Morningstar Risk
Average

Out of 1203 Large Blend investments. An investment's overall Morningstar Rating, based on its risk-adjusted return, is a weighted average of its applicable 3-, 5-, and 10-year Ratings. See disclosure page for details.

Investment Information

Investment Objective & Strategy

from investment's prospectus
The investment seeks to track the performance of a benchmark index that measures the investment return of large-capitalization stocks.

The fund employs an indexing investment approach designed to track the performance of the Standard & Poor's 500 Index, a widely recognized benchmark of U.S. stock market performance that is dominated by the stocks of large U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

Category Description: Large Blend

Large-blend portfolios are fairly representative of the overall US stock market in size, growth rates and price. Stocks in the top 70% of the capitalization of the US equity market are defined as large cap. The blend style is assigned to portfolios where neither growth nor value characteristics predominate. These portfolios tend to invest across the spectrum of US industries, and owing to their broad exposure, the portfolios' returns are often similar to those of the S&P 500 Index.

Volatility And Risk

Best 3 Month Return	Worst 3 Month Return

Performance as of 12-31-19

The performance data quoted reflects past performance and is calculated according to Morningstar's methodology. For new share classes of an investment, the performance reflected for periods prior to the inception date of such class may have been calculated using the historical returns of the original share class, and in such cases is displayed in italics. The historical returns of the original share class are adjusted to reflect differences in fees when the newer share class has higher fees than the oldest share class but are not adjusted when the newer class has lower fees. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower than the performance data quoted. For the most recent month end performance information, please call 1-800-922-9945, or visit rps.troweprice.com.
