# Calculating your life insurance needs in 3 easy steps... It's as easy as ABC.

Determining how much life insurance you need doesn't have to be complicated. Working with your insurance advisor, use the following **3 easy steps** to find out how much insurance protection you require today to protect your loved ones.

- Step A : Identify your current debts and financial needs
- $\textbf{Step B} \hspace{0.1 cm}:\hspace{0.1 cm} \text{Determine your future financial needs}$
- Step C : Deduct the portion to be recovered by your assets and financial resources

## A + B – C = Your Life Insurance Needs.

Also complete Investor Profile Questionnaire (358E) if you are considering products with an investment component.

A Identify your current debts and financial needs	\$
1 Mortgage(s)	1
2 Loans (e.g. auto, credit cards, personal, etc.)	2
3 Final expenses (e.g. burial, probate, executor fees, etc.)	3
	otal (A)
Determine your future financial needs (see explanatory note 4: use either gross or n	net (after-tax) income
method)	
4 Income needs for your survivor  Single  Partnered Number of children and/or other ot	dependents
Your current income \$	
The % of income your survivor needs (e.g. 40% - 75%) X	
Subtotal \$	
Minus: Survivor pension income (e.g. CPP/QPP survivor - \$	
income)	
The amount of future annual income needed by your survivor = \$	
The number of years of income protection	
Assumed interest rate discounted by inflation	
and income tax rate if net income method is	
selected	
Assumed time-valued factor $\rightarrow$ X	
	$\rightarrow$ 4
5 Emergency fund	5
6 Child-care expenses	6
7 Education fund Annual amount X Years X Number Children	7

### A + B – C = Your Life Insurance Needs \$

I understand that the values illustrated in this life insurance needs analysis are based on financial information that I have provided and my understanding of my future financial needs in the event of my death. The illustrated insurance coverage is subject to medical and financial underwriting. It is strictly for reference and I may decide to take out a life insurance policy with a coverage amount different from the one illustrated above. My insurance coverage has to be reviewed on a regular basis to ensure that my financial goals and objectives continue to be met.

### Explanatory Notes

- Mortgage(s) 1
- 2 Loans
- 3 Final expenses
- 4 Income needs for survivor

Enter the total amount of outstanding mortgage(s) balance of your family. If you are planning on moving to a bigger dwelling, use the new amount as estimated. The amount here represents a portion of the death proceeds required by you. Enter the total amount of outstanding loan balance(s) that you would like to pay off in the event of death. Include loans of all types (e.g. car, credit card, line of credit, etc.). Enter the estimated final expenses including burial, probate, executor fee, uninsured final medical costs (e.g. \$10,000 for funeral and 2% probate fee).

To work out the reasonable income needs for your survivor in the event of your death, it is suggested that you use either gross (before tax) or net (after tax) annual income:

- Multiply your current annual income by a percentage (usually up to 75% when using gross income, and 40-50% when using net income);
- Estimate the number of years for income protection
- Locate a time-valued factor from the table below based on an assumed interest rate (discounted by inflation) against the number of years of income protection required
  - Then, calculate the value by multiplying Income \$ X Income % X Time-valued factor = Amount to be entered in B (4).

#### Example:

Current income = \$71,000 % of income required by survivor = 70% Interest discounting inflation = 3% Number of years = 25 Income needs for survivor = \$71,000 X 70% X 17.41 = \$865,277 (rounded) Enter \$865,277 in B (4) in the worksheet.

	Enter \$865,277 in B (4) in the worksheet. Interest rate (discounted by inflation)								
	Years	0.5%	1%	1.5%	2%	2.5%	3%	3.5%	4%
	10	9.73	9.47	9.22	8.98	8.75	8.53	8.32	8.11
	15	14.42	13.87	13.34	12.85	12.38	11.94	11.52	11.12
	20	18.99	18.05	17.17	16.35	15.59	14.88	14.21	13.59
	25	23.45	22.02	20.72	19.52	18.42	17.41	16.48	15.62
