OCCUPATIONAL EMPLOYMENT AND WAGES — MAY 2021

Healthcare practitioners and technical occupations had employment of 8.8 million in May 2021, representing 6.2 percent of total national employment, the U.S. Bureau of Labor Statistics reported today. The largest healthcare practitioners and technical occupations were registered nurses (3.0 million) and licensed practical and licensed vocational nurses (641,240). (See chart 1.) The annual mean wage across all healthcare practitioners and technical occupations was \$91,100, compared with the U.S. average wage of \$58,260. (See table 1.)

The Occupational Employment and Wage Statistics (OEWS) program provides employment and wage estimates for about 830 occupations in the nation, states, and approximately 530 areas. National data are available by industry for approximately 415 industry classifications and by ownership across all industries and for the educational services and hospitals industries. This news release features healthcare practitioners and technical occupations, transportation and material moving occupations, and protective service occupations, in addition to employment and wages by typical entry-level educational requirement and STEM (science, technology, engineering, and mathematics) occupations. National employment and wage information for all occupations is shown in table 1.

Changes to the Occupational Employment and Wage Statistics (OEWS) Data

With the May 2021 estimates release, the Occupational Employment and Wage Statistics (OEWS) program has implemented a new model-based (MB3) estimation method. The May 2021 OEWS estimates are also the first estimates based entirely on survey data collected using the 2018 Standard Occupational Classification (SOC) system. See the box notes at the end of this news release for more information.

Healthcare practitioners and technical occupations

- The **largest** healthcare practitioners and technical occupations were registered nurses (3.0 million), licensed practical and licensed vocational nurses (641,240), and pharmacy technicians (436,630). (See table 1 and chart 1.) Healthcare practitioners and technical is the larger of the two healthcare occupational groups and includes occupations like physicians, surgeons, dentists, nurses, therapists, and health technologists and technicians.
- The **highest paying** healthcare practitioners and technical occupations included cardiologists, anesthesiologists, and oral and maxillofacial surgeons, all with annual mean wages of more than \$300,000. These specialist physician and dentist occupations were also among the highest paying occupations overall. (See table 1.)
- The **lowest paying** healthcare practitioners and technical occupations included dietetic technicians (\$34,160) and emergency medical technicians (\$36,690). (See table 1.)
- Half of all healthcare practitioners and technical jobs were in general medical and surgical hospitals (3.2 million) or offices of physicians (1.2 million). **Industries** with the largest

- employment of healthcare practitioners and technical occupations also included outpatient care centers (408,420) and health and personal care stores (380,930).
- California (\$115,220), Hawaii (\$113,370), and New Jersey (\$112,860) were the **states** with the highest wages for healthcare practitioners and technical occupations.

National industry-specific data are available at www.bls.gov/oes/current/oessrci.htm.

State data are available at www.bls.gov/oes/current/oessrcst.htm.

Transportation and material moving occupations

- Transportation and material moving occupations had **employment** of 12.6 million, representing 9.0 percent of U.S. employment, and an **annual mean wage** of \$41,340. (See table 1.)
- The **largest** transportation and material moving occupations were laborers and hand freight, stock, and material movers (2.7 million) and stockers and order fillers (2.5 million). (See table 1.)
- The **highest paying** transportation and material moving occupations were airline pilots, copilots, and flight engineers (\$198,190) and air traffic controllers (\$127,920). (See table 1.)
- The **lowest paying** occupations in this group included parking attendants (\$29,210) and automotive and watercraft service attendants (\$29,960). (See table 1.)
- Transportation and material moving occupations made up 20.3 percent of employment in Stockton-Lodi, CA, compared with 9.0 percent nationally. **Metropolitan areas** with the highest shares of transportation and material moving occupations also included Memphis, TN-MS-AR (17.4 percent), and Chambersburg-Waynesboro, PA (16.8 percent).

Metropolitan area data are available at www.bls.gov/oes/current/oessrcma.htm.

