

Lowrance took the lead in marine electronics when it invented the first consumer fishfinder in 1957.

Our legacy as the top brand in marine electronics has been sustained by more than 60 years of innovation, reliability and quality, all driven by a never-ending quest to help anglers find more fish.

From the world's first consumer fishfinder—the
FISH LO-K-TOR—to the world's best fishfinder—HDS LIVE
—Lowrance fishfinders have been used by more anglers
than any other brand in history.

Thank you for taking time to learn more about our products. Lowrance products are easy to use, feature the brightest and clearest displays, and the best fishfinding sonar on the planet.

Whether you fish dams, estuaries or coastal, Lowrance fishfinder/chartplotters will make it easier for you to find more fish, so you can make the most of your time on the water. You will find more fish with Lowrance. That's a fact.

### The world's best fishfinder

HDS LIVE builds on the Lowrance® legacy as the leader in marine electronics with innovative features like built-in support for Active Imaging™, FishReveal™, StructureScan® 3D with Active Imaging and LiveSight™ real-time forward or down sonar – plus LiveCast™ smartphone integration and the best suite of navigation tools ever included in an HDS display.

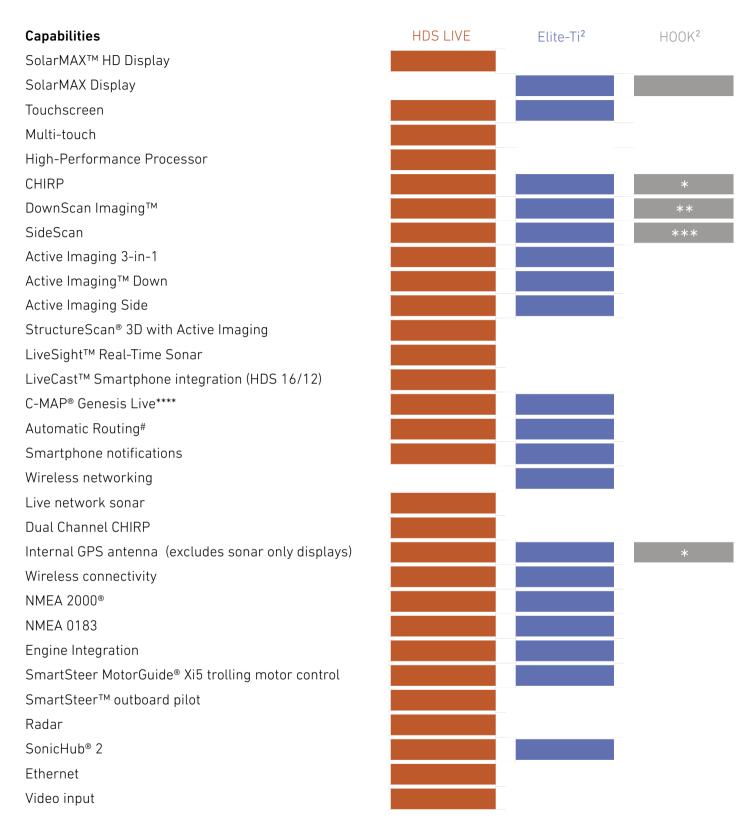

### The world's best value

Lowrance® Elite Ti<sup>2</sup> displays offer popular premium features—like an easy-to-use touchscreen, Active Imaging<sup>™</sup>, FishReveal<sup>™</sup>, wireless networking, built-in Genesis Live real-time map creation, wireless connectivity and smartphone notifications—all at a more affordable price than other fishfinder/ chartplotters in its category.

### The world's easiest fishfinder

Spend more time fishing and less time making adjustments with HOOK<sup>2</sup>, featuring a perfect mix of simplicity and powerful fishfinding sonar, including Autotuning sonar, wide-angle Lowrance High CHIRP coverage, and SideScan and DownScan Imaging™

# A FISHFINDER FOR EVERY ANGLER

# SONAR TECHNOLOGY

For more than six decades, Lowrance has pushed the limits of technology to deliver innovations like the first consumer fishfinder, the first colour fishfinder, the first sonar/GPS combo, the first digital sonar, grayline/colourline and much more.

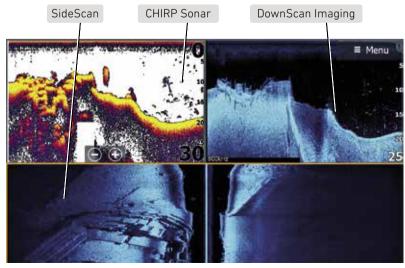

For 2019, Lowrance has released a suite of new sonar technology and navigation tools that takes its fishfinding/chartplotting capability to a new level.

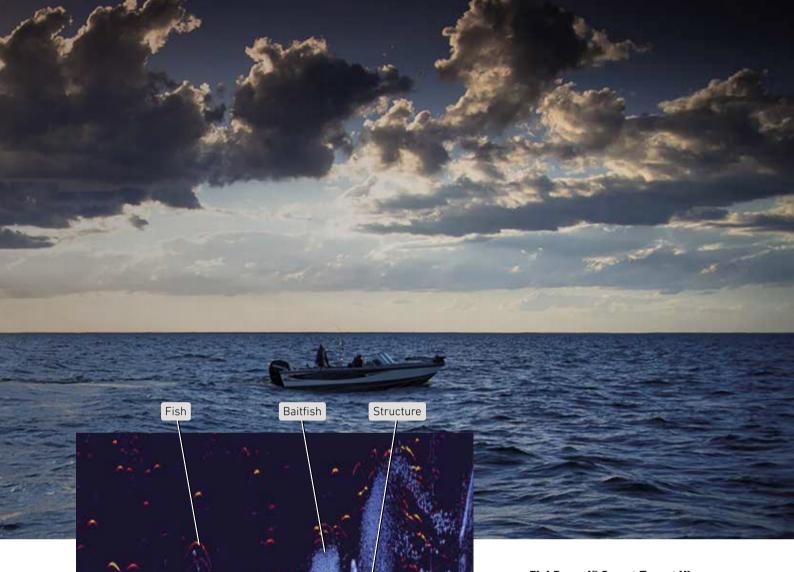

# Active Imaging™ 3-in-1 sonar

SideScan and DownScan Imaging™.

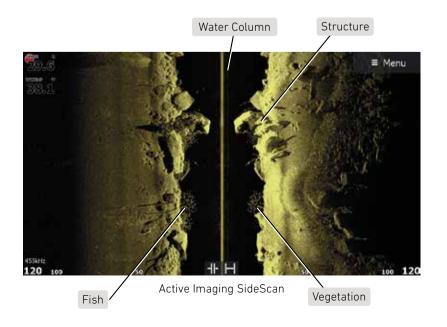

Perfect for pinpointing fish-holding areas like rockpiles, weedbeds, ditches and drop-offs, Active Imaging™ 3-in-1 with Lowrance CHIRP, SideScan and DownScan