College essays offer an invaluable opportunity for students to dazzle admissions committees with their thoughtfulness and ability to communicate. So, it's no surprise that experts call the essay-writing process one of the most stressful parts of applying to schools. After all, you have just a few hundred words to make a good impression. While any college essay prompt can arouse anxiety, the Overcoming Challenges essay topic is often cause for particular concern. Those students who've been lucky enough not to experience trauma tend to assume they have nothing worth saying. On the other hand, students who've overcome larger obstacles may be hesitant to talk about them. Regardless of your particular circumstances, there are steps you can take to make the essay writing process simpler. Here are our top tips for writing the Overcoming Challenges essay successfully. What is the "Overcoming Challenges" Essay? The Overcoming Challenges prompt shows up frequently in both main application essays (like the Common App) and supplemental essays. Your main application essay, or personal statement, goes to all the schools you apply to. Supplemental essays are school-specific and are only seen by the college that requests it. Because supplemental essays allow students to provide schools with additional information, applicants should be sure that the subject matter they choose to write about differs from what's in their main essay. Students often assume the Overcoming Challenges essay requires them to detail past traumas. While you can certainly write about an experience that's had a profound effect on your life, it's important to remember that colleges aren't evaluating students based on the seriousness of the obstacle they overcame. On the contrary, the goal of this essay is to show admissions officers that you have the intelligence and fortitude to handle any challenges that come your way. After all, college serves as an introduction to adult life, and schools want to know that the students they admit are up to the task. Sample Prompts of "Overcoming Challenges" Essays To help you understand what the Overcoming Challenges essay looks like, here are a couple sample prompts. Currently, the Common Application asks students to answer the following prompt in 650 words or less: "The lessons we take from obstacles we encounter can be fundamental to later success. Recount a time when you faced a challenge, setback, or failure. How did it affect you, and what did you learn from the experience?" See a real essay sample for this Common App prompt. For the 2019-2020 school year, MIT prompted students to write 200 to 250 words on the following: "Tell us about the most significant challenge you've faced or something important that didn't go according to plan. How did you manage the situation?" How to Choose a Topic for an Essay on Overcoming Challenges When it comes to finding the best topic for your Overcoming Challenges essay, there's no right answer. The word "challenge" is ambiguous and could be used to reference a wide range of situations from prevailing over a bully to getting over your lifelong stage fright to appear in a school musical. Here are some suggestions to keep in mind when selecting an essay subject. 1. Avoid Trivial or Common Topics While there aren't many hard-and-fast rules for choosing an essay topic, students should avoid topics considered commonplace or banal. Experiences like struggling to pass a class or winning a tough soccer game are typical enough that admissions officers have likely read numerous essays on the subject. Similarly, students may not want to write about an obstacle that adcoms could perceive as low stakes, such as getting into a quickly-resolved fight with your friend. If you choose a challenge that is a bit more everyday, it should be a tool to explain a larger aspect of your life and personality. 2. Pick Challenges That Demonstrate Qualities You Want to Highlight While your challenge shouldn't be trivial, it also doesn't need to be life-shattering. Students often mistakenly assume they need to have experienced life-shattering circumstances like poverty, an abusive parent, or cancer to write a good essay. The truth is that the best topics will allow you to highlight specific personal qualities and share more about who you are. The essay should be less about the challenge itself, and more about how you responded to it. Ask yourself what personality traits you want to emphasize, and see what's missing in your application. Maybe you want to highlight your adaptability, for example, but that isn't clearly expressed in your application. In this case, you might write about a challenge that put your adaptability to the test, or shaped you to become more adaptable. Is Your "Overcoming Challenges" Essay Strong Enough? Essays account for around 25% of your admissions decision, as they're your chance to humanize your application and set yourself apart from other applicants with strong profiles. The "Overcoming Challenges" essay can be especially, well, challenging, as you want to strike a balance between explaining the challenge, and showing how you grew from it. It's important to avoid writing in a tone that may come off as gloomy or whiny. You should always get a second set of eyes on your college