physicians are persons who hold an unrestricted license as an allopathic physician under chapter 458, F.S., or as an osteopathic physician under chapter 459, F.S., and is in compliance with the physician education requirements of subsection (3) of 381.986, F.S.

Qualifying medical conditions are required for physician certification. A patient must be diagnosed with at least one of the following conditions to qualify to receive marijuana or a marijuana delivery device:

- | | |
|--|--|
| (a) Cancer | (i) Parkinson’s disease |
| (b) Epilepsy | (j) Multiple sclerosis (MS) |
| (c) Glaucoma | (k) Medical conditions of the same kind or class as or comparable to those enumerated in paragraphs (a)-(j) |
| (d) Positive status for human immunodeficiency virus (HIV) | (l) A terminal condition diagnosed by a physician other than the qualified physician issuing the physician certification |
| (e) Acquired immune deficiency syndrome (AIDS) | (m) Chronic nonmalignant pain |
| (f) Post-traumatic stress disorder (PTSD) | |
| (g) Amyotrophic lateral sclerosis (ALS) | |
| (h) Crohn’s disease | |

Routes of administration is defined in emergency rule 64ER20-31. F.A.R., as the appropriate method for the usable product to be taken into the body of the qualified patient, as certified by a qualified physician.

Smoking means burning or igniting a substance and inhaling the smoke. As permitted by section 381.986(4)(c), F.S., qualified physicians may determine that smoking is an appropriate route of administration for a qualified patient.

Supply is the total amount in mgs for all orders within a certification (daily dose multiplied by the number of days ordered) for all routes of administration other than smoking. For smoking, supply is the total amount in ounces for all orders within a certification.

Terminal condition means a progressive disease or medical or surgical condition that causes significant functional impairment, is not considered by a treating physician to be reversible without the administration of life-sustaining procedures and will result in death within one year after diagnosis if the condition runs its normal course.

Tetrahydrocannabinol (THC) for medical marijuana ordered by route(s) in the MMUR is measured in milligrams per day.

Type is low-THC cannabis or medical marijuana.
