

# Instant underwriting decisions with no underwriters

## SimpliNow Legacy<sup>®</sup>

Simplified Issue  
Whole Life Insurance

### Underwriting Guide

## SimpliNow Legacy

SimpliNow Legacy, our simplified issue whole life product, features an electronic application process that offers instant underwriting decisions so you can maximize your time and convert as many leads as possible! Now you can complete the entire application process in minutes instead of weeks.

SimpliNow Legacy is good for your business: instant underwriting decisions gives you the ability to sell multiple policies in one day. Plus take advantage of the [SimpliNow Quoter](#), where you can quickly quote your client's SimpliNow Legacy premium or solve for their death benefit based on a specified premium.

### **About the Policy**

The SimpliNow Legacy simplified issue, whole life final expense life insurance policy is an instant decision product for middle market individuals between the ages of 50 and 80. It is designed to protect their surviving loved ones from financial burdens that may result from unpaid medical bills, credit card balances, or outstanding loans.

## Two Death Benefit Designs<sup>2</sup>

	Level death benefit	Graded death benefit
<b>Product</b>	SimpliNow Legacy Max	SimpliNow Legacy
<b>Fee</b>	Annual policy fee \$36	Annual policy fee \$12
<b>Benefit</b>	The policy pays the full amount in all years.	If the insured dies within the first two years, the paid death benefit will equal 110% of premiums paid. After two years, the death benefit will equal the policy face amount.

<sup>1</sup> Final decision is subject to underwriting and the list is subject to change. Combinations of medical conditions listed above could result in worse than listed decisions.

<sup>2</sup> All benefits paid less any outstanding loan balance and any unpaid premium.

## Prescription medications that impact the death benefit

This list is intended to provide you with prescriptions and criteria that would result in a “Decline”.

We realize there are additional medications that may come up in client conversations – so this list is not comprehensive. There are also many variables and co-morbidities that could impact this list.

BRAND NAME	GENERIC NAME	CONDITION	DECISION
Plavix Brilinta Effient	Clopidogrel Ticagrelor Prasugrel	CAD, Heart Attack, Stent, Angioplasty, CABG with Diabetes or Tobacco use or Stroke	Decline: MI / CAD surgery very recent or with Stroke or Heart Failure

Marinol	Dronabinol	Serious Antiemetic / Anorexia Treatment	Decline
Ingrezza	Valbenazine	Abnormal Movement Disorder / Dyskinesia	Decline
Tyvaso Remodulin	Treprostinil	Pulmonary Hypertension	Decline
Upravi Ventavis Flolan Vetetr		Pulmonary Hypertension	Decline
Ofev Esbriet	Nintedanib Pirfenidone	Pulmonary Fibrosis / Interstitial Lung Disease	Decline
Nuplazid	Pimavanserin	Parkinson’s Delusions or Hallucinations	Decline

## Prescription medications that impact the death benefit, cont.

This list is intended to provide you with prescriptions and criteria that would result in a “Decline”.

We realize there are additional medications that may come up in client conversations – so this list is not comprehensive. There are also many variables and co-morbidities that could impact this list.

BRAND NAME	GENERIC NAME	CONDITION	DECISION
Aricept Namenda Razadyne Exelon	Donepezil Memantine Galantamine Rivastigmine	Memory Loss / Dementia	Decline
Suboxone	Buprenorphine / Naloxone	Pain or Narcotic Dependence	Decline
Duragesic/ Actiq Butrans MS Contin / Kadian Methadose/ Dolophine	Fentanyl Buprenorphine Morphine Methadone	Pain, possible Opioid Dependence	Decline
Antabuse Campral	Disulfiram Acamprosate	Alcohol Abuse or Dependence	Decline
Vivitrol	High dose Naltrexone	Narcotic Blocker or Alcohol Abuse	Decline
Drugs such as Lupron or Depoprovera in males for Prostate Cancer			Decline
Drugs used for Low Blood Counts such as Epogen, Neupogen, Promacta			Decline
Drugs used for Cachexia like Megestrol			Decline
Drugs used to treat complications of Chronic Kidney Disease like Calcitriol, Sevelamer, Renvela, Zemplar			Decline
Long term daily potent opioids (for example frequent high dose Percocet, Oxycontin, Oxycodone)			Decline
Multiple medications/medical conditions for example: Diabetes on Metformin and Jardiance, Depression on high dose Abilify, Lamictal, and Celexa, Cerebrovascular Disease and Peripheral Arterial Disease on Aspirin and Plental			Decline

This list does not include many Cancer drugs that frequently will result in a decline. Some medications listed in this table if not being used currently or recently, or not specifically prescribed for the associated condition(s) or as noted in decision caveats, may not cause an automatic decline. And some medications in combination with other conditions and medications, not included in the table, could result in a decline.

The SimpliNow Legacy product is not available to proposed insureds, owners and/or payors who are Foreign Nationals, or non-resident aliens actively living in the United States (or at least claiming to). Anyone other than a U.S. citizen or green card holder is not eligible for the product.