essays, but it's especially important for this prompt in particular. To understand if your essay accurately depicts your personal growth, we recommend using our Peer Essay Review tool, where you can get a free review of your essay from another student. You can also improve your own writing skills by reviewing other students' essays. This tool will make it easier to understand your essay's strengths and weaknesses, and help you make your writing even more compelling. Tips for Writing an Essay About Overcoming Challenges Once you've selected a topic for your essays, it's time to sit down and write. For best results, make sure your essay focuses on your efforts to tackle an obstacle rather than the problem itself. Additionally, you should avoid essay writing pitfalls by doing the following: 1. Choose an Original Essay Structure If you want your Overcoming Challenges essay to attract attention, aim to break away from more traditional structures. Most of these essays start by describing an unsuccessful attempt at a goal and then explain the steps the writer took to master the challenge. You can stand out by choosing a challenge you're still working on overcoming, or focus on a mental or emotional challenge that spans multiple activities or events. For example, you might discuss your fear of public speaking and how that impacted your ability to coach your brother's Little League team and run for Student Council. You can also choose a challenge that can be narrated in the moment, such as being put on the spot to teach a yoga class. These challenges can make particularly engaging essays, as you get to experience the writer's thoughts and emotions as they unfold. 2. Focus on the Internal When writing about past experiences, you may be tempted to spend too much time describing specific people and events. With an Overcoming Challenges essay though, the goal is to focus on your thoughts and feelings. Rather than detail all the steps you took to become a better public speaker, use the majority of your essay to describe your mental state as you embarked on the journey to achieving your goals. Were you excited, scared, anxious, or hopeful? Don't be afraid to let the reader in on your innermost emotions and thoughts during this process. 3. Share What You Learned An Overcoming Challenges essay should leave the reader with a clear understanding of what you learned on your journey, be it physical, mental, or emotional. There's no need to explicitly say "this experience taught me X," but your essay should at least implicitly share any lessons you learned. This can be done through your actions and in-the-moment reflections. Remember that the goal is to show adcoms why your experiences make you a great candidate for admission. Overcoming Challenges Essay Sample Here's an example of a strong essay response: Fire! Was I no longer the beloved daughter of nature, whisperer of trees? Knee-high rubber boots, camouflage, bug spray—I wore the garb and perfume of a proud wild woman, yet there I was, hunched over the pathetic pile of stubborn sticks, utterly stumped, on the verge of tears. As a child, I had considered myself a kind of rustic princess, a cradler of spiders and centipedes, who was serenaded by mourning doves and chickadees, who could glide through tick-infested meadows and emerge Lyme-free. I knew the cracks of the earth like the scars on my own rough palms. Yet here I was, ten years later, incapable of performing the most fundamental outdoor task: I could not, for the life of me, start a fire. Furiously I rubbed the twigs together—rubbed and rubbed until shreds of skin flaked from my fingers. No smoke. The twigs were too young, too sticky-green; I tossed them away with a shower of curses, and began tearing through the underbrush in search of a more flammable collection. My efforts were fruitless. Livid, I bit a rejected twig, determined to prove that the forest had spurned me, offering only young, wet bones that would never burn. But the wood cracked like carrots between my teeth—old, brittle, and bitter. Roaring and nursing my aching palms, I retreated to the tent, where I sulked and awaited the jeers of my family. Rattling their empty worn cans and reeking of fat fish, my brother and cousins swaggered into the campsite. Immediately, they noticed the minor stick massacre by the fire pit and called to me, their deep voices already sharp with contempt. "Where's the fire, Princess Clara?" they taunted. "Having some trouble?" They prodded me with the ends of the chewed branches and, with a few effortless scrapes of wood on rock, sparked a red and roaring flame. My face burned long after I left the fire pit. The camp stank of salmon and shame. In the tent, I pondered my failure. Was I so daftny? Was I that incapable? I thought of my hands, how calloused and capable they had been, how tender and smooth they had become. It had been years since I'd kneaded mud between my fingers; instead of scaling a white pine, I'd practiced scales on my piano, my hands softening into those of a musician—fleshy and sensitive. And I'd gotten glasses, having grown horrifically nearsighted; long nights of dim lighting and thick books had done this. I couldn't remember the last time I had lain down on a hill, barefaced, and seen the stars without