

Department of Plastic and Reconstructive Surgery

Opportunity for Support

Supporting The Future Today

Cleveland Clinic Florida's Department of Plastic and Reconstructive Surgery embodies a spirit of collaboration and hope. Our goal is to improve and restore each patient's quality of life.

Cleveland Clinic Florida's Plastic and Reconstructive Surgery Team

Plastic and Reconstructive Surgeons are experts in solving complex problems alongside virtually all other medical specialties.

Our team works in concert with general surgeons and oncologists for breast reconstruction;

dermatologists for cancer reconstruction and scar revisions; and orthopaedists for extremity reconstruction. And because plastic surgery is performed on every part of the body, our specialists must be highly skilled in countless techniques and procedures.

Cleveland Clinic Florida's fully accredited plastic surgery residency program prepares the next generation of surgeons by integrating research and education with direct patient care. As our residency training program grows, so does our need for support.

Residency Training Program

Doctors from around the world choose to train at Cleveland Clinic. We must ensure that these physicians are empowered with the funding required to stay ahead in this rapidly advancing field.

The Plastic and Reconstructive Surgery residency program provides in-depth clinical training with physicians in all fields of medicine. Research opportunities allow residents to search for new interventions and therapies, and most go on to present their findings at national conferences and in peer-reviewed medical journals.

Cleveland Clinic Florida is the only medical center in Palm Beach and Broward counties certified by the Accreditation Council for Graduate Medical Education.

Your support will help strengthen our program so we can continue to attract the brightest young physicians.

Restoring Form and Function

Plastic and Reconstructive Surgeons use innovative techniques that both restore function and enhance patients' self-esteem — giving them the opportunity to lead normal lives.

These medical procedures include:

- > Breast reconstruction
- > Burn surgery
- > Cancer reconstruction
- > Cleft lip and palate surgery
- > Cosmetic surgery
- > Facial reconstruction
- > Hand surgery
- > Microsurgery
- > Repair of congenital differences
- > Wound healing

Together We Can Make A Difference

Your gift will affect more than an organization — it will help transform the future of healthcare. By opening doors for physicians, researchers and students, we open doors to a world of possibilities for our patients.

Cleveland Clinic Plastic and Reconstructive Surgery Innovations

- > First in the world to incorporate laser imaging technology in breast surgery to show circulation in reconstructed tissue
- > Pioneers in innovative surgical and non-invasive cosmetic procedures
- > Microsurgical breast reconstruction using a person's own available tissue

Supporting A Recognized Leader

As part of the Cleveland Clinic Health System, Cleveland Clinic Florida provides outstanding patient care based on the principles of cooperation, compassion and innovation.

Building on — and collaborating with — our well-established department in Cleveland, which performed the nation's first near-total facial transplant, our esteemed team of surgeons in our Weston-based Department of Plastic and Reconstructive Surgery is double board certified, with additional training in microsurgery, hand surgery and aesthetic surgery.

Your generosity will change lives.
