Vedic astrology zodiac signs and dates

Future predictions based on the signs of the sun are unusually popular around the world. Some people are very accustomed to reading those expectations that start their day with just reading their horoscopes. Due to the growing popularity of the sun signs horoscopes, now almost every newspaper, magazine and even news channels have different blocks dedicated to astrology. The trend of astrology has also taken the Internet within its limits and glowed successfully. Mostly, the forecast of the sun sign. The Sun is considered as a planet in astrology and has very strong effects on all indigenous peoples. In astrology, the universe is divided into 12 parts and these twelve parts at the time of your birth, that will be your sun's sign. Each source in the business to make predictions has different criteria for forecasting. Most of us read the forecasts without paying particular attention to what is on its basis. You may wonder why it is important to know what the prediction is based on. Well, you'll be amazed when you know there are two ways to measure the sun's signs. One is a Western way and the other is the way hindus (Vedic methods). Therefore, there is a big difference between the western sun's sign in Vedic astrology. The difference at the orientation point of each of the sun signs has been named as Ayanamsa. So, instead of just reading any prediction, it's best to make sure that you're reading the correct one. Western and Vedic, both types of sun signs mentioned below. Signature dates of the Western Zodiac (Western Sun Signs) Zodiac Signs 1: Aries March 21 - April 20 2: Taurus April 21 - May 21 3: Gemini May 22 - June 21 4: Cancer 22 June - 22 July 25: Leo 23 July - 23 August 6: Virgo 22 August 6: Virgo 22 August 6: Virgo 22 August 7: Balance Tower September 7: Balance Tower September 7: Balance Tower September 24 - October 8: Scorpio Bow November 23 - December 21 10: Capricorn 22 December - 20 January 11: Aquarius 21 January -19 February 12: Pisces February 20 - 20 March Vidic Zodiac Signature Date (Vedic Sun Signs) Zodiac Signs 1 Pregnancy April 14 - May 15 Hay 15 - 15 June 3: Gemini June 15 - 17 October 7: Libra 17 October - 16 November 8: Scorpio November 16 - 16 December 9: Sagittarius 16 December - 14 January 14 10: Capricorn 14 January - 13 February - 13 February - 14 March 12: Pisces 14 March - 14 April Many times you feel frustrated when you that the prediction I read was wrong. The prediction may not have been wrong just you are not aware of your sun sign. Reading horoscopes can make you aware of the many events coming from your life in advance. But, at the same time, false prediction can lead to your depression. Incomplete information is said to be more dangerous than knowing anything at all. With the above data, you can easily analyze your sun sign from both sides. From now on, any prediction you ever read, just make sure you read right into one. Western astronomercalculates the sun's signature differently from oriental (Vedic) astrology, you're actually gemini - that certainly helps explain why the things that your newspaper tower says about you don't always add up since the attributes of two sun signs can never match! There is a scientific explanation for why there is this difference in the sun's signs between Western astrology and Vedic. Believe it or not, it has to do with the fact that the earth is orbiting. It is well known that during roman times, astrologers around the world decided that the lamb would be considered the first sign of the Zodiac and everyone agreed on a position of 12 constellations, allocating equal parts 30 degrees of the Zodiac belt 360 degrees. However, over the past 2000 years, earth's rotation has changed our planet's position by about 22 to 24 degrees! This is almost the entire Zodiac mark measuring about 30 degrees... Vedic astrology then corrects this contradiction between the signs of the Western and Vedic sun aigns as of 2020-2021: 2020 2020-2021 Whale / Mena Water March 12th - April 12th Bow / Dhanu Fire December 14th, 2020 - January 12th, 2021 Aries / Wishba Earth May 12th - June 13th Aquarius / Kumbha Air February 11th - March 13Gemini / Mithuna Air June 13th - 12th - May Capricorn / Makar Earth January 12th - April 12th - May Capricorn / Makar Earth January 12th - February 11th Taurus / Vrishbha Earth May 12th - June 13th Aquarius / Kumbha Air February 11th - March 13Gemini / Mithuna Air June 13th - Inches / Misha Earth May 12th - June 13th Aquarius / Wisha Earth May 12th - Inches / Misha Earth May 12th - April 12th - May Capricorn / Makar Earth January 12th - Inches / Misha Earth May 12th - Inches / Misha Earth May 12th - Inches / Misha Earth May 12th - April 12th - May Capricorn / Makar Earth January 12th - Inches / Misha Earth May 12th - Inches July 14th / Mena Water March 13th - 12th April Cancer / Kark Water July 14th - August 15th Leo / Simha Fire August 15th Leo / Simha Fire August 15th Leo / Simha Fire August 15th - October 15th Libra / Tula Air October 15th - November 14th Scorpio / Vrischika Water November 14th - December 14th Up, Now you know why you may not be a sign you think you are, and how a little wobble can make a world of difference in your life and in determining your sun sign! To find out what is confirmed is your birthday is located on the border of two signs, Theology World recommends you have your birth chart based on your exact date, time and place of birth. It wasn't really in astrology, probably because all my life I thought I was a scorpion and I didn't really identify with other scorpion properties and then the part of the sexuality that they are famous for, but I mean who's not