Library Management

Solutions for Library Management

EBSCO collaborates with libraries to develop a library services platform that supports an open future.

FOLIO is an open source library services platform that integrates print and electronic resource management. It includes core library management functionality and is built on a modern architecture to ensure continuous innovation, and it supports the integration of applications from third-party providers.

FOLIO provides improved features and workflows versus legacy systems. The new model for building FOLIO is based on librarian input and collaboration. EBSCO elevates the value of the open source community by providing dedicated implementation and support services and enriched software, ensuring that FOLIO is accessible to libraries of all sizes.

Professional Services for FOLIO

The FOLIO open source platform is extensible, supporting traditional resource management, but focused on the ability to deliver new services. FOLIO is free, but running the software takes time and resources.

EBSCO offers a suite of services for libraries who want to run FOLIO in a cost-efficient way, but don't have the resources to host or the staff to support the library services platform.

Reliable Information

With the prevalence of non-vetted internet content, now it is more important than ever for researchers to have access to reliable scholarly, peer-reviewed information.

Our five Ultimate databases include content from the leading full-text journals in key subject areas. In addition to providing content unavailable in other resources, these databases offer unparalleled international journals that give researchers a well-rounded global perspective.

Academic Search™ Ultimate offers the most comprehensive multidisciplinary content available. Leading journals cover every research topic from astronomy to zoology and everything in between. In addition to high-quality journals, the database offers researchers access to video content from the Associated Press.

Applied Science & Technology Source™ Ultimate provides STEM students and researchers with information on a wide range of topics including artificial intelligence, applied mathematics, plastics, hydroponics, computer science, energy resources and robotics and more.

Business Source® Ultimate covers marketing, management, accounting, banking, finance and more. Content includes case studies, industry profiles, SWOT analyses, market research reports and country reports. The video collection includes 75,000 AP videos and more than 27,000 business videos from top providers including Harvard Business Publishing, Bloomberg and the Academy of Management.

Humanities Source™ Ultimate is for scholars and educators interested in all facets of the humanities from classical studies, drama, the arts, music, dance, poetry, philosophy, literature, linguistics and communication.

Sociology Source™ Ultimate is for students studying social behavior and interaction. Topics range from gender identity, marriage and family, to demographics, political sociology, religion and socio-cultural anthropology. It also includes 2,500 new sociology videos.

Collection Management

Your time — like your collection — is valuable. Maximize both with tools that streamline your workflow whether selecting databases, journals and e-books or managing library systems.

EBSCONET® Subscription Management is a complimentary tool for EBSCO customers that provides convenient online access to pricing, access options, renewals and other important details for more than 385,000 individual titles — including 57,000+ e-journals — and more than 900 e-journal packages. As the industry's leading subscription agent, EBSCO works with more than 128,000 publishers around the globe to provide one of the world's most comprehensive journal title catalogs.

EBSCOhost® Collection Manager (ECM) allows users to order, build and manage *EBSCO eBooks™*, *EBSCO Audiobooks™* and *Flipster®* digital magazine collections from one convenient online location. The easy-to-use interface also provides access to MARC records, DRM-free e-books and usage reporting. Browse hundreds of options including DRM-free e-books that offer a superior user experience and do not require an Adobe ID.

GOBI® Library Solutions from EBSCO offers more than 17 million print books and e-books and the largest selection of DRM-free e-books to academic, research and special libraries worldwide. With more than one million DRM-free e-book options, GOBI Library Solutions is a one-stop resource for library acquisitions, collection development and technical services.

EBSCO Faculty Select™ empowers academic libraries to directly support textbook affordability efforts at their institutions. Through a single, easy-to-use interface, faculty can easily find and access quality Open Educational Resources (OER) and EBSCO's Open Access E-Book Collection to support their courses, and search and request access to relevant DRM-free e-books from top academic publishers. Librarians can then order requested e-books through GOBI® or through *EBSCOhost® Collection Manager* (ECM).

Discovery & Technology

Advanced technology solutions ensure that students, researchers and faculty can access your library's materials easily, whether they are on campus or online.

