

Performance Corvairs

Here is a full and complete revision to the original *How to Hotrod Corvair Engines* by Bill Fisher. Everything the engine builder needs to know to rebuild the Corvair for power in all applications from street to full race. Covers all Corvair engines from 1960–69.

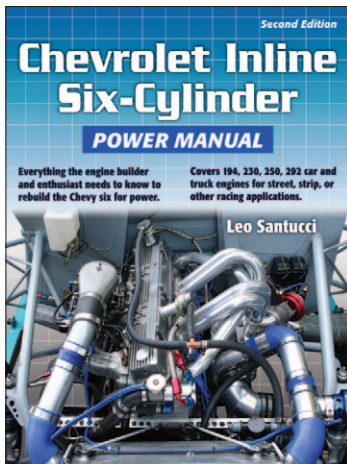

Seth Emerson is one of the foremost figures in Corvair racing. He has rewritten the entire book to current performance standards, adding more than 150 new photos and charts.

Bill Fisher was a huge fan of Chevy inline six-cylinder engines. Soon after the Corvair came out in an opposed-six configuration, he authored the original *How to Hotrod Corvair Engines* in 1964.

California Bill's
Automotive Handbooks

Chevrolet Inline Six-Cylinder Power Manual

This second edition brings the state of the art to every chapter. 203 great photos have been added. 30 additional blueprints provide even more details. Includes a brand new aftermarket heads and blocks section. Build sheets have been developed and organized to provide a clear record of your engine build. Eight racer profiles list exact part combinations used in engines and cars for supercharging, turbocharging, nitrous, and for aftermarket blocks and heads.

ISBN 978-1-931128-27-8 • \$29.95
8.25 x 11 • Paperback • 224 Pages • 20/carton

Dyno charts, airflow tests, ultrasonic-testing charts, and even more drawings!

- 591 photos
- 52 blueprints
- 40 drawings
- 14 charts and tables
- 8 racer profiles
- 7 dyno charts
