Federated Hermes Government Obligations Tax-Managed Fund

4th Quarter 2020

Automated Shares

All information is as of 12/31/20 unless otherwise noted.

**Investor Goal**

Pursues current income consistent with stability of principal and liquidity.

Fund Features

- ✿ Invests primarily in short-term U.S. Treasury and government agency securities that pay interest exempt from state personal income tax.
- ✿ Does not invest in repurchase agreements.
- ✿ Holds AAA_m and Aaa-mf ratings from Standard & Poor's and Moody's, respectively.
- ✿ Income may be exempt from state income taxes, depending on individual state tax laws.

Fund Performance**Yield History(%) 7-day**

Net yields are based on the average daily income dividend and average net asset value for the 7 days ended on the date of calculation.

Net Yields(%)	7-day
Federated Hermes Government Obligations Tax-Managed Fund	0.01

Total Returns(%)	1-year
Federated Hermes Government Obligations Tax-Managed Fund	0.24

Annualized Yields(%)	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sept	Oct	Nov	Dec
7-day	1.07	1.10	0.17	0.01	0.01	0.01	0.01	0.01	0.01	0.01	0.01	0.01

Although not contractually obligated to do so, the adviser and/or certain fund service providers waived all or a portion of their fees or reimbursed the fund for certain operating expenses. These voluntary waivers and reimbursements may be modified or terminated at any time. The rate at which expenses are accrued during the fiscal year may not be constant and, at any particular point, may be greater or less than the stated average percentage reflected in the fund's expense table in its prospectus. These waivers increase income to the fund and result in a higher return to investors.

Otherwise, the 7-day yield would have been 0.01% and total return would have been lower.

Total return represents the change in value of an investment after reinvesting all income and capital gains.

Yield quotations more closely reflect the current earnings of the fund than the total return quotation.

Rule 2a-7 requires that money market funds maintain at least 10% daily liquidity assets and at least 30% weekly liquidity assets. Both requirements are 'point of purchase' requirements. Thus, it is possible that money market funds may, at any given time, have liquidity percentages reflecting less than the 10% and 30% thresholds. In such circumstances, the portfolio manager will be required to purchase securities to meet the requisite liquidity thresholds prior to purchasing longer-dated securities. Additionally, the SEC requirements for what may be defined as 'daily' and 'weekly' differs from the standard maturities used in calculating the 'Effective Maturity Schedule.' Therefore, the percentages in the 2a-7 Liquidity table will generally not equal the amounts shown in the 'Effective Maturity Schedule.'

A volatile fourth quarter provided a fitting end to 2020. As the cooler weather sent more people inside, the long-dreaded second wave of Covid-19 arrived. Despite the spike of new infections, state and local governments did not mandate the same widespread shutdowns seen in March. A common strategy was to target certain types of businesses, such as entertainment venues and restaurants. These less stringent measures mitigated the economic damage of the resurgence, though they still muted improvement in some activity, including the progress made by the labor market. Many Americans remained unemployed as businesses slowed their pace of rehiring employees. Calls grew for Congress to deliver another round of fiscal stimulus, as many months had passed since the CARES Act in March. The Federal Reserve in particular, made clear that government action was needed to complement its aggressive monetary policy. These entreaties were not heeded in the first two months of the quarter, shelved by the politically charged atmosphere of the national election.

In its last Federal Open Market Committee (FOMC) meeting of the year, policymakers left the target range of the federal funds rate at 0–0.25%, and all FOMC participants projected it to remain in this range throughout 2021. They also announced that the Fed will continue the asset-purchase program at the current pace. In response to the Treasury Department's decision to let most of the emergency lending facilities expire at the end of the year, the Fed aggressively argued that these programs still were needed to support an economy struggling to recover.

As the reporting period came to a close, the U.S. FDA approved the use of two Covid-19 vaccines, bringing hope that the pandemic might soon end. The rollout began with health-care professionals and other frontline workers, with plans to expand to the greater population in the coming months. The wait for more fiscal support ended when Congress passed a \$900 billion relief bill, although the amount of payments to Americans remained under debate.

Treasury yields ended the quarter with 1-month at 0.05%, 3-month at 0.08%, 6-month at 0.09%, and 12-month at 0.11%. The London interbank offered rate (Libor) ended the quarter with 1-month at 0.14%, 3-month at 0.24%, 6-month at 0.26% and 12-month at 0.34%.

Susan Hill, Fund Manager & Senior Vice President

Ratings from Leading Agencies

Ratings are based on an evaluation of several factors, including credit quality, diversification and maturity of assets in the portfolio, as well as management strength and operational capabilities. A money market fund rated AAAM by Standard & Poor's is granted after evaluating a number of factors, including credit quality, market price, exposure and management. Money market funds rated Aaa-mf by Moody's are judged to be of an investment quality similar to Aaa-rated fixed-income obligations, that is, they are judged to be of the best quality. Ratings are subject to change and do not remove market risk. For more information on credit ratings, visit standardandpoors.com and v3.moody.com.

Credit ratings do not provide assurance against default or other loss of money and can change.

About Ave Maria and Federated Hermes Relationship

The Ave Maria Mutual Funds are managed by Schwartz Investment Counsel, Inc., a registered investment adviser who has been providing investment counsel to institutions and individuals since 1980 and today serves investors nationwide. Schwartz Investment Counsel, Inc. selected Federated Hermes Government Obligations Tax-Managed Fund for this program because its investments are congruent with the moral standards in place across the Ave Maria Fund Family. The money market fund is managed by a subsidiary of Federated Hermes, one of America's largest and most respected money fund managers.

For more complete information about any Ave Maria Mutual Fund, please call your investment professional at 1-866-AVE-MARLA for prospectuses. You should consider the fund's investment objectives, risks, charges and expenses carefully before you invest. Information about these and other important subjects is in the fund's prospectus, which you should read carefully before investing.

All information is as of 12/31/20 unless otherwise noted.

This must be preceded or accompanied by a current prospectus for Federated Hermes Government Obligations Tax-Managed Fund.

The Ave Maria Funds are distributed by Ultimus Fund Distributors, LLC. Federated Hermes Government Obligations Tax-Managed Fund is distributed by Federated Securities Corp.

As of June 29, 2020, the fund was renamed Federated Hermes Government Obligations Tax-Managed Fund.

You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time.

Income is subject to federal income tax.

Consult your tax advisor regarding the status of your account under state and local tax laws.

Net yields are based on the average daily income dividend and average net asset value for the 7 days ended on the date of calculation. The 7-day net annualized yield is based on the average net income per share for the 7 days ended on the date of calculation and the offering price on that date.

The fund is a managed portfolio and its holdings are subject to change.

The holdings percentages are based on net assets at the close of business on 12/31/20 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes.

Fund shares are not guaranteed by the U.S. government.

Current and future portfolio holdings are subject to risk.

Weighted Average Maturity is the mean average of the periods of time remaining until the securities held in the fund's portfolio (a) are scheduled to be repaid, (b) would be repaid upon a demand by the fund or (c) are scheduled to have their interest rate readjusted to reflect current market rates. Securities with adjustable rates payable upon demand are treated as maturing on the earlier of the two dates if their scheduled maturity is 397 days or less, and the later of the two dates if their scheduled maturity is more than 397 days. The mean is weighted based on the percentage of the amortized cost of the portfolio invested in each period. Weighted Average Life is calculated in the same manner as the Weighted Average Maturity (WAM), but is based solely on the periods of time remaining until the securities held in the fund's portfolio (a) are scheduled to be repaid or (b) would be repaid upon a demand by the fund without reference to when interest rates of securities within the fund are scheduled to be readjusted.
