CRPS Facts

- Worldwide there are between 1.5 and 5 million people suffering with CRPS/RSD.
- This is an “invisible illness” that more attention needs to be brought to.
- The majority of physicians do not know how to treat this condition and most patients go undiagnosed for over a year.
- This is one of the most painful conditions out there.
- The majority of time “traditional treatments” do not give patients the relief they need or are seeking.
- This condition is life altering and life changing.
- ***BUT***, there is hope as we have found a treatment regiment that is working!

Giving Patients Hope

- Chronic pain can have a debilitating effect on your life. At Advanced Pathways Hypnosis, we understand, because the owner, Traci Patterson, was diagnosed with CRPS in 2007. She was treated by a top Pain Management doctor in Orange County, but her condition continued to progress. When traditional treatments failed, Traci turned to integrative medicine and finally found remission through hypnosis and a multi-therapeutic approach.
 - Hypnosis/Hypnotherapy
 - Bio-feedback
 - Neuroplasticity Training
 - Cell Memory
 - And More...

Connecting You to the Resources to Regain Your Life...

- Assist in dramatically reducing pain if not eliminating it completely (remission)
- Provide a multi-therapeutic approach to control pain
- Restore ability to live your life
- Assist in controlling stress, anxiety, depression and/or insomnia
- Working with PTSD as it effects many chronic pain patients
- Providing you with the tools to succeed

Proven, Approved and Effective

- Hypnosis has long been recognized as a highly-effective form of pain control. In some cases, hypnotherapy is recommended as one of the most effective tools for overcoming chronic or symptomatic pain. Countless clinical studies have been conducted at well respected institutions such as Stanford University, Harvard, Yale, University of Washington and the Mayo Clinic consistently show the effectiveness of hypnotic pain control.
- JCAHO endorsed hypnosis as a complementary, non-pharmacological management of pain in 2000, American Medical Association endorsed hypnosis in 1958, and NIH has also endorsed it.
- Combining hypnosis with other proven modalities provides chronic pain patients with treatment options to significantly decrease their pain if not eliminate it completely (remission).

Personalized Solutions

- Chronic pain is a very personal experience which requires a personalized solution. At Advanced Pathways, each patient is treated as an individual based upon their personal needs.
- Since hypnosis can be a very personal, it is important to choose a trusted hypnotist. Traci brings trust, integrity, and personal experience as a former CRPS patient that utilized hypnosis to gain control and get into remission. She understands...

Conditions Treated

- *Advanced Pathways Hypnosis* provides compassionate pain management. Traci's progressive view of pain control has created dramatic results in improving the quality of life for people who have often exhausted all other options, respect from medical professionals, and gratitude from clients.
 - CRPS/RSD
 - Neuropathic Pain
 - Fibromyalgia
 - Chronic Migraines
 - Cancer Patients/Cancer Pain
 - PTSD
 - Arachnoiditis
 - And more...
