This is a honey update is not for nothing that it was so called, but because ©? We'll find out with you below. To begin, everything about the new update is for the bees, the bees themselves to the blocks. Of course, many players could already see something like that was created and implemented by the players in the game as an additional component, consistency or in general. What's new in Minecraft Update 1.14.0 Bedrock? Developers came up a lot in this update Seriously, I have demonstrated the functionality that was implemented in the game. New mechanical and generally all innovations will be a new stage in the development of Minecraft.Lo take a look more closely at the behavior of these insects with you: A € ~ "The new insects are quite harmless to the players, but Be aggressive if the player starts to beat them or show any aggression; A € á ~ "Everyone knows that after a bite, a bee dies because © into the body of the person at the tip leaves its sting. It will be even in the game after a bee stings you, will die. After death, no nothing will fall; A € ~ "The player can find these insects in green areas, wherever there are flowers, and especially not in rainy weather; A € á ~" Thanks to the bees, the current crop of players will become better; A € ~ "At night, the bees do not do anything, and go to bed at the rain; - If this insect does not find a free nest, will fly as long as © does not find his place and his new home. The next thing I'll talk us is a home for bees, ie a hive or nest. in the new Minecraft for Android 1.14.0 update, the developers have added new blocks and added new mechanics to the articles. Let's take a closer look at what it has been A € á ~ "The new insects live only in hot biomi, everywhere can find flowers; A € á ~" every nest or hive has its specific level of fullness. The maximum level is 5. Whenever a bee carries more honey to the hive, the level of honey increases; A € á ~ "The player has the opportunity to use new new ones to build a hive for bees; When you use scissors, you can get a honeycomb. But the honey filling level in the hive must be at most, one if a player wants to get honey, all he has to do is simply to use the empty bottle that developers added; The player can calm the bees, everything he needs for this is the smoke of a fire; The developers a dispenser have expanded, so now players can fill the bottles with liquids, such as honey or water, a new honey blocks have been added to the update; A € New blocks Honey can slow down the player during movement, or during jump, a height of the jump is half Less.as in all previous versions, developers have set a large number of bugs and defects, like Pure as a whole solve in the game. We look at the new correction in Minecraft version 1.14.0 below: A , the quantity of XP that a player can put out the animals was reduced; fixed algae growth, a correct display of the wraps in the menu for selection skins; Fixed rendering problem, a correct a bug when creating a character in Minecraft for Android: a large number of corrections in creative mode of the Minecraft world, a solved a problem related to shooting from a crossbow, ie an instant blow ; Water still from magic even fixed; a fixed locking error connection; A € From this moment, the ray of fox attack will be the same for the Java version of the game, in other words, the reduced developers who, a fixed horses, now use properly new textures; Fixed view of the quantity of health for the Minecraft world bosses, a view of the safety margin when a player is riding a Mob.Download the new version of Minecraft 1.14.0. And even don't forget that on our site you can find a great quantity of other useful information, as well as additions, mods, textures and much more. Download API Minecraft PE 1.14.1 Buzzy for free on Android: there are a lot of new features, activities and blocks too. The new features of MCPPE 1.14.1 Mojang Studios have released the Buzzy API update by recently, but there is still a lot from FIX and add to the game. Although it might seem like a large update, it is predominantly a lower Bugfix release. However, this means nothing is exceptional here. For example, bees are transformed hostile when their descendants hurts in Minecraft PE 1.14.1. General corrections Mojang Studios have done everything to prevent MCPPE 1.14.1 blocks from the system. A plethora of players reported problems that could cause the game to exit unexpectedly. Furthermore, developers made crowds more reproduce on the leaves and glass as they considered incomplete blocks. Among other things, the results are now finally work correctly. Players could not get trophies and rewards for what they were doing in Minecraft PE 1.14.1. Developers HavenA € t Forgotten Gamea performance s. It is largely linked to the areas with dozens of players there. Overall multiplayer performance has increased as well. Now, skins load the fastest way than they did. Improvements There are some general improvements in the main menu as well. For example, the Character Creator has been optimized MCPPE 1.14.1. Some articles appeared incorrectly during the various sessions. The game may crash when you try to scroll your skin sets set. Furthermore, Japanese users have had problems with the interface in their language. Fortunately, this MistakeA € was solved by Mojang Studios. There was also a bug with a bucket of milk. Its content could simply disappear from blank. It turns out that the problem was In the old rendering engine. Fortunately, Mojang Studios renewed in Minecraft PE 1.14.1. The game is currently using render dragon, which has better features. Hopefully, it will free the game from the Gal and Insects. Winter holidays are just a few steps away and everyone wants to relax and have a while during this time. If you do not have the parties to participate and has no relatives to welcome you, we have a better time, the alternative expense for you: explore a long-awaited long-awaited game This is Minecraft 1.14.1. This version brings together the best corrections and