sexual? Anyway, a friend of mine referred me to Dana, the Vidy Mine. One of the first things I mentioned was that I was actually the balance. What?! All right. It turns out that Western astrology is a little off on the dates of their sun sign. Western astrology has been using the same start date on Spring Equinox with Aries on March 21 since Rome fell and now off 24 days. In vedic astrology sun dates begin one day later every 72 years due to the earth oscillated through the polar axis parade. I'm not really sure what that means, but I think it makes sense that the position of the planets changes all the time and real sun dates: Aries: April 15 - May 14 Taurus: May 15 - June 14 Gemini: June 15 - July 14 Cancer: July 15 - August 16 -September 15 Virgin Tower: September 16 - October 16 October 16 October 17 - November 17 - November 14 Scorpio: November 15 - December 16 - January 14 - 14 February : February 14 - 14 March Pisces March 15 - April 15 furthermore, what learned that your own sun mark only the 3rd mark is more important and are the features that you get from your father. Your moon is the most important 2nd as it's more active, which is what you get from your mother. Your moon is the most important mark for you. To find your signs you need to know when you were born and where you were born as everything is measured by your first breath. When you log on to this human world there is a special area of vibration and energy that happens and that's what everything is based on. Navedic astrology, also referred to as Hinduism, Oriental, or Joytish (Inner Light) Astrology has the only and most ancient text written on astrology. When we think of Western astrology we think of the Greeks and Romans, but the Greeks and Romans, and they miss thousands of years of interaction. When Rome fell it lost a lot of knowledge and it was the East who kept the knowledge together because it was a continuous civilization. They were sky watchers and got their knowledge through the inner light as they were enlightened people. I feel that Vedic astrology is astronomically scientific, not only composed, but you can take it or leave it. My reading I was very surprised by reading and without going into a lot of detail here are some of the things I discovered. My sun sign is the scale, my moon is a gemini sign, and my height sign is taurus. Currently Approaching the end of Jupiter, a period of 16 years, generally happy going lucky mood. In general you become wiser and more spiritual in Jupiter as you begin to ask the biggest questions in life. More specifically I am in Jupiter-Rahu which puts me in limbo. I don't feel social and my career is not very clear right now. Quito is currently crossing my career home and my home from the public, which means for me that my work and my social life is basically non-exsistent, but change is coming. Soon I will be entering Saturn, which is more adult and more working, but also fulfilling and rewarding. It's a 19-year period and it has a lot to do with karma and dharma (your purpose in life). I'm a bit nervous about it, but my career will become clear and stable and it's a very mature period, but I'll always be fun and youthful because of my Gemini Moon signature. She said that now I can't impose a career if I try and enjoy my time too, she said that more celebrities have Libra as their sun sign, and that I will make a great actor or influencer. She said blogging is a great way for me and That I would be great at informing people about good things. There are a lot of astrologers with decades of family experience that may be more insightful, but Dana is truly amazing and has allowed me to share her information on her blog. She was really leading a spiritual path and I trust her, your first reading will be about 1.5 hours long and only \$90! It's worth it (please find out her rates may change). She will send you some recordings, reading materials, and your call. I highly recommend that you listen to the recordings before your call so you can enter into your call with all the questions you want to ask (I wasn't ready for that on my first call). You can ask her anything! Also, you can get a recording of your conversation and listen to it is really, really helpful. Here's her contact information, and email her to set up something. Dayna Norris, spiritual advisor, vedic astrology and can't wait to learn more. I also plan to go to India as soon as that basically all your spiritual practices are derived from. You can leave the questions and comments below and although I may not be able to answer them I think Dana Norris explaining the Dasha system, which is based on the ideal life span of 120 years. It can be generated at any time during dasha. Vedic astrology System *DASHA: 120 years with each planet as president *ANTARDAHSA: Every planet orbits vice presidency under the presidency under the president Dasha (presidential) conditions in the solar system 6 years moon 10 years Mars 7 years RAHU 18 years Jupiter 16 years Saturn 19 years Mercury 17 years KETU 7 years Venus 20 years example of Antradcha (Vice President): In 6 years of sun: 10 months, 18 days the moon is cum: 3 months, 18 days the moon is cum: 1 months, 12 days MERCURY is cum: 10 months, 6 days KETU is: 4 months, 6 days Venus is cum: 1 year example of PRYANTARDASHAS (assistant: 9 days of one in the sun presidency: the sun is an assistant: 9 days Mars is an assistant: 7 days RAHU is an assistant: 16 days Jupiter is an assistant: 15 days Saturn Assistant: 17 days MERCURY is assistant: 16 days KETU is an assistant: 7 days Venus is an assistant: 18 days photos were taken in my house during Supermoon by my CC girl using the camera. Camera.
