

## Apps for Independent Living

	<p>Description: Pill Prompter is a simple tool to gently reminds you to take your medicine each day. If you choose to snooze the alert, it will remind you again later based on your adjustable snooze length. When you get a Prompt, simply open up the app and click the pill button to mark it as taken. If needed, you can check an earlier day in the week to assure yourself that you indeed remembered. If you happen to miss a pill, the next time you open the app, it will remind you that you've missed one and show it on the weekly calendar as missed. This way you can always keep track.</p> <p>Features: Choose Your Alert You can choose from a variety of reminders ranging from an alarm sound to a dinosaur sound! Discreet Icon Pill Prompter was designed to be discreet about it's job in order to draw the least amount attention to itself. Consistent The countdown timer makes sure you always take your prescription at the same time. Adjustable Change the alarm time based on your needs and the snooze length to your preference.</p>
Pill Prompter Classic	<p>How it can help students with autism: Helps students become more independent in taking medications. Gives reminders and also tracks if the pill has been taken so you can look back to make sure pills have been taken.</p>

Description: i Get... Cooking Vocabulary and Create Recipe Photo Sequence Books is an application providing photo books for individuals that need support in understanding things relative to the kitchen, including cooking and making recipes.

The vocabulary photo books included are; "Cooking Supplies", "Cooking Actions" and "Kitchen Appliances" which offer endless teaching opportunities for speech and language development. In addition, a sample recipe book portrays the steps of making a peanut butter and jelly sandwich. A blank recipe book is included to create your own recipes. All pages have titles with the flexibility to add your own subtitles. In addition, all photos can be individualized for each picture allowing the app to be used for a variety of purposes, including receptive identification and expressive labeling. Personal photos can be added by the user with a camera ready Apple device or imported from the user's photo album. Record your own sound for each page on the Page Options screen.

iGet...Cooking  
Vocabulary

How it can help students with autism: Can become more independent in cooking with visual prompts of recipes and step-by-step instructions. Allows for addition of your own recipes to be added along with pictures to make it more personal.

Description: PicList is a powerful, useful and simple to use to do management application with all the features you would expect to find like reminders, sorting, password protection and color coding tasks. But it also has the unique ability to instantly turn anything into a list without having to type it into your phone.

Spend your time doing it, not typing it.

That's right, you can turn virtually anything into a list. Take a screenshot of a new recipe to instantly turn it into a shopping list. Text messages, scribbled notes, a phone number on a napkin or a sticky note can all instantly be added to your list in a snap. Add as many pictures as you want! And if you just want to add a quick task or create a task list without any pictures, you still have all the power and features of a traditional to do list right there.

This one of a kind To Do Manager was designed to be powerful and simple at the same time. We have worked very hard to make everything you need just a couple of taps away.

Check Out These Features and also watch a video demo on our website:

✓Take pictures of your lists and cross them off with your finger.

✓Import a photo of anything and instantly turn it into a to do list.

✓Two draw styles:

- Free Draw allows you to freely draw what you want on your list
- Point-to-Point helps you draw strait lines when crossing items off your list.

✓Every picture list can have it's own stroke settings including:

- Size
- Color
- Opacity

· Draw Style

✓Multi View gives you an overview of your whole list and allows you to go directly to any picture.

✓Two views in every list:

· Picture View where you manage your Picture Lists and cross items off with your finger.

· Task View where you can add and complete items in a traditional to do list.

✓Make traditional task lists simply by not adding a picture.

✓Sort your task items.

✓Organize, categorize and prioritize with 10 different color backgrounds for all your tasks.

✓Set alerts with 30 different alert sounds.

✓When an item is due and you need more time, easily add an Hour, Day or Week without even going to the task.

✓You decide what you want to do when a task item is done. Delete it, move it to the bottom or just leave it where it is.

✓Set application wide defaults so every list is set up the way you want from the start.

✓Password protection.

PicList to Do Manager	How it can help students with autism: Can create all types of lists. Lists can be color coded for easy identification. Pictures can also be used as visual prompts of the reminders.

	<p>Description: Endeavor 3 is the only research-based scheduling system available that contains specially-designed features for individuals with cognitive disabilities. The software enables people to become truly independent, self-paced and self-directed. With Endeavor 3, you have in your hands a powerful tool for acquiring and reinforcing skills necessary for achieving independence across life activity domains including education, employment, independent living, recreation, and transition. Endeavor 3 can also be used in conjunction with our Visual Impact 3 prompting App. With Endeavor 3 and Visual Impact 3 on the same iPhone or iPad, time-sensitive reminders can connect to step-by-step instruction without requiring the user to exit or launch apps manually.</p> <p>Endeavor 3 gives you the ability to quickly create time-based reminders, ranging from single events to regular appointments, as well as immediate to-do list audio items. Endeavor 3 is the latest in the family of scheduling Apps from AbleLink Technologies, beginning in 2002 with our handheld prompting App Schedule Assistant. This newest version has been re-written from the ground up to support more robust local notifications, to support email notifications, and to contain full Retina support.</p>
Endeavor 3	How it can help students with autism: Schedule designed specifically for individuals with cognitive disabilities. Audio and visual prompts can be used. The reminders can also be linked to step-by-step instructions to help complete the reminder.

