

All About the Brain

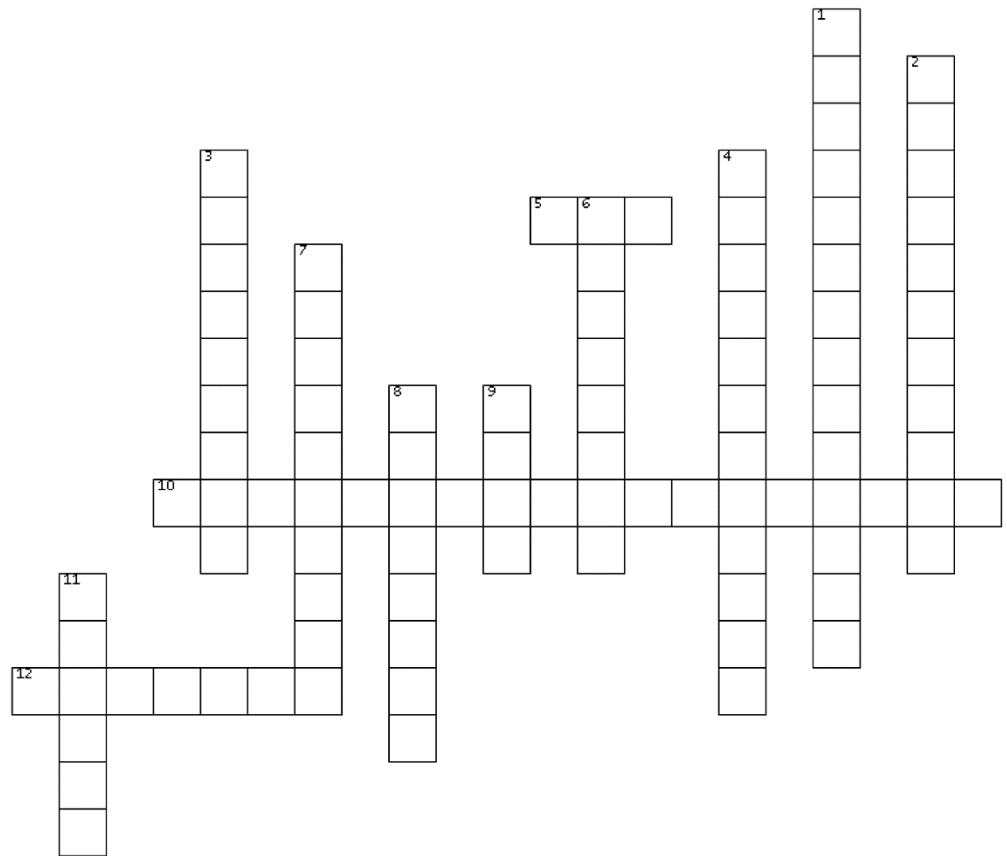

CROSSWORD PUZZLE: Read each clue. Use the word bank to complete the puzzle.

ACROSS

- 5. Mini-stroke caused by a temporary clot.
- 10. Your brain floats in this fluid that cushions it from bumping around and protects it from infections.
- 12. Has 22 bones that work like a helmet for your brain.

DOWN

- 1. Controls hormones, substances that affect your growth, mood and how your body's organs work.
- 2. Stroke caused by a blood vessel rupturing and preventing blood flow to the brain.
- 3. Controls involuntary muscles—muscles that work without you thinking about them, such as breathing, digesting food, circulating blood and more.
- 4. Controls your body's temperature.
- 6. Stroke caused by a clot obstructing the flow of blood to the brain.
- 7. Controls balance, movement and coordination.
- 8. The largest part of your brain that controls your thinking, moves your muscles and remembers information.
- 9. Acronym to help remember how to identify a stroke and what actions to take.
- 11. Happens when blood and oxygen can't get to the brain which means that the brain can't work the way it should.

WORD BANK

- | | | | |
|---------------------|-----------------|------------|-------------|
| Cerebrum | Hypothalamus | Brain Stem | Ischemic |
| Cranium | Cerebellum | Stroke | Hemorrhagic |
| Cerebrospinal Fluid | Pituitary Gland | FAST | TIA |
