Connecting your Shopify cart to Fulfilio

1. Log into your Shopify account. On the left toolbar, click on apps.

🤹 shopify		Q Search		
Home Home Froducts	27	J	Good evening Here's what's happ	pening with y
Analytics Apps	4		(\$) No sales yet	No orders y
SALES CHANNELS	•		GST will apply to your Shopify invoices as If you're registered for GST, add your Aus before March 1, 2018 to stay exempt from	
			16 orders to fulfil Image: state of the stat	ll apture

2. Next, click on "Manage private apps".

	View details
\sim	
0+ apps that can extend your store's feature	
unctionality, drive sales, and optimize how you run your busine s.	
Store	
Working with a developer on your ship? Manage private apps	
(?) Learn more about apps.	

3. Click on "Create a new private app".

	F
	Create a new private app
	Contact email
I	Ū.

4. Type "Fulfilio" as the private app name and support@fulfilio.com.au as the contact email.

5. Click the dropdown box "Review disabled admin API permissions".

6. Change all the dropdown boxes to "Read and Write".

Your API credentials will be generated when you Save.

7. Check the box "Allow this app to access your storefront data using the Storefront API".

8. Complete this form by clicking "save".

- 9. There's a few things you'll need to copy from this page:
 - 1. The API key
 - 2. The password (click "show")
 - 3. Example URL
 - 4. Shared secret
 - 5. The Storefront API access token

Go back to our onboarding wizard and click continue to enter the above information.