Protective service occupations

- Protective service occupations had **employment** of 3.4 million, representing 2.4 percent of U.S. employment. The **annual mean wage** for protective service occupations was \$53,420. (See table 1.)
- The **largest** protective service occupations were security guards (1.1 million), police and sheriff's patrol officers (665,380), and correctional officers and jailers (392,600). (See table 1.)
- The **highest paying** protective service occupations were first-line supervisors of police and detectives (\$98,760) and detectives and criminal investigators (\$90,370). The **lowest paying** protective service occupations were lifeguards, ski patrol, and other recreational protective service workers (\$27,320) and school bus monitors (\$30,220). (See table 1.)
- The largest protective service occupation, security guards, had an annual mean wage of \$35,830 nationally. The District of Columbia (\$52,840) and Alaska (\$49,040) had among the highest

- average wages for this occupation. The lowest paying states for security guards included Mississippi (\$27,650) and Alabama (\$27,670).
- About 1.4 million protective service jobs were in local government, excluding schools and hospitals, representing 41 percent of employment in this occupational group. After local government, the **industries** with the largest employment of protective service occupations were investigation and security services (721,420) and state government, excluding schools and hospitals (381,880).

Largest occupations

- The largest occupations overall were retail salespersons (3.7 million), home health and personal care aides (3.4 million), cashiers (3.3 million), and fast food and counter workers (3.1 million). (See table 1.)
- Eight of the 10 largest occupations had below-average wages, including retail salespersons (\$31,920) and home health and personal care aides (\$29,260). (See table 1.)
- Of the 10 largest occupations, registered nurses (\$82,750) and general and operations managers (\$115,250) were the only occupations with above-average wages. (See table 1.)

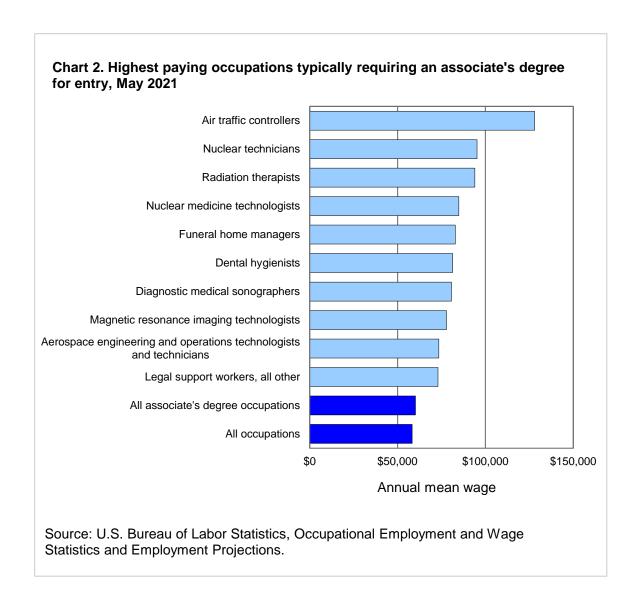

Public sector occupations

- The public sector made up 15.0 percent of employment and had a different occupational mix from the private sector.
- Several of the **largest** public sector occupations were related to education. These occupations included elementary school teachers, except special education (public sector employment of 1.2 million); teaching assistants, except postsecondary (952,910); secondary school teachers, except special and career/technical education (877,700); and middle school teachers, except special and career/technical education (527,110).
- Outside of the educational instruction and library group, the occupations with the highest public sector employment included police and sheriff's patrol officers (659,050); registered nurses (522,500); and janitors and cleaners, except maids and housekeeping cleaners (469,960).

Public/private sector ownership data are available at www.bls.gov/oes/current/oessrci.htm.

