Camp Tracks

CODING is teaching kids about computer science and programming technology. It's becoming essential for kids to learn coding like math and reading. We have programming camps for all ages including Scratch Visual Programming, JavaScript, Python and Java app development.

DIGITAL ARTS is teaching kids about creative design and digital technology. We have 3D Printing, YouTube Video Production, Entrepreneurship - Web Design, Stop Motion Animation and Graphic Design camps for kids.

GAME DESIGN is teaching kids about game design and technology using fun Minecraft and Roblox. It doesn't matter if your child is a novice or expert at gaming, we have game tech camps for all ages.

ROBOTICS is teaching kids about hardware and software technology. We have robotics for all ages, computer building and our new Cyber Defenders camp.

Every student will storyboard, present their project and must bring a functional laptop. AccelerateKID[®] is not responsible for laptops with viruses/malware and lost usernames/passwords.

How to Register:

Select **REGISTER** on website

Select **PARENT PORTAL**

Select **LOCATION**

Select **SUMMER CAMPS**

“It's great that's why we continue to attend every year.”

-Rhonda Hollaway

“It's a good camp they learn alot of technical stuff and they also learn presentation skills.”

-Jessica Brennecke

“My son loved his camp and was excited to go each day. He would love to come back.”

-Rachel LaPonsey

“We loved the team-oriented and hands-on learning!”

-Kathryn Rundell