EBSCO Discovery Service™ (EDS) is an all-inclusive search solution — including mobile — that makes in-depth research easy. Unlock the power of your library's collection and improve the end-user experience through sophisticated features and functionality designed to anticipate user intent and to connect researchers to the most relevant scholarly information for their research, every and any time they search.

OpenAthens is an advanced access management system that eliminates the need for multiple logins. Users sign in only one time to access all their library's resources. The administrator interface is easy to use and provides granular statistics on usage to support resource and budget allocation decisions. OpenAthens is based on SAML standards to allow institutions to keep single sign-on logins and user data more secure.

Stacks is a turnkey, responsive web content platform designed specifically for libraries, enabling them to build and manage a responsive and modern library website with ease. Customizable themes, an easy-to-use administrator dashboard, key library and search integrations, rooms and events management and more, allow your library to create the best website experience possible for students and faculty — no matter the device.

Full Text Finder (FTF) is a next-generation knowledge base, holdings management tool, publication finder and link resolver. FTF integrates with *EBSCO Discovery Service™* (EDS) to provide users fast and reliable access to full text and a better library experience.

Privacy, security and accessibility are key considerations in all our product development strategies.

Diversity of Collections

Inclusivity and diversity are key issues for academic libraries. It's important for people and groups to feel represented in the community as well as in the database information and the curated collections.

Ethnic Diversity Source™ is a new, full-text database that covers the culture, traditions, social treatment and lived experiences of many ethnic populations.

LGBTQ+ Source™ provides scholarly and popular LGBTQ+ publications in full text plus historically important primary sources.

Jewish Studies Source™ offers a multidisciplinary view of the study of Jewish civilization, from its historical origins to the present.

Women's Studies International™ is a bibliographic database for women's studies and feminist research covering sociology, history and humanities.

Arab World Research Source™: Al Masdar offers content pertaining to the Arab World for Arabic studies, Middle Eastern studies and Islamic studies.

African American Historical Serials Collection is an archive that documents the history of African American religious life and culture between 1829 and 1922.

E-Book Collections to Help Foster an Inclusive and Diverse Climate

To help libraries support diverse writers, illustrators and publishers, EBSCO offers highly curated e-book and audiobook collections such as Asian American Studies, Antiracist Reading, Islamic Studies and more.

Primary Sources

Primary source documents enhance research with first-person accounts of history.

Archive Databases include primary source documents such as letters, diaries, maps, illustrations, correspondence and personal accounts. They help researchers develop a deeper understanding of historical issues and events, often giving them a sense of what it was like to live in a bygone era.

Archive Databases include:

- [*African American Historical Serials Collection*](#)
- [*Arte Público Hispanic Historical Collection: Series 1 and 2*](#)
- [*Atla Historical Monographs Collection: 11 Series*](#)
- [*Civil War Primary Source Documents*](#)
- [*Gateway to North America: The People, Places and Organizations of 19th Century New York*](#)
- [*Revolutionary War Era Orderly Books*](#)

Magazine Archives give researchers first-hand accounts from journalists covering critical historical events ranging from the moon landing to key presidential elections. Trends, fashions, and cultural signs are all represented in these snapshots of history. In addition, magazine archives save valuable shelf space and make use of one-time funds.

Magazine Archives include:

- | | |
|--|---|
| <i>The Atlantic</i> | <i>Maclean's</i> |
| <i>Architectural Digest</i> | <i>The Nation</i> |
| <i>Art Magazine Collection</i> | <i>National Review</i> |
| <i>Businessweek</i> | <i>The New Republic</i> |
| <i>Ebony</i> | <i>People</i> |
| <i>Esquire</i> | <i>Sports Illustrated</i> |
| <i>Forbes</i> | <i>Time</i> |
| <i>Fortune</i> | <i>U.S. News & World Report</i> |
| <i>Life</i> | <i>Vanity Fair</i> |

Subject-Specific Resources

Offering collections by subject area helps students target their research and hone in on the results they need.

EBSCO eBooks™ Subject Sets save time by offering more than 60 pre-packaged collections of frontlist e-books on high-interest topics chosen by bibliographers to meet the needs of libraries, faculty and researchers.

