HOW TO Install the Hawaiian Language in Windows 10

Installing the Hawaiian language in Windows 10 will allow you to type Hawaiian words using the correct diacritical marks, 'okina and kahakō. Because you're installing the language, these diacriticals will be available in most Windows Unicode fonts; you won't have to install special fonts in your computer. The diacriticals will appear correctly on websites, pdfs, spreadsheets, etc. as well.

1. Go to 'Start > Settings' or press the Windows button on your keyboard:

2. Click on "Time & language"

Settings	Windows	s Settings	- 🗆 X
	Find a setting	۹	-0
System Display, notifications, power	Devices Bluetooth, printers, mouse	Network & Internet Wi-Fi, airplane mode, VPN	Per onalization d. lock screen, colors
Apps Uninstall, defaults, optional features	Accounts Your accounts, email, sync, work, other people	Time & language Speech, region, date	Gaming Game bar, DVR, broadcasting, Game Mode

3. Select "Region & language" from the left-hand navigation menu

4. Click on "Add a language"

	らしていていています。 日本学 Windows display language	

5. Scroll through the list and click on "Hawai'i"

- 6. Close all dialog boxes.
- 7. Notice that in the bottom right-hand corner of your screen, the keyboard language displays. You can quickly and easily change the language by pressing and holding the Windows key then pressing the space bar.

To type an 'okina, make sure the language is set to "HAW" then press the regular apostrophe key on your keyboard. You should see an 'okina in your document.

To type a regular apostrophe while the language is still set to "HAW," press and hold the RIGHT ALT key and press the apostrophe key on your keyboard. You should see a regular apostrophe in your document. Alternatively, you can toggle back to the English language, "ENG" on your keyboard by simultaneously pressing the Windows key and the space bar on your keyboard.

To type a kahakō, make sure the language is set to "HAW" then press and hold the RIGHT ALT key on your keyboard and type the appropriate vowel... \bar{a} , \bar{e} , \bar{i} , \bar{o} , and \bar{u} . If you need to capitalize these vowels you'll also have to press and hold down either SHIFT key... \bar{A} , \bar{E} , \bar{I} , \bar{O} , and \bar{U} .