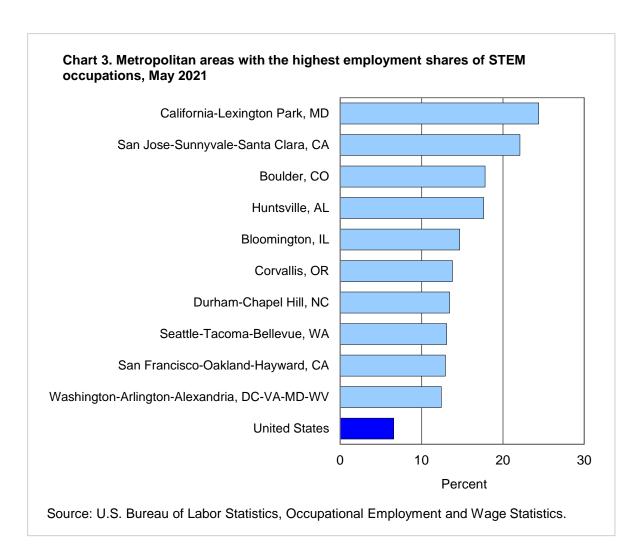

Typical entry-level education

- Preschool teachers, except special education (391,670) and paralegals and legal assistants (336,250) were the largest occupations typically requiring an **associate's degree** for entry. Occupations in this educational category made up about 2 percent of total employment.
- Occupations typically requiring a **high school diploma or the equivalent** for entry made up 39 percent of employment, and occupations typically requiring **no formal educational credential** for entry made up 22 percent of employment. These two educational categories include many production and construction occupations, as well as large occupations like retail salespersons and home health and personal care aides.

- Occupations typically requiring **postsecondary education** for entry made up nearly 40 percent of employment. The largest postsecondary category, occupations typically requiring a **bachelor's degree** for entry, made up over 24 percent of employment. This educational category includes registered nurses; teachers at the kindergarten through secondary levels; and many management, business and financial operations, computer, and engineering occupations.
- **Average wages** were generally higher for occupations requiring more education. Annual mean wages were \$31,810 for occupations typically requiring no formal educational credential for entry, \$46,760 for occupations typically requiring a high school diploma or the equivalent, \$60,180 for occupations typically requiring an associate's degree, and \$93,590 for occupations typically requiring a bachelor's degree.
- The **highest paying** occupations typically requiring an **associate's degree** for entry were air traffic controllers (\$127,920), nuclear technicians (\$95,200), and radiation therapists (\$94,000). (See chart 2.)

The typical education level required to enter an occupation is based on education and training categories from the BLS Employment Projections program. More information about the system of education and

training categories is available at www.bls.gov/emp/documentation/education/tech.htm. Typical entry-level educational requirements assigned to each occupation in the May 2021 OEWS estimates are available at www.bls.gov/oes/educ_list_2021.xlsx. Additional charts are available at www.bls.gov/oes/current/overview_2021.htm.

Science, technology, engineering, and mathematics (STEM) occupations

- There were nearly 9.3 million STEM jobs representing 6.6 percent of total U.S. employment.
- The six **largest** STEM occupations were related to computers and included software developers (1.4 million) and computer user support specialists (654,310). (See table 1.) The largest STEM occupations not related to computers were civil engineers (304,310) and industrial engineers (293,950).
- Areas with the highest employment shares of STEM occupations were California-Lexington Park, MD (24.4 percent), and San Jose-Sunnyvale-Santa Clara, CA (22.1 percent). (See chart 3.)
- **Industries** with the highest shares of STEM occupations included computer systems design and related services (62.5 percent); architectural, engineering, and related services (61.1 percent); and software publishers (57.1 percent).

- STEM occupations had an **annual mean wage** of \$100,900, compared with \$55,260 for non-STEM occupations. Ninety-two of the 105 STEM occupations had mean wages significantly above the all-occupations average of \$58,260. (See table 1.)
- The **highest paying** STEM occupations were the three STEM-related management occupations—computer and information systems managers (\$162,930), architectural and engineering managers (\$158,970), and natural sciences managers (\$156,110)—and physicists (\$151,580). (See table 1.)
- The **lowest paying** STEM occupations were forest and conservation technicians (\$43,420) and agricultural technicians (\$44,850). (See table 1.)

Occupations included in the STEM definition used for this news release are available at www.bls.gov/oes/stem_list_2021.xlsx. Additional STEM charts are available at www.bls.gov/oes/current/overview_2021.htm.

Changes to the Occupational Employment and Wage Statistics Methodology

With the May 2021 estimates, the OEWS program has implemented a new estimation method. This model-based method, called MB3, has advantages over the previous estimation method, as described in the *Monthly Labor Review* article at www.bls.gov/opub/mlr/2019/article/model-based-estimates-for-the-occupational-employment-statistics-program.htm. For more information, see the May 2021 Survey Methods and Reliability Statement at www.bls.gov/oes/methods_21.pdf. OEWS estimates for the years 2015-19 were recalculated using the new estimation method and are available as research estimates at www.bls.gov/oes/oes-mb3-methods.htm.

