| Crayons |  |  |

## What does "per purchase" mean?

This means that customers will only be permitted to purchase up to $\$ 50$ of selected school supplies on one receipt. Any amount over this price threshold will not be eligible. Multiple transactions can be rung up to allow the customer to purchase all of their eligible tax free items.

For example, if a customer has $\$ 100$ of eligible school supplies in their shopping cart, the cashier will be required to ring up two separate $\$ 50$ transactions.

This policy does not apply to clothing and footwear, computers, computer related accessories or computer software items that are eligible.
