## True Colors Assessment

Instructions: This questionnaire describes forty different personality traits grouped together into four sets of ten statements each. Read each statement and circle the number that most naturally describes how often that personality trait applies to you (i.e. not learned behavior). Add the values of the circled numbers for each set of ten traits. Enter the total for those ten traits only in the appropriate total score space provided at the bottom of each side of the page. Your highest trait total score is your core personality color. Knowing your "core color" is a key to a better understanding of yourself and others.
