

# Smart Business Solutions for the Small Business Owner to Effectively Operate, Manage, and Grow their Business

## Smart 360 POS™

# Why should you use a POS System?

Every business requires some means of a cash management system to enter and record sales transactions. Traditional electronic cash registers (ECR) has for decades been the primary source used by businesses for this purpose. ECR are less expensive than Point of Sale (POS) systems, but have not evolved to meet the growing technological needs of most businesses.

## POS Systems - Top 5 Benefits

- ✓ **Ease of Use:** POS systems are easier to set up and simpler to use. Training of staff is intuitive with on screen control and navigation.
- ✓ **Increased Speed & Improved Accuracy:** Speed and accuracy of sales transactions increase without the need of remembering price look up (PLU) tables and pricing. On screen navigation provides visible verification of an entry, with correction or changes to an order with a simple press of a button.
- ✓ **Improved Inventory Control and Management:** Point of sale system provide better records of inventory and movement of inventory, allowing you to manage your business more effectively and improve your cash flow
- ✓ **More Detailed Reporting:** Data in today's environment is vital and a valuable resource that can help make or break a company's business. POS systems provide more detailed reports and information to allow you to better analyze, manage and grow your business.
- ✓ **Features Versatility and Expandability:** The ideal cash management solution will allow your system to evolve if your business needs change and evolve. Many POS systems provide you with this versatility

Point of Sale System

Traditional Electronic Cash Register

# Smart 360 POS is ideal for the small Business Owner

## Smart 360 POS™ is ideal for the Small Business Owner

- Seeking ways to save time, money and allow them to better analyze their business performance and to boost the bottom line;
- Seeking a Smart Business Solution without 'locking into' a long-term contract or paying a monthly service fee;
- Seeking a more effective and accurate business solution than what an electronic cash register (ECR) offers;
- Seeking a Smart Business Solution that allows them to expand their system if their business needs change.

Everything a Small Business Needs to Effectively  
Operate, Manage and Grow a Business  
.....With No Monthly Fees!

# Introducing Smart 360 POS

**Complete 'Out of the Box' Solution**

**Inventory Management, Control & Reporting**

**Expandable and Versatile**

**Smart 360 POS™**

# No Contracts, No Subscription Fees and No Monthly Fees

Costs are often hidden in the details, with contracts, subscription fees and monthly fees being hidden into the purchase of a product

- ✓ You work hard to make your business successful. We at Royal Sovereign recognize that every dollar saved is a dollar that can be used to help better manage and grow your small business. Royal Sovereign's Smart 360 POS™ system provides you the ideal business solution to operate, manage and grow your business...with No Contracts and No Monthly Fees;
- ✓ Many POS systems require you to pay \$49 or more a month to use their 'Free' POS software solution. Royal Sovereign's Smart 360 POS™ system provides the ideal 'out of the box' point of sale solution to manage your business. No Contracts and No Monthly fees. Cloud services not included and not required
- ✓ Many POS systems require you to utilize their credit card /debit card services and their Payment Solution Provider even if you already have one or are locked into an existing service contract. Royal Sovereign's Smart 360 POS™ system allows you to utilize ANY credit card /debit card service and payment solution provider.

# Fast, Easy Installation

Your Point of Sale system should be easy to set up and even simpler to operate. It should help you save time and money to help you more effectively manage your business

- ✔ Royal Sovereign's Smart 360 POS™ is easy- to set up. The Easy Guide screens will help you set up your POS System to your specific needs so that you can spend your time doing more important things, like running your business.
- ✔ Why spend countless hours setting up your inventory system, when you can simply and easily upload your departments, department inventory items, retail prices, costing and inventory. Simply use our back office to upload your inventory using standard spreadsheet packages like Excel. You can also upload inventory using a barcode scanner (not included) or manually.
- ✔ Smart 360 POS™s intuitive interface and menu screens allow you to easily navigate the various screen to quickly enter and complete a sales transaction. The touch screen navigation further increases productivity and helps prevent potentially costly transaction errors.

# Complete Packaged 'Out Of The Box' Solution

Your Time is Valuable. You should not have to spend countless hours of your day trying to find the ideal solution for your small business. Royal Sovereign provides you with the key essentials to have your business up and running quickly. Here is what you get

# Canadian and USA Tax System Designed

## For Canada

- ✓ The Canadian tax system is complicated, with different provincial tax rates, federal tax rate calculations and for many provinces, tax exempt or partially tax-exempt products. Smart 360 POS™ was designed for the Canadian tax system. Whether your province utilizes HST (Harmonized Sales Tax), or separate GST (Goods and Services Tax), PST (Provincial Sales Tax) or QST (Quebec Sale Tax) calculations, Smart 360 POS™ is ideal for you. Smart 360 POS™ utilizes Easy Guide, a drop down menu screen you use to select the province of your business. Easy Guide does the rest, automatically setting the tax system rate to your province (you can customize your settings, should there be tax exempt products).
- ✓ Canadian retail requirements require certain information to be printed on your customers' printed sales receipt. Easy Guide will help navigate you through this process to easily set up your POS system.