having to squint. Crawling along the edge of the tent, a spider confirmed my transformation—he disgusted me, and I felt an overwhelming urge to squash him. Yet, I realized I hadn't really changed—I had only shifted perspective. I still eagerly explored new worlds, but through poems and prose rather than pastures and paddles. I'd grown to prefer the boom of a bass over that of a bullfrog, learned to coax a different kind of fire from wood, having developed a burn for writing rhymes and scrawling hypotheses. That night, I stayed up late with my journal and wrote about the spider I had decided not to kill. I had tolerated him just barely, only shrieking when he jumped—it helped to watch him decorate the corners of the tent with his delicate webs, knowing that he couldn't start fires, either. When the night grew cold and the embers died, my words still smoked—my hands burned from all that scrawling—and even when I fell asleep, the ideas kept sparking—I was on fire, always on fire. This essay is an excellent example because the writer turns an everyday challenge—starting a fire—into an exploration of her identity. The writer was once "a kind of rustic princess, a cradler of spiders and centipedes," but has since traded her love of the outdoors for a love a music, writing, and reading. The story begins in media res, or in the middle of the action, allowing readers to feel as if we're there with the writer. One of the essay's biggest strengths is its use of imagery. We can easily visualize the writer's childhood and the present day. For instance, she states that she "rubbed and rubbed [the twigs] until shreds of skin flaked from my fingers." The writing has an extremely literary quality, particularly with its wordplay. The writer reappropriates words and meanings, and even appeals to the senses: "My face burned long after I left the fire pit. The camp stank of salmon and shame." She later uses a parallelism to cleverly juxtapose her changed interests: "instead of scaling a white pine, I'd practiced scales on my piano." One of the essay's main areas of improvement is its overemphasis on the "story" and lack of emphasis on the reflection. The second to last paragraph about changing perspective is crucial to the essay, as it ties the anecdote to larger lessons in the writer's life. She states that she hasn't changed, but has only shifted perspective. Yet, we don't get a good sense of where this reflection comes from and how it impacts her life going forward. The end of the essay offers a satisfying return to the fire imagery, and highlights the writer's passion—the one thing that has remained constant in her life.

College essays offer an invaluable opportunity for students to dazzle admissions committees with their thoughtfulness and ability to communicate. So, it's no surprise that experts call the essay-writing process one of the most stressful parts of applying to schools. After all, you have just a few hundred words to make a good impression. While any college essay prompt can arouse anxiety, the Overcoming Challenges essay topic is often cause for particular concern. Those students who've been lucky enough not to experience trauma tend to assume they have nothing worth saying. On the other hand, students who've overcome larger obstacles may be hesitant to talk about them. Regardless of your particular circumstances, there are steps you can take to make the essay writing process simpler. Here are our top tips for writing the Overcoming Challenges essay successfully. What is the "Overcoming Challenges" Essay? The Overcoming Challenges prompt shows up frequently in both main application essays (like the Common App) and supplemental essays. Your main application essay, or personal statement, goes to all the schools you apply to. Supplemental essays are school-specific and are only seen by the college that requests it. Because supplemental essays allow students to provide schools with additional information, applicants should be sure that the subject matter they choose to write about differs from what's in their main essay. Students often assume the Overcoming Challenges essay requires them to detail past traumas. While you can certainly write about an experience that's had a profound effect on your life, it's important to remember that colleges aren't evaluating students based on the seriousness of the obstacle they overcame. On the contrary, the goal of this essay is to show admissions officers that you have the intelligence and fortitude to handle any challenges that come your way. After all, college serves as an introduction to adult life, and schools want to know that the students they admit are up to the task. Sample Prompts of "Overcoming Challenges" Essays To help you understand what the Overcoming Challenges essay looks like, here are a couple sample prompts. Currently, the Common Application asks students to answer the following prompt in 650 words or less: "The lessons we take from obstacles we encounter can be fundamental to later success. Recount a time when you faced a challenge, setback, or failure. How did it affect you, and what did you learn from the experience?" See a real essay sample for this Common App prompt. For the 2019-2020 school year, MIT prompted students to write 200 to 250 words on the following: "Tell us about the most significant challenge you've faced or something important that didn't go according to plan. How did you manage the situation?" How to Choose a Topic for an Essay on Overcoming Challenges When it comes to finding the best topic for your Overcoming Challenges essay, there's no right answer. The word "challenge" is ambiguous and could be used to reference a wide range of situations from prevailing over a bully to getting over your lifelong stage fright to appear in a school musical. Here are some suggestions to keep in mind when selecting an essay subject. 