Teleword

by David Ouellet

David Ouellet produces more than 500 puzzles a year and considers each a labor of love. Each puzzle is built manually, without computer-assisted shortcuts. Each uses every letter in the grid, and all of the words in the clue list are related to the puzzle's theme title. The millions of people who have tried their hand at Teleword over the years find them a true test of their "word power."

Logic Puzzles for Print Editions

Hidato

by Dr. Gyora Benedek

Star Trek's Mr. Spock would have loved "Hidato" because it's based totally on logic—no guesswork is needed. Each Hidato puzzle starts with a grid partially filled with numbers. The goal is to fill the grid with consecutive numbers that connect horizontally, vertically or diagonally. Each puzzle has only one possible solution. The first and last numbers of a puzzle will be in circle markers.

Universal Sudoku

by David Bodycombe

UNIVERSAL SUDOKU is the hottest new worldwide puzzle. It is a puzzle that uses numbers instead of words. It's a grid of 81 squares, divided into nine blocks of nine squares each. Some of the squares contain a digit. The goal is to fill in the empty squares so that the digits 1 through 9 appear just once in every row, column and individual block.

The aficionados of modern-day Sudoku are keen to point out that it is not a mathematical problem. Logic is what's required.

Frequency: 7x weekly

Sudoku X (9x9)

This puzzle is a variation on classic Sudoku where each shaded diagonal must also contain each digit exactly once. The extra constraints provided by the diagonals allow Sudoku X puzzles to have dramatically fewer givens to start. Experienced solvers find this variation fun and refreshing.

Objective: Fill remaining cells with digits 1 through 9 so that each digit occurs exactly once in each row, column, heavily outlined 3x3 block, and each shaded diagonal.

Tips: Start with cells on the diagonals, since they have the most constraints. Avoid guessing; unless you can remember every move you made since the guess, an incorrect guess is hard to undo. You can keep track of possible answers using "pencil marks" (small digits drawn lightly in the corners of a cell) but if you need more than 3 pencil marks in a cell, it is generally not worth it.

Puzzles are available 7x weekly. Daily puzzles scale from easiest on Monday to hardest by Sunday. For tips and tutorials, visit us at http://numberpuzzles.com/SudokuX

Sudoku X Mini (6x6)

This puzzle is a variation on 6x6 Sudoku where each shaded diagonal must also contain each digit exactly once. The extra constraints provided by the diagonals allow Sudoku X Mini puzzles to have dramatically fewer givens to start. Experienced solvers find this variation fun and refreshing.

Objective: Fill remaining cells with digits 1 through 6 so that each digit occurs exactly once in each row, column, heavily outlined 3x2 block, and each shaded diagonal.

Tips: Start with cells on the diagonals, since they have the most constraints. Avoid guessing; unless you can remember every move you made since the guess, an incorrect guess is hard to undo. You can keep track of possible answers using "pencil marks" (small digits drawn lightly in the corners of a cell) but if you need more than 3 pencil marks in a cell, it is generally not worth it.

The cells near the center are particularly powerful. Consider the digit 3 shown in the example to the right. The red lines show how it projects into neighboring 3x2 blocks. As a result, the block above it can contain the digit 3 only in cells A or B, and the block beside it can have its 3 only in cells C or D. (In this case, C.)
