Benchmark (Bmk)	FTSE Developed Core Infrastructure Index (with net dividends reinvested) in Australian dollars
Number of holdings	133

Investment objective

Vanguard Global Infrastructure Index ETF seeks to track the return of the FTSE Developed Core Infrastructure Index (with net dividends reinvested), in Australian dollars, before taking into account fees, expenses and tax.

ETF overview

The ETF provides low-cost access to infrastructure securities listed in developed countries. It offers investors diversified exposure to infrastructure sectors, including transportation, energy and telecommunications. The ETF is exposed to the fluctuating values of foreign currencies, as there will not be any hedging of foreign currencies to the Australian dollar.

Performance return^{A,B,C} (%)

	ETF gross	Bmk	ETF total	Distb'n	Growth

Quarter ended	Amount (CPU)	Reinvestment price
31 March 2024	52.7412	\$63.8711

Notes

- ^A Past performance is not an indication of future performance.
- ^B Returns assume reinvestment of all distributions. Returns for periods longer than 1 year are annualised. ETF gross returns are before management fees and taxes, but after transaction and operational costs. ETF total return is the ETF gross return less management fees. Index returns do not allow for taxes, management, transaction and operational costs.
- ^C Returns assume that an investor purchased units at Net Asset Value (NAV) and does not reflect the transaction costs imposed on the creation and redemp of ETF units, brokerage or the bid ask spread that investors pay to buy and sell ETF securities on the Australian Securities Exchange.
- ^D Past distributions are not an indication of future distributions.
- ^E For a full breakdown of the management fees and costs, please refer to the "Fees and costs summary" section of the PDS.

Glossary

Median market cap is the midpoint of market capitalisation (market price multiplied by the number of shares outstanding) of the shares in the fund. Half the shares in the fund will have higher market capitalisation, half will have lower.

Price/Earnings ratio (P/E ratio) is a measure of the market value of a share compared to the earnings of the company. A share with a price of \$10, and earnings last year of \$1 a share, would have a P/E ratio of 10. For a fund, the ratio is the weighted average P/E ratio of the shares it holds. In general, a high P/E suggests that investors are expecting higher earnings growth in the future compared to companies with a lower P/E. Companies with negative earnings are excluded from the calculation.

Price/Book ratio is calculated by dividing the current market price of the share by the book value per share of the company.

Return on equity ratio is a measure of how much profit a company generates relative to its shareholders' equity. For a fund, the ratio is the weighted average return on equity ratio of the shares it holds.

Earnings growth rate is a measure of the trailing Earnings Per Share growth for a given company and share. For a fund, the rate is the weighted average earnings growth of the shares it holds.

Equity yield (dividend) is the dividend income earned by shares, expressed as a percentage of the market price of those shares. For a fund, the yield is the weighted average equity yield of the shares it holds.