1. Avoid Trivial or Common Topics While there aren't many hard-and-fast rules for choosing an essay topic, students should avoid topics considered commonplace or banal. Experiences like struggling to pass a class or winning a tough soccer game are typical enough that admissions officers have likely read numerous essays on the subject. Similarly, students may not want to write about an obstacle that adcoms could perceive as low stakes, such as getting into a quickly-resolved fight with your friend. If you choose a challenge that is a bit more everyday, it should be a tool to explain a larger aspect of your life and personality. 2. Pick Challenges That Demonstrate Qualities You Want to Highlight While your challenge shouldn't be trivial, it also doesn't need to be life-shattering. Students often mistakenly assume they need to have experienced life-shattering circumstances like poverty, an abusive parent, or cancer to write a good essay. The truth is that the best topics will allow you to highlight specific personal qualities and share more about who you are. The essay should be less about the challenge itself, and more about how you responded to it. Ask yourself what personality traits you want to emphasize, and see what's missing in your application. Maybe you want to highlight your adaptability, for example, but that isn't clearly expressed in your application. In this case, you might write about a challenge that put your adaptability to the test, or shaped you to become more adaptable. Is Your "Overcoming Challenges" Essay Strong Enough? Essays account for around 25% of your admissions decision, as they're your chance to humanize your application and set yourself apart from other applicants with strong profiles. The "Overcoming Challenges" essay can be especially, well, challenging, as you want to strike a balance between explaining the challenge, and showing how you grew from it. It's important to avoid writing in a tone that may come off as gloomy or whiny. You should always get a second set of eyes on your college essays, but it's especially important for this prompt in particular. To understand if your essay accurately depicts your personal growth, we recommend using our Peer Essay Review tool, where you can get a free review of your essay from another student. You can also improve your own writing skills by reviewing other students' essays. This tool will make it easier to understand your essay's strengths and weaknesses, and help you make your writing even more compelling. Tips for Writing an Essay About Overcoming Challenges Once you've selected a topic for your essays, it's time to sit down and write. For best results, make sure your essay focuses on your efforts to tackle an obstacle rather than the problem itself. Additionally, you should avoid essay writing pitfalls by doing the following: 1. Choose an Original Essay Structure If you want your Overcoming Challenges essay to attract attention, aim to break away from more traditional structures. Most of these essays start by describing an unsuccessful attempt at a goal and then explain the steps the writer took to master the challenge. You can stand out by choosing a challenge you're still working on overcoming, or focus on a mental or emotional challenge that spans multiple activities or events. For example, you might discuss your fear of public speaking and how that impacted your ability to coach your brother's Little League team and run for Student Council. You can also choose a challenge that can be narrated in the moment, such as being put on the spot to teach a yoga class. These challenges can make particularly engaging essays, as you get to experience the writer's thoughts and emotions as they unfold. 2. Focus on the Internal When writing about past experiences, you may be tempted to spend too much time describing specific people and events. With an Overcoming Challenges essay though, the goal is to focus on your thoughts and feelings. Rather than detail all the steps you took to become a better public speaker, use the majority of your essay to describe your mental state as you embarked on the journey to achieving your goals. Were you excited, scared, anxious, or hopeful? Don't be afraid to let the reader in on your innermost emotions and thoughts during this process. 