Popular subject areas include:

- | | |
|--------------------------|--------------------------|
| Arts & Humanities | Social Sciences |
| Business & Finance | Social & Cultural Issues |
| Information & Technology | Science & Technology |
| Medical | Vocational Education |

In addition, **DRM-Free e-books** allow users to download either the full-book or unlimited chapters with no sign-in required, read them in any application and transfer them to any device. More than 280,000 DRM-Free e-books are available in multiple subject areas.

Subject Indexes enable serious researchers to conduct a thorough review of literature with speed and efficiency. EBSCO partners with top organizations across disciplines whose experts in the field curate and classify the most relevant materials for researchers. Try them on *EBSCOhost®* or *EBSCO Discovery Service™* for targeted results with links to related content in your library's collection.

Behavioral Health Resources:

The American Psychological Association (APA) publishes the premier abstracting and indexing database as well as full-text and multimedia resources.

Skill-Building Resources

Resources help students build life skills and improve research techniques and also help enhance staff professional development.

PrepSTEP® for Colleges and Universities and **PrepSTEP® for Community Colleges** are dynamic online learning platforms packed with tutorials, practice tests, articles, e-books and high-stakes test preparation for self-guided skill building, career preparation and workforce readiness.

LearningExpress® Job & Career Accelerator gives job seekers the tools they need to explore careers, find open positions, apply for jobs and get hired. This powerful platform includes a resume and cover letter builder, millions of up-to-date job and internship postings, career guidance, interviewing tips and more.

Library & Information Science Source™ offers journals and periodicals that help librarians and researchers keep pace with the latest trends in a rapidly evolving field.

LearningExpress® Computer Skills contains nearly 100 self-directed video tutorials covering the basics of computers, Windows and Mac operating systems, and searching the internet. The resource also includes beginner-to-advanced tutorials for some of the most commonly used software applications from Microsoft and Adobe.

Flipster® digital magazines are a great way to provide students and faculty with visually appealing content that keeps them up-to-date on the latest trends in hot topic areas such as finance, politics, business and more. Plus, researchers can access digital magazine content in **EBSCOhost®** and **EBSCO Discovery Service™** search results.

Research Output Workflows

Analytics, Archive Management and Research Output
Accelerate the research process by storing, organizing and preserving data, and make access and reuse easier.

Panorama™ is a modern library analytics platform combining different library and campus data sets to enable insights that were not possible until now. The platform features visualization tools and a central dashboard to collect, manipulate and display data about the library and the users it serves.

Code Ocean allows you to create, share, execute and publish computational code and data. This platform, founded on open-science principles, provides tools for researchers to save time and work in one place, and it helps institutions collect and preserve outputs to understand their impact.

protocols.io helps you develop and organize research methods. An open-science based tool, it allows researchers to collaboratively create, manage and share research methods, and it helps institutions collect the research methods, understand their impact and improve their discoverability.

Perpetua is a field-proven, long-term data management solution for preserving, safeguarding and discovering an institution's valuable special collections, archives, research output, and other born-digital content. Built-in automated processes ensure future accessibility, easy search and usability of the data, making libraries' content discoverable and available on any device.

Professional Services

EBSCO Professional Services can become an extended staff of your library.

Use **EBSCO Professional Services** to expand the strength of your products to exceed expectations, fulfill your mission and create the best information seeking experience for end users.

Our Team

We can help with project design, project management and resource implementation for content integration, user experience, and streamlined authentication.

Content Integration

We consult on and will work closely with your staff to implement a variety of content integration strategies based on your library's workflow needs.

Streamlined Authentication

In support of remote and mobile access, EBSCO offers multiple authentication strategies to ensure secure and streamlined access to your library's online solutions.

User Experience

Once we understand your user experience (UX) needs, we can provide custom solutions, build subject-specific portals using the Stacks platform, and host design and user interface consultations to enhance your existing products to meet UX needs.

Let EBSCO help you keep your library running like a well-oiled machine for students, faculty and alumni.
