Disclaimer:

These applications are not intended to replace therapy with a speech-language pathologist. Use only under direction of a speech-language pathologist or other qualified therapist. Consonantly Speaking created none of these applications; therefore, any difficulties or complaints with each application should be directed to the developer of that specific application. Consonantly Speaking does not have any bearing on how the application will work and has not used all of the applications on the list. Consonantly Speaking did not receive any compensation for creating this list. Consonantly Speaking does not specifically endorse or recommend any of the following applications over others. This list is intended as a compilation of applications that can be used with or by a speech-language pathologist in speech-language therapy for social skills therapy as well as therapy for people who have autism/aspergers/PDD. Applications are not listed in any specific order other than by category. The prices of the applications are subject to change or sale by the developer at any given time. A reference list of website or application lists that helped make this list possible will be posted on <http://consonantlyspeaking.com> as soon as it is completed.
