

Univiewtec Star4Live/WebPlayer Plugin Setup

The highly demanded plugin is now released and ready for you to use! We have adapted to recent changes in Windows browsers and iOS, you can now use any browser to fully access and view our units.

The following will be a walkthrough tech-note of how to utilize plugin on browsers such as Internet Explorer, Edge, Chrome, and Firefox. (*Chrome happened to be used for this document as an example*)

Two plugins are involved in getting full remote access on browsers:

- 1. Star4Live_P2P
- 2. WebPlayer (Also known as WebPlugin NVR)

Star4Live_P2P Plugin Setup:

1. Open any of the supported browsers as mentioned earlier (*Internet Explorer, Edge, Chrome, and Firefox*), Enter URL website <u>Star4live.com</u> to get Login Screen of Cloud-account as shown below:

← → C 介 is star4live.com/login		•• • • • * *
Star4Live		Hep *
	Welcome univiewtec	
	Forgot Password? Login Don't have an account? Sign Up	

2. After getting logged in with Username and Password, you will access Cloud-account showing device list, and a Star4Live_P2P Plugin prompt at the top of the webpage in yellow banner as shown below:

🛍 star4live.com/menu/devManager									ĿĿ	
Please click Download for the latest P2P service plug-in. Versions before 1.16.0001 will not be supported. To view your current plugin version, click Control Panel > Programs and Features > Star4live_P2P. Please close your browser before installation and ignore anti-virus alerts.

5. After finishing the installation of plugin, refresh web-browser and allow any prompts for new plugin use if encountered.

This completes the star4live remote cloud-device access plugin needed, when accessing your device by clicking the e icon as shown below: (e = Access)

WebPlayer Plugin Setup:

1. After clicking the Access icon you will be taken to Device's Interface in a new tab. You will show a similar yellow banner plugin prompt for installing WebPlayer. Click the banner prompt and run downloaded webplayer file to complete WebPlayer/ WebPlugin NVR Installation Wizard, as shown below:

2. Now that we have completed the installation of the WebPlayer plugin, please refresh web-page or close/re-open using Access Icon in device list as previously covered in earlier steps. You will now show a web-page interface of Device with stream windows-layout and ready to play live/playback stream!

Please use 'Play' **I** icon to get video to start in window-layout of your choice, as shown below:

This completes the setup of both plugins needed to stream video on browsers Internet Explorer, Edge, Chrome, and Firefox.