## For USA

- ✓ Utilize Smart 360 POS™ Easy Guide to select the state where your business operates. Set the tax rate to your state and local tax rate system (you can customize your settings, should there be tax exempt products).

# Inventory Management, Control & Reporting

- ✓ Entering and managing inventory has become simple. Smart 360 POS™ provides three different ways to enter a new product into inventory: spreadsheet upload, barcode scanner or manual entry. Enter product description, item code number, quantity, pricing and costing to allow you to better analyze your business.
- ✓ Set up inventory alerts to warn you when inventory is running low. Smart 360 POS counts inventory automatically, enabling you to ensure that you never are out of a key sales item.
- ✓ Managing and up keeping your inventory, pricing, costing and inventory quantity is straightforward with Smart 360 POS™ back office. The administrator security password helps to ensure that only those you give security access to will be able to access this information.
- ✓ Generating sales reports should be simple yet meaningful to allow you to analyze and understand the health of your business. Smart 360 POS™ allows you to track sales from a specific sales period that you set

# Expandable and Versatile

If your business needs change as your business grows and evolves, Smart 360 POS™ is scalable to meet these needs. Add optional hardware devices (not included). Our customer and technical support team will be able to better assist you to meet these needs

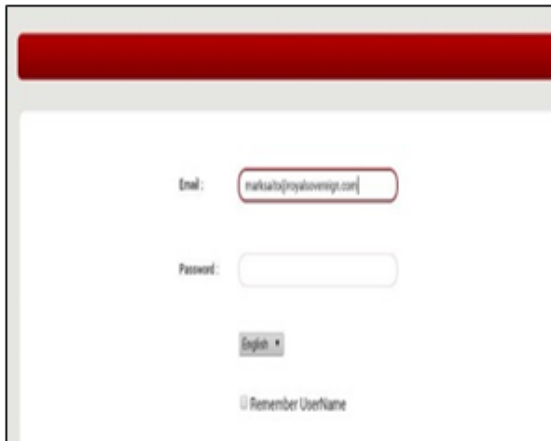

# MAIN SCREEN

- **Search Button:** Allows for fast and easy look up of items by name or by item number.
- **Transaction Screen:** Displays items entered. Adjust quantity, set item discount rates. Delete line items or view taxes for a specific item on screen.
- **One Touch Button:** Provides for one touch commands buttons to be used including: Print Last Receipt and Open Cash Drawer.
- **Transaction Button:** Displays Subtotal Federal and Provincial (HST, GST, PST/QST – where applicable) and total amount to pay. Press the PAY button to finalize the transaction

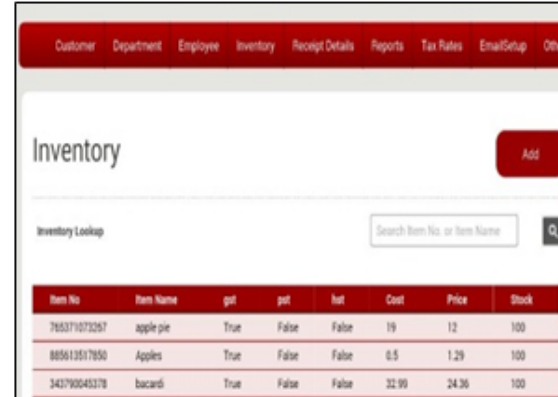

- **Number Keypad:** Allows user the option to enter a transaction using the numbers keypad or by department category item button.
- **Department Button** – Allows user to categorize merchandise by department. Scroll right-to-left to view all categories entered into inventory (unlimited number of departments can be entered).
- **Item Button** – Shows all items within a department. Scroll right-to-left to view all items within a department (unlimited number of items within a department can be entered).

# BACK OFFICE

**Administrator Screen:** Password protected. Allows administrator to customize system, set up or modify inventory, set or change tax rates globally or for a specific item, print more detailed reports, and more!.

Item No	Item Name	got	put	lot	Cost	Price	Stock
785371073267	apple pie	True	False	False	19	12	100
885613517850	Apples	True	False	False	0.5	1.29	100
343790045378	bacard	True	False	False	32.99	24.36	100