Implementing the 2018 Standard Occupational Classification (SOC) System

The May 2021 estimates are the first OEWS estimates to be based entirely on survey data collected using the 2018 SOC. May 2021 OEWS data are available for most 2018 SOC detailed occupations. To improve data quality, the OEWS program aggregates some occupations to the SOC broad occupation level or as OEWS-specific combinations of 2018 SOC detailed occupations.

Technical Note

Scope of the survey

The Occupational Employment and Wage Statistics (OEWS) survey is a semiannual survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. The OEWS data available from BLS include cross-industry occupational employment and wage estimates for the nation; over 580 areas, including states and the District of Columbia, metropolitan statistical areas (MSAs), nonmetropolitan areas, and territories; national industry-specific estimates at the NAICS sector, 3-digit, most 4-digit, and selected 5-and 6-digit industry levels; and national estimates by ownership across all industries and for schools and hospitals.

The OEWS survey is a cooperative effort between BLS and the State Workforce Agencies (SWAs). BLS funds the survey and provides the procedures and technical support, while the SWAs collect most of the data. OEWS estimates are constructed from a sample of about 1.1 million establishments. Each year, two semiannual panels of approximately 179,000 to 187,000 sampled establishments are contacted, one panel in May and the other in November. Responses are obtained by Internet or other electronic means, mail, email, telephone, or personal visit. The May 2021 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2021, November 2020, May 2020, November 2019, May 2019, and November 2018. The unweighted sampled employment of 82 million across all six semiannual panels represents approximately 62 percent of total national employment. The overall national response rate for the six panels, based on the 50 states and the District of Columbia, is 67.2 percent based on establishments and 64.5 percent based on weighted sampled employment.

The occupational coding system

The May 2021 OEWS estimates contain approximately 830 occupational categories based on the Office of Management and Budget's 2018 Standard Occupational Classification (SOC) system. Together, these occupations make up 22 of the 23 SOC major occupational groups. Major group 55, Military Specific Occupations, is not included.

For more information about the SOC system, please see the BLS website at www.bls.gov/soc/.

The industry coding system

The May 2021 OEWS estimates use the 2017 North American Industry Classification System (NAICS). For more information about NAICS, see the BLS website at www.bls.gov/bls/naics.htm.

The OEWS survey excludes the majority of the agricultural sector, with the exception of logging (NAICS 113310), support activities for crop production (NAICS 1151), and support activities for animal production (NAICS 1152). Private households (NAICS 814) also are excluded. OEWS federal government data include the U.S. Postal Service and the federal executive branch only. All other industries, including state and local government, are covered by the survey.

Survey sample

The OEWS survey draws its sample from state unemployment insurance (UI) files. Supplemental sources are used for rail transportation (NAICS 4821) and Guam because they do not report to the UI program. The OEWS survey sample is stratified by metropolitan and nonmetropolitan area, industry, and size.

To provide the most occupational coverage, larger employers are more likely to be selected than smaller employers. A census is taken of the executive branch of the federal government, the U.S. Postal Service, and state government.

Concepts

Occupational employment is the estimate of total wage and salary employment in an occupation. The OEWS survey defines employment as the number of workers who can be classified as full- or part-time employees, including workers on paid vacations or other types of paid leave; workers on unpaid short-term absences; salaried officers, executives, and staff members of incorporated firms; employees temporarily assigned to other units; and employees for whom the reporting unit is their permanent duty station, regardless of whether that unit prepares their paycheck. The survey does not include the self-employed, owners and partners in unincorporated firms, household workers, or unpaid family workers.

Wages for the OEWS survey are straight-time, gross pay, exclusive of premium pay. Base rate; cost-of-living allowances; guaranteed pay; hazardous-duty pay; incentive pay, including commissions and production bonuses; and tips are included. Excluded are overtime pay, severance pay, shift differentials, nonproduction bonuses, employer cost for supplementary benefits, and tuition reimbursements.

The responding establishments are instructed to report hourly rates for part-time workers and to report annual rates for occupations that are typically paid at an annual rate but do not work 2,080 hours per year, such as teachers, pilots, and flight attendants. Other workers, such as some entertainment workers, are paid hourly rates, but generally do not work 40 hours per week, year round. For these workers, only an hourly wage is reported.

