Dimension Keys

| **Yds** | **Yards Key** — Enters or converts to *Yards*. |
| **Feet** | **Feet Key** — Enters or converts to *Feet* as whole or decimal numbers. Also used with the **Inch** and **/** keys for entering Feet-Inch values (e.g., **6 Feet 9 Inch 1 / 2**). Repeated presses during conversions toggle between Fractional and Decimal Feet. |

Inch	**Inch Key** — Enters or converts to *Inches*. Entry can be whole or decimal numbers. Also used with the **/** key for entering fractional inch values (e.g., **9** **Inch** **1** **/** **2**). Repeated presses during conversions toggle between Fractional and Decimal Inches.
/	**Fraction Bar Key** — Used to enter *Fractions*. Fractions can be entered as proper (1/2, 1/8, 1/16) or improper (3/2, 9/8). If the denominator (bottom) is not entered, the calculator's fractional accuracy setting is automatically used.
m	**Meters Key** — Enters or converts to *Meters*.

BASIC MATH OPERATIONS

Your calculator uses standard chaining logic, which simply means that you enter your first value, the operator ($+$, $-$, $\times$, $\div$), the second value and then the Equals sign ($=$).

A.	3	$+$	2	$=$	5.
B.	3	$-$	2	$=$	1.
C.	3	$\times$	2	$=$	6.
D.	3	$\div$	2	$=$	1.5

This feature also makes the calculator simple to use for dimensional applications.

EXAMPLES

Adding and Subtracting Strings of Dimensions

Add the following measurements:

- 6 Feet 2-1/2 Inches
- 11 Feet 5-1/4 Inches
- 18.25 Inches

Then subtract 2-1/8 Inches:

1 8 • 2 5 Inch =	**19 FEET 2 INCH**
- 2 Inch 1 / 8 =	**18 FEET 11-7/8 INCH**

Multiplying Dimensions

KEYSTROKE	DISPLAY
5 Feet 3 Inch X 1 1 Feet	
6 Inch 1 / 2 =	**60.59375 SQ FEET**

Dividing Dimensions

Divide 15 Feet 3-3/4 Inches into thirds (divide by 3):

KEYSTROKE	DISPLAY
On/C On/C	**0.**
1 5 Feet 3 Inch 3 / 4 ÷ 3 =

Setting Fractional Resolution

Fractional resolution is pemanently set via the Preference Settings (see **Preference Settings** section for instructions). To select other formats temporarily (e.g., 1/64ths, 1/32nds, etc.), see the example below:

Add 44/64th to 1/64th of an inch and then convert the answer to other fractional resolutions:

KEYSTROKE	DISPLAY
On/C On/C	**0.**
4 4 / 6 4	**0-44/64 INCH**
+ 1 / 6 4 =	**0-45/64 INCH**
Conv 1 *(1/16)*	**0-11/16 INCH**
Conv 2 *(1/2)*	**0-1/2 INCH**
Conv 3 *(1/32)*	**0-23/32 INCH**
Conv 4 *(1/4)*	**0-3/4 INCH**
Conv 6 *(1/64)*	**0-45/64 INCH**
Conv 8 *(1/8)*	**0-3/4 INCH**
On/C On/C	**0.**

Note: Changing the Fractional Resolution on a displayed value does not alter your Permanent Fractional Resolution Setting. Pressing On/C will return your calculator to the permanently set fractional resolution.

Default Settings

After a *Clear All* (Conv ✕), your calculator will return to the following settings:

STORED VALUES	DEFAULT VALUE
Stair Riser Height	7-1/2 Inch
Stair Tread Width	10 Inch
On-Center Spacing	16 Inch
Weight per Volume	1.5 Tons/Cu Yd

If you replace your batteries or perform a *Full Reset** (press Off, hold down ✕, and press On/C), your calculator will return to the following settings (in addition to those listed above):

PREFERENCE SETTINGS	DEFAULT VALUE
Fractional Resolution	1/16
Area Display	Standard
Volume Display	Standard
Meter Linear Display	0.000
Decimal Degree Display	0.00°
Fractional Mode	Standard

*Depressing the Reset button located above the Pitch key will also perform a Full Reset.

Auto-Shut Off

Your calculator will shut itself off after about 8-12 minutes of non-use.

Accuracy/Errors

Accuracy/Display Capacity —
You may enter or calculate values up to
19,999,999.99. Each calculation is carried
out internally to twelve digits.

Errors — When an incorrect entry is
made, or the answer is beyond the range
of the calculator, it will display the word
"ERROR." To clear an error condition you
must hit the `On/C` button once. At this point
you must determine what caused the error
and re-key the problem.

Error Codes:

DISPLAY	ERROR TYPE
0FL0	Overflow (too large to display)
DIV Error	Divide by 0
DIM Error	Dimension error
ENT Error	Entry error
None	Attempt to calculate stairs without entering Rise and Run

Auto-Range — If an "overflow" is created
because of an input and calculation with
small units that are out of the standard
range of the display, the answer will be
automatically expressed in the next larger
units (instead of showing "ERROR") —
e.g., 20,000,000 mm is shown as **20,000 M**.
Also applies to Inches, Feet and Yards.

Battery

This model uses one (1) CR2016 battery (included). Should your calculator display become very dim or erratic, replace the battery.

Note: Please use caution when disposing of your old batteries, as they contain hazardous chemicals.

Replacement batteries are available at most discount or electronics stores. You may also call Calculated Industries at 1-775-885-4900.

Replacing the Battery

Turn the calculator over and open user guide door located at the top. Pull battery holder out (top left corner) and turn over. Remove old battery and slide new battery under tabs. Turn holder over (negative side facing you) and insert into calculator.

Reset

If your calculator should ever "lock up," press Reset — a small hole located above the `Pitch` key — to perform a total reset.
