Overview of Course

COURSE DESCRIPTION:

This course examines biophysical, psychological, and behavioral domains of human development. Individuals and families' interactions with the environment are emphasized during each phase of the life cycle - infancy and early childhood, adolescence and young adulthood, middle adulthood, and the later years. Major theories to underpin assessment and interventions with individual and family client systems are presented, within the broader context of a systems approach.

Prerequisites: SWK 2361, 2362, 2289, and SOC 1306. Concurrent enrollment in SWK 328, 329, and 370 required; ANTH 2351 may be taken prior to or concurrently with this course. This course is restricted to social work majors and social welfare minors.

COURSE OBJECTIVE(S):

The goal of this course is to promote understanding of human behavior through two perspectives: (1) the social systems perspective in which human behavior occurs within the context of individual interactions with other individuals, families, groups, communities and organizations, and (2) the perspective of a dynamic process in which human needs, tasks, and milestones occur sequentially and predictably over an individual's life span. The objectives leading to this goal to include the following:

1. To introduce students to a system paradigm for incorporating knowledge, theories, and methodologies for practice with persons at different stages of life span development.
2. To assist students in synthesizing biological, psychological, and social interactions of individuals in the processes of human growth and development.
3. To identify the interdependence of individuals, families, groups, and organizations and communities on the processes of human growth and development.
4. To emphasize the impact of age, race, ethnicity, socioeconomic class, gender roles and sexual orientation on interactions within the environment.
5. To enhance students' awareness of social work values and ethics in relation to assessment and intervention strategies with diverse populations, especially populations at risk.
6. To assist students in analyzing the research base of theories and knowledge presented in the course content.

RELATIONSHIP TO OTHER COURSES:

This course, Human Behavior in the Social Environment I, requires concurrent enrollment in SWK 328, Social Welfare Policy; SWK 329, Micro Practice, and SWK 370 Writing Technology. This course provides the student with a theoretical framework to practice in the MICRO level of practice. It provides an understanding of how micro social work fits into the total delivery of social work services to clients and the profession of social work practice.

PROGRAM GOALS:

1. Prepare students for competent and effective generalist social work practice with diverse client systems.
2. Provide students with a foundation of knowledge for professional development, graduate education and lifelong learning
3. Develop student capability to improve human service delivery systems and promote social justice
4. Socialize student to the profession of social work

CORE COMPETENCIES

Council on Social Work Education (CSWE) requires a competency-based approach to identify and assess what students demonstrate in practice. In social work, this approach involves assessing students' ability to demonstrate the competencies identified in the educational policy. Students achieve programmatic goals listed above through demonstration the following ten competencies for generalist- level practice.

Competency 2.1.1 Identify as a professional social worker and conduct oneself accordingly

Competency 2.1.2 Apply social work ethical principles to guide professional practice

Competency 2.1.3 Apply Critical thinking to inform and communicate professional judgments

Competency 2.1.4 Engage diversity and difference in practice

Competency 2.1.5 Advance human rights and social and economic justice

Competency 2.1.6 Engage in research-informed practice and practice-informed research

Competency 2.1.7 Apply knowledge of human behavior and the social environment

Competency 2.1.8 Engage in policy practice to advance well-being and deliver services

Competency 2.1.9 Respond to contexts that shape practice

Competency 2.1.10 (a)-(d) Engages, assesses, intervenes and evaluates individual, families, groups, organizations, and communities

Practice Behaviors

Each competency (outlined above) describes the knowledge, values, skills and cognitive and affective processes that comprise the competency at the generalist level of practice. While content and activities of each course in the BSW curriculum covertly or overtly addresses each of the ten competencies, integrated into each course is a set of behaviors (practice behaviors) representing observable components of one for more competencies. Course content and assessment reflects the following practice behaviors:

2.1.4.4 Views herself or himself as a learner and engages those he or she works with as informants

2.1.9.1 Is skilled at continuously discovering, appraising and attending to changing locales, populations, scientific and technological developments and emerging societal trends in order to provide relevant services.

2.1.10[b].4 Select appropriate intervention strategies.

Student Rights and Responsibilities

"Civility in face-to-face classrooms, online courses and in labs, internships, practicum and all other academic settings necessitate respect for the opinions of others and is very important in all academic settings. It is likely you may not agree with everything that happens or discussed in the academic setting; however, courteous behavior and responses are expected. To create a civil and preserve learning environment that optimizes teaching and learning, all participants share a responsibility in creating a civil and non-disruptive forum" (Student Guide Book, p 35). To create an optimum learning environment, students have rights and responsibilities.

Student Rights

As set forth in Texas A&M University System Policy 13.02

The rights of students are to be respected. These rights include respect for personal feelings; freedom from indignity of any type, freedom from control by any person except as may be in accord with published rules of the system academic institutions, and

conditions allowing them to make the best use of their time and talents toward the objectives, which brought them to the system academic institutions. No officer [university faculty, employee] or student, regardless of position in rank, shall violate those rights, any custom, tradition or rule.