	<p>Description: Speed dial has been around for years, but it is a feature that is missing from the iPhone. Our phones have evolved over the years and so has how we interact with them. OneTap allows you to create "launchers" on your home screen to Phone, SMS, Email, Tweet and FaceTime your contacts!</p> <p>Instead of having to swipe through pages and pages of apps trying to find "Phone" or "Messages" to get in touch with the same person everyday why not just have an icon specifically for them? How about a folder for them so you can quickly get a hold of them through different means? Whatever your setup, OneTap is here to connect you.</p>
OneTap	How it can help students with autism: Puts favorite contacts directly on the main screen instead of having to hit multiple buttons. Allows for pictures to be assigned to contacts for easy identification.
\$ Free	Link to the app: <a href="https://itunes.apple.com/us/app/onetap/id502840938?mt=8">https://itunes.apple.com/us/app/onetap/id502840938?mt=8</a>

	<p>Description: Visual Impact 3 is the only research-based prompting system available that contains specially-designed features for individuals with cognitive disabilities. The software enables people to become truly independent, self-paced and self-directed. With Visual Impact 3, you have in your hands a powerful tool for acquiring and reinforcing skills necessary for achieving independence across life activity domains including education, employment, independent living, recreation, and transition. Visual Impact 3 can also be used in conjunction with our Endeavor 3 scheduling App. With Visual Impact 3 and Endeavor 3 on the same iPhone or iPad, time-sensitive reminders can connect to step-by-step instruction without requiring the user to exit or launch apps manually.</p> <p>Visual Impact 3 gives you the ability to quickly create multimedia task instructional sequences, social stories and visual modeling vignettes for nearly any activity! Visual Impact 3 is the latest in the family of visual modeling Apps from AbleLink Technologies, beginning in 1995 with our handheld prompting App Pocket Coach. This newest version has been re-written from the ground up to support larger instructional libraries, video creation and import capabilities, task duplication, and full Retina support.</p>
Visual Impact 3	How it can help students with autism: Can create visual and audio prompts, social stories, and video modeling to help students with autism work on skills and perform more independently.
\$ 149.99	Link to the app: <a href="https://itunes.apple.com/us/app/visual-impact-3/id950058687?mt=8">https://itunes.apple.com/us/app/visual-impact-3/id950058687?mt=8</a>

	<p>Description: WayFinder 3 is an accessible travel support system for individuals with cognitive support needs. It helps people to travel independently, whether by bus or on foot, by providing picture and audio instructions based on a specific route created for the individual with WayFinder 3. The traveler simply taps on the picture of their desired destination and WayFinder 3 takes over from there.</p> <p>With WayFinder 3, specific travel routes can be created, then activated from the GPS location. A support professional, caregiver, or family member can create completely customized and personally meaningful content, all delivered in AbleLink's trademark simplified interface.</p> <p>The GPS-based tracking triggers WayFinder 3 to safely guide the user with step-by-step visual and audio instructions. WayFinder 3 can help assure travelers that they are on the correct route by pointing out important landmarks along the way, even telling them "this is not your stop" when the bus stops and others depart at a bus stop that is not their own destination stop.</p> <p>Route building is easy for the travel trainer or other support professional. A simple wizard guides you to record audio prompts, select images, and create steps the user will experience along the way. Once a route is underway, time-stamped location updates can be viewed by caregivers if desired, ensuring peace of mind.</p>
WayFinder 3	How it can help students with autism: Helps provide directions on foot or with public transportation with visual and audio prompts. Uses GPS to ensure the user is on the correct path. Helps prevent getting mixed up with the wrong wrong bus stop or route.

	<p>Description: NantMobile Money Reader instantly recognizes currency and speaks the denomination, enabling people experiencing visual impairments or blindness to quickly and easily identify and count bills. Point the camera of your iOS device at a bill and the application will tell you the denomination in real-time. Twenty one currencies are supported: the US Dollar, Australian Dollar, Bahraini Dinar, Brazilian Real, Belarusian Ruble, British Pound, Canadian Dollar, Euro, Hungarian Forint, Israeli Shekel, Indian Rupee, Japanese Yen, Kuwaiti Dinar, Mexican Peso, New Zealand Dollar, Polish Zloty, Russian Ruble, Saudi Arabian Riyal, Singapore Dollar, and United Arab Emirates Dirham.</p> <p>Featuring our patented and proprietary recognition technology, the NantMobile Money Reader makes it as easy to recognize bills as possible. There's no need to hold the iOS device still or capture a photo and wait for a result. Recognition happens instantly--in real-time. The app does not require an internet connection, which means it will read money at any location, and at anytime.</p> <p>NantMobile Money Reader is a helpful mobile assistant that's simple and easy to use. While shopping, use the application to verify money while checking out or to ensure you are getting the right amount of change back. It can be used to quickly and easily sort money with independence and confidence. The denomination is also displayed on the iOS device's in high contrast large numerals, for those having sufficient vision to make use of the display.</p>
NantMobile Money Reader	How it can help students with autism: Helps individuals who have trouble identifying money to check the cash they are using to ensure they are giving or being given the proper amount. Easy to use because it does not require taking a photo, just getting the money in the visual field of the camera.
