Ultimate lucky block mod 1. 7 10

Lucky block mode is an interesting but potentially devastating addition to Minecraft. It adds a questionnaire printed block to the game and once broken has a chance of spawning something good or something terrible. The block has a chance to spawn something as big as ivy food and candy or even a fully domesticated and armored horse: Or something as devastating as a block of lava and fire. Or an armored zombie named Bob with a vicious sword! You may have luck with a super-happy block that spits out happy drinks that can also vary in the good or bad luck they're assigned after you break them. The point of this fashion is to give new use to gold ingots. If you find yourself always stocked with gold but never using it, this mode is for you. Now you can turn that weak metal into Lucky Blocks and let fate decide what comes out. It's a neat mode for multi-player servers or for making game cards, but how randomly blocks behave can be a dangerous mode for your regular map. It is recommended either to back up your map or create one specifically for this mode that you do not risk wrecking unwanted havoc on your favorite world.

Lucky Mod is a pretty interesting mode about Minecraft that you can download here. Basically throws a yellow box into the game. The block looks just like the bonus boxes from Mario's Game series. block is broken can give you something very good or very bad. So it's a surprise block. Block on happy block modes it's yellow and much similar to the boxes on Mario's game Point of Mod is to spend accumulated gold much faster. If you have gold stock then go crafting and turn into Metal Lucky Blocks. The process required to make gold into metal boxes for Lucky Block Mod Options of this Mod , it is that if you have a lot of gold, you can automatically add happiness to different blocks. Just create a unique recipe block, then add it to the surrounding blocks just by repeating until you reach the 100+ limit. It can also be used in multi-player mode , but the randomness of expanding a multi-player block can cause your card to fail, so it's always better to have a backup about your map. 2016. 1. 16. 21:59