OEWS receives wage rate data for the federal government, the U.S. Postal Service, most state governments, and some local government and private sector establishments. For the remaining establishments, the OEWS survey data were placed into 12 intervals. The intervals are defined both as hourly rates and the corresponding annual rates, where the annual rate for an occupation is calculated by multiplying the hourly wage rate by a typical work year of 2.080 hours.

Estimation methodology

The OEWS survey is designed to produce estimates by combining six panels of data collected over a 3-year period. Each OEWS panel contains approximately 179,000 to 187,000 establishments. The full six-panel sample of 1.1 million

establishments allows the production of estimates at detailed levels of geography, industry, and occupation.

The May 2021 estimates were produced by a model-based estimation method using three years of OEWS data (MB3). Under MB3, data provided by survey respondents are used to model occupational staffing patterns and wages for all unobserved establishments in the population, including establishments that were not sampled, sampled establishments that did not respond, and respondents that did not meet stability criteria.

A donor pool typically consisting of 10 nearest neighbor responding establishments is used to predict data for each unobserved establishment; if 10 donors are not available, then as few as 5 can be used. Donors are matched to recipients based on detailed industry, geographic area, ownership, size, and survey panel. Within a given donor pool, donors that are more similar to the unobserved establishment are given more weight in determining the modeled data.

Each establishment's population employment is set as the average of its May 2021 and November 2020 employment from the Quarterly Census of Employment and Wages, the UI database from which the OEWS sample is drawn. Using adjustment factors derived from the OEWS survey data, wages collected in earlier survey panels are adjusted to the reference date of the estimates and donor wages are adjusted for differences between donor and recipient characteristics such as geographic area and industry.

Changes and special procedures in the May 2021 estimates

With the May 2021 estimates, the OEWS program has implemented a new estimation method. This new model-based method, called MB3, has advantages over the previous estimation

method, as described in the Monthly Labor Review article at www.bls.gov/opub/mlr/2019/article/model-based-estimates-for-the-occupational-employment-statistics-program.htm. For more information, see the May 2021 Survey Methods and Reliability Statement at www.bls.gov/oes/methods 21.pdf.

The May 2021 estimates are the first OEWS estimates based entirely on survey data collected using the 2018 SOC. The May 2019 and May 2020 estimates were based on a combination of survey data collected using the 2010 SOC and survey data collected using the 2018 SOC and used a hybrid of the two classification systems. See www.bls.gov/soc/2018 and www.bls.gov/oes/oes ques.htm#qf10 for more information.

May 2021 OEWS data are available for most 2018 SOC detailed occupations. To improve data quality, the OEWS program has replaced some 2018 SOC detailed occupations with SOC broad occupations or OEWS-specific aggregations.

The May 2021 OEWS estimates use the metropolitan area definitions delineated in Office of Management and Budget (OMB) Bulletin 17-01. For more information, please see www.bls.gov/oes/current/msa_def.htm.

Response rates for the May 2021 estimates were negatively affected by the difficulty of collecting data from employers during the COVID-19 pandemic. Lower response rates may negatively affect data availability and data quality.

For more information

Answers to frequently asked questions about the OEWS data are available at www.bls.gov/oes/oes_ques.htm. If you are deaf, hard of hearing, or have a speech disability, please dial 7-1-1 to access telecommunications relay services.

Table 1. National employment and wage data from the Occupational Employment and Wage Statistics survey by occupation, May 2021

		Mean w	/ages	Median

Table 1. National employment and wage data from the Occupational Employment and Wage Statistics survey by occupation, May 2021—Continued

Occupation	Employment	Mean wages		Median
		Hourly	Annual¹	hourly wages
Transportation and material moving occupations (Continued) Refuse and recyclable material collectors Tank car, truck, and ship loaders Material moving workers, all other	12,090	26.60	\$42,780 55,330 40,190	\$18.51 23.75 17.38

¹ Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.

² Wages for some occupations that do not generally work year-round, full time, are reported either as hourly wages or annual salaries, depending on how they are typically paid.

 $^{^{3}}$ Represents a wage equal to or greater than \$100.00 per hour.

⁴ Estimate not released.
