

Mobile is Money.

Texttr provides hyper-local marketing solutions by providing customers with content at the right time, the right place, and through expressed interest.

Patent Pending.

ENGAGE YOUR AUDIENCE

The Technology

- Textr is a wireless solution that utilizes Wi-Fi or Geolocation to engage with customers through push notifications.
 - Allows companies to send out targeted messages to a specific set of users within a specific distance who express interest in their products.

The Benefits

Right Time.

Reach customers at the best moment. Stop wasting time creating posts on social media that will never be seen.

Right Place.

Mobile is the modern coupon book. Push content to customers when they are most likely to make a purchase.

Right Interest.

Engage with customers who have expressed interest in your brand through cutting edge opt-in techniques.

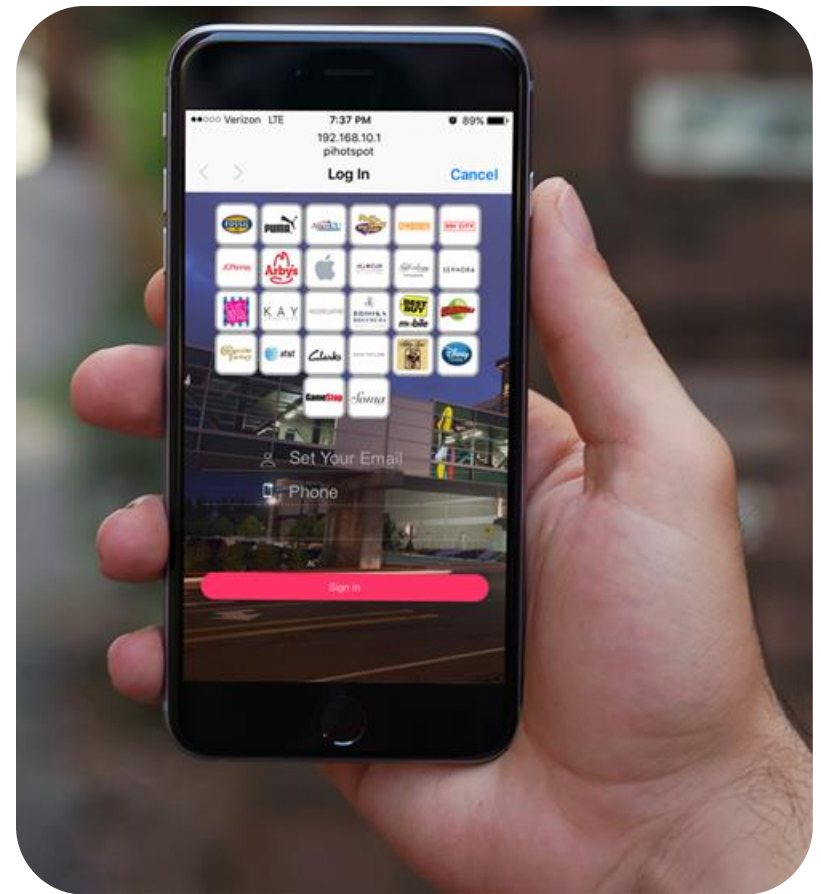

Increase Sales.

In a mobile first world, businesses need to reach the right customers where and when they want to be reached.

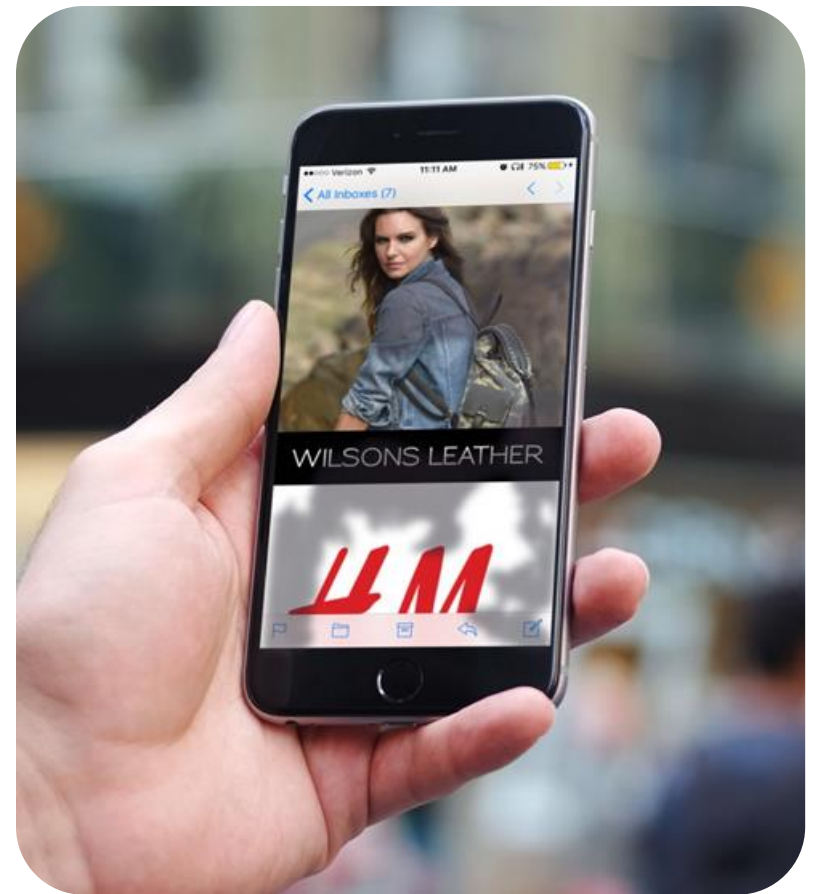

Consumer Approach: Shopping Malls

- Shopping malls want to engage customers to increase retention and drive sales per square foot.
- Textr allows malls to push relevant deals to customers when they are most likely to act on those deals.

Consumer Approach: Shopping Malls

- Shopping mall customers log in to Wi-Fi and select interests to receive free deals.
- This allows customers to navigate the mall quickly, be notified on the latest sales, and stay up to date on any events occurring at the mall.
- The result is an increase in customer engagement and revenue.