changes from Minecraft PE 1.14.1.2 and Minecraft PE 1.14.1.3, making them easier to note in a smooth and stable MCPPE gameplay. All corrections and changes in the aforementioned betas can be explored simultaneously by installing 1.14.1.4. In addition to this, players noted that the game used to collapse more often lately, regardless of the device used. Android did not exceed. The developers carried out an additional job to repair them so apparently, the game will not crash more or this will happen with a lower frequency. The rest of the correction list includes the removal of problems related to the creator of the character and improved game performance for multi-player areas, the online functions and the load speed of the skin. We must also mention the important work done on the removal of multiple problems concerning the user interface, as a burged button A € á ~ á "sign-in", serious errors when they use the Japanese language, and the fact that sometimes i Players were stuck in the screen inventory on the market. The bees were also subject to some behavioral adjustments. Now they die after attacking and get angry if the newborns are attached. And another new feature regarding monsters; they no longer generated On leaves and grass. To learn more about this game version, we suggest you take a look at the video trailer below, after which you can download it and share it with your friends. Soon we will publish an article on the new version Beta, released on the same day with the current one, but in the meantime, you can control our website for maps, textures and mod Maps. Have fun! Beta 1.14.0.2 is the second Beta version for Bedrock Edition 1.14.0, published October 15, 2019, [1] which corrects insects. Changes [] Blocks [] Honey Blocks The honeycomb blocks are now made with 4 honeycomb instead of 9. The slime blocks change the plot to match Java Edition. General [] menu screen The title screen The background was changed again to look exactly as it does on Java Edition. The patrols can no longer spawn in Nether and end. (MCPE-51481) corrections [] the anomalous arrests fixed several anomalous stops that may occur during the gameplay. Fixed an accident that could occur when breaking a table from crafting. Fixed an accident that could sometimes be activated by some honey locking states. Fixed an accident that may sometimes happen after pressing any button during the chat user interface closing animation. The performance ui structures are now loaded rapidly when they join and leaving a world. The general API nests are now generated in more types of tree, as they do in the Java edition. Fixed a bug that could cause some models that appear incorrectly in the creator of the characters. Various changes and corrections to the creator of the characters. Fixed a problem that sometimes causes the background of the upload screen does not show correctly when you join a divided screen multiplayer game. Fixed a navigation problem that could cause an incorrect focus change when choosing an option from the Pause menu. Fixed a problem that was causing the elements worn for the transfer between the character creator models unexpectedly. Gameplay Breaking A hive while in creative mode will no longer drop the block as an object. Honeycomb block now uses the sound of the stone block rather than the sound of the slime block. (MCPE-53577) The green particles are now shown when the crops are polled by the bees. Mob behavior when the jump on the blocks Honey is now more consistent for all mobs. Solved a problem that can sometimes cause touch screen controls to become inverted. (MCPE-50256) Pick Block now works properly to bees. (MCPE-53445) Fixed bobbing animation of the object held when moving at first sight. (MCPE-51212) MOBS has reduced the time that the APIs lead to seeking a new hive when a beehive is full. The APIs do not try to find the way home if they end up in the lower size or end. The APIs can now be tempted and fed with two-high flowers. The API will now attack if a player collects honey from the night hive. Fixed a bug bug He was causing the bees of not getting angry when their hive was collected. The bees now run away from the hive when it is flamed. (MPCE-53609) has changed priorities return home so that bees are more eager to go home when it's raining. The bees do not cling more within the honey blocks when they fly next to them. The APIs now range only in blockers the player can pass through (instead of being blocked inside the leaves, for example). The APIs are now able to collect the nectar from flowers that have been placed in the Nether. The bees now passes properly over the flowers, instead of them next to them. If the hive of an ape house is blocked, it will no longer pass outside the hive. Solved a problem that sometimes has been preventing bees to enter the hives that are not full. The baby cylinders now hold their swords in their hands, rather than around the neck. (MCPE-53454) Articles Dragon heads now appear at the correct height. (MCPE-53129) Graphics fixes a bug that sometimes causing the castle to become invisible. (MCPE-52790) Essence elements no longer make it mistakenly in front of the vignette of pumpkin worm. The breaking animation of the block will show again if a block is under water when the player is above. The player's hand no longer disappears when he swells with Elytra. (MCPE-53092) User interface has solved a problem that could cause a certain trembling user interface when you browse through the character creator. Add-ons and script engine solved a problem with the geometry of the entity that was causing some custom MOB models to break. Solved a problem with a particle foals cutting board that was causing to appear to the wrong direction. Fixing for the redemption element in hand the rendered elements when the MOB scale is 1.0. Solved a problem with pivot points for custom geometry cube models. References [] Warning: Sort button Default "BedRock Edition Beta 1.14.0.02" replaces the previous default order key "Beta 1.14.0.2". 1.14.0.2".