3. Share What You Learned An Overcoming Challenges essay should leave the reader with a clear understanding of what you learned on your journey, be it physical, mental, or emotional. There's no need to explicitly say "this experience taught me X," but your essay should at least implicitly share any lessons you learned. This can be done through your actions and in-the-moment reflections. Remember that the goal is to show adcoms why your experiences make you a great candidate for admission. Overcoming Challenges Essay Sample Here's an example of a strong essay response: Fire! Was I no longer the beloved daughter of nature, whisperer of trees? Knee-high rubber boots, camouflage, bug spray—I wore the garb and perfume of a proud wild woman, yet there I was, hunched over the pathetic pile of stubborn sticks, utterly stumped, on the verge of tears. As a child, I had considered myself a kind of rustic princess, a cradler of spiders and centipedes, who was serenaded by mourning doves and chickadees, who could glide through tick-infested meadows and emerge Lyme-free. I knew the cracks of the earth like the scars on my own rough palms. Yet here I was, ten years later, incapable of performing the most fundamental outdoor task: I could not, for the life of me, start a fire. Furiously I rubbed the twigs together—rubbed and rubbed until shreds of skin flaked from my fingers. No smoke. The twigs were too young, too sticky-green; I tossed them away with a shower of curses, and began tearing through the underbrush in search of a more flammable collection. My efforts were fruitless. Livid, I bit a rejected twig, determined to prove that the forest had spurned me, offering only young, wet bones that would never burn. But the wood cracked like carrots between my teeth—old, brittle, and bitter. Roaring and nursing my aching palms, I retreated to the tent, where I sulked and awaited the jeers of my family. Rattling their empty worn cans and reeking of fat fish, my brother and cousins swaggered into the campsite. Immediately, they noticed the minor stick massacre by the fire pit and called to me, their deep voices already sharp with contempt. "Where's the fire, Princess Clara?" they taunted. "Having some trouble?" They prodded me with the ends of the chewed branches and, with a few effortless scrapes of wood on rock, sparked a red and roaring flame. My face burned long after I left the fire pit. The camp stank of salmon and shame. In the tent, I pondered my failure. Was I so daftny? Was I that incapable? I thought of my hands, how calloused and capable they had been, how tender and smooth they had become. It had been years since I'd kneaded mud between my fingers; instead of scaling a white pine, I'd practiced scales on my piano, my hands softening into those of a musician—fleshy and sensitive. And I'd gotten glasses, having grown horrifically nearsighted; long nights of dim lighting and thick books had done this. I couldn't remember the last time I had lain down on a hill, barefaced, and seen the stars without having to squint. Crawling along the edge of the tent, a spider confirmed my transformation—he disgusted me, and I felt an overwhelming urge to squash him. Yet, I realized I hadn't really changed—I had only shifted perspective. I still eagerly explored new worlds, but through poems and prose rather than pastures and paddles. I'd grown to prefer the boom of a bass over that of a bullfrog, learned to coax a different kind of fire from wood, having developed a burn for writing rhymes and scrawling hypotheses. That night, I stayed up late with my journal and wrote about the spider I had decided not to kill. I had tolerated him just barely, only shrieking when he jumped—it helped to watch him decorate the corners of the tent with his delicate webs, knowing that he couldn't start fires, either. When the night grew cold and the embers died, my words still smoked—my hands burned from all that scrawling—and even when I fell asleep, the ideas kept sparking—I was on fire, always on fire. This essay is an excellent example because the writer turns an everyday challenge—starting a fire—into an exploration of her identity. The writer was once "a kind of rustic princess, a cradler of spiders and centipedes," but has since traded her love of the outdoors for a love a music, writing, and reading. The story begins in media res, or in the middle of the action, allowing readers to feel as if we're there with the writer. One of the essay's biggest strengths is its use of imagery. We can easily visualize the writer's childhood and the present day. For instance, she states that she "rubbed and rubbed [the twigs] until shreds of skin flaked from my fingers." The writing has an extremely literary quality, particularly with its wordplay. The writer reappropriates words and meanings, and even appeals to the senses: "My face burned long after I left the fire pit. The camp stank of salmon and shame." She later uses a parallelism to cleverly juxtapose her changed interests: "instead of scaling a white pine, I'd practiced scales on my piano." One of the essay's main areas of improvement is its overemphasis on the "story" and lack of emphasis on the reflection. The second to last paragraph about changing perspective is crucial to the essay, as it ties the anecdote to larger lessons in the writer's life. She states that she hasn't changed, but has only shifted perspective. Yet, we don't get a good sense of where this reflection comes from and how it impacts her life going forward. The end of the essay offers a satisfying return to the fire imagery, and highlights the writer's passion—the one thing that has remained constant in her life.
