

# Portable Film Force System

*World Leader in Stretch-Film Technology!*

Test Software  
Graphs and  
Records Results

Durable Steel  
Components

**The Portable Film Force System is the best way to measure and record film performance in the field.**

**Quickly and accurately measure the film's containment force and puncture resistance on any load, anywhere.**

**Collect, record, and graph data instantly in real time. Compare multiple tests in seconds.**

**Load Cell is wrapped to collect test data**

Portable and  
Professional ABS Case

**System records and displays test data via built in Wi-Fi system to your device**

**Highlight test software has been proven and refined over 20 years**

**Primary Systems can be expanded with additional Load Cells**

**Counterweight-and-Strap system allows easy testing on any load**