Students are expected at all times to recognize constituted authority, to conform to the ordinary rules of good conduct, to be truthful, to respect the rights of others, to protect private and public property, and to make the best use of their time toward an education.

Students with Disabilities

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you have a disability requiring an accommodation, please contact:

Class Attendance and Participation Policy

- Class participation has three components: (1) appropriate interactions with classmates; (2) active involvement in class activities and (3) attentiveness

- Students will engage in class, reflecting responsibility, inherent in the development as a social work professional.
- Classroom exercises, discussions, role-plays, guest speakers and other in-class experimental exercises are essential for a student's professional learning and continued development of self-awareness.

➤ **Student Engagement is Defined as the Following:**

To earn a level of competency within a specific course, students must demonstrate both mastery of content and active engagement.

Mastery of content areas is evidenced by successful completion of course assignments such as written papers, group project deliverables, tests/quizzes and other tangible products designed by instructors to evaluate knowledge and skills. Additionally, the Social Work Profession is built upon human interactions and building human relationships – which is defined as engagement. Engagement is defined as meaningful involvement in interactions with instructor, peers, outside stakeholders as appropriate (such as contacting a social worker to interview for a required assignment). Within the classroom setting, whether virtual or F2F, students must actively participate in 80% of engagement activities as outlined by individual instructors. These activities can include participation in a live, synchronous virtual classes, attending a Face to Face course when appropriate, interacting with peers in posted discussions and collaborating in group interactive projects.

Students must meet standards for content mastery on tangible assignments and meet the threshold of active engagement 80% of the time during a semester.

Instructors are experts in each course content area and set the standards for students to meet for successful completion of the course.

As we enter the Fall semester, we are all working under stresses and strains related to the COVID-19 pandemic. It is imperative we communicate consistently and frequently. If, for any reason, you are not able to complete assignments or actively engage in the course, you **MUST** reach out to your instructor and let him or her know.

➤ **Final Evaluation and Grade Depends on both Course Engagement and Completion of Assignments.**

Inadequate participation or lack of required time commitment in each class significantly affects students' grades. No matter the course venue, students must engage in a comparable amount of time. Expectations of both Face-to-Face classes and those with Online components include time spent reading and studying course material.

Engagement activities are defined as active participation in live synchronous classroom instruction; active involvement in interactive group projects; participation in asynchronous discussions and other opportunities for peer to peer interaction, faculty to student interactions and interaction outside of classroom expectations (such as interviewing a social worker for an assignment) among other possible venues. One half of the students' grade will be based on their level of engagement throughout the course. Example:

Student A – earns 95% of possible points across the assignments

Student A – engaged in 75% of engagement activities provided throughout the course

Student A final grade: $95\% + 75\% / 2 = 85\%$ (B) for the course.

Students Responsibilities

Class Attendance and Participation Policy

- Class participation has three components: (1) appropriate interactions with classmates; (2) active involvement in class activities and (3) attentiveness
- Students will attend class, reflecting responsibility, inherent in the development as a social work professional. Being on time and prepared when class begins

and remaining present throughout the entire class meeting demonstrates emerging professional behavior expected in social work graduates. Roll is taken in each class to document students' attendance.

- Classroom exercises, discussions, role-plays, guest speakers and other in-class experimental exercises are essential for a student's professional learning and continued development of self-awareness. Tardiness (or early departure) of more than 15 minutes will count as one-half absence and two (2) times being late to class or two (2) early departures culminating into one absence.
- A student is absent if he/she arrives more than 30 minutes late to class, leaves 30 minutes early or does not come to class.
- The following penalties for absences (unexcused, or excused, according to university policy) will be administered:

Student Conduct

Students preparing to become professional social workers must adhere to the *University Code of Conduct, Department Code of Conduct and National Association of Social Workers' (NASW) Code of Ethics*.

University Code of Conduct located in the *Student Guide Book* at

<http://www.tamuc.edu/campuslife/documents/studentGuidebook.pdf> (pp 34- 66). On the University Website under Campus Life Documents

To become aware of University policies related to student academic and behavioral expectations for students refer to the Guidebook.

Department Code of Conduct

"Faculty have the authority to request students who exhibit inappropriate behavior to leave the class/lab/internship practicum or to block access to online courses and may refer offenses to the [Academic and Professional Issues Committee (API)] or to the

Department Head. More serious offences by be referred to the University Police Department and/or the Judicial Affairs Office for disciplinary action" (Student Guidebook p 35)

Social Work students conduct themselves in an ethical and professional manner. Closely linked with professional recognition is the social worker's compliance with the profession's ethical standards. It is imperative for professional social workers to be competent and ethical in practice if the profession is to maintain the public trust. It is essential that each social work student gain a thorough understanding of the ethical principles that guide practice and actively demonstrate in behavior, both in and out of the classroom. Student conduct is to reflect the tenets of *NASW Code of Ethics* (located at <https://www.socialworkers.org/pubs/code/code.asp>) on the NASW website: <https://www.socialworkers.org>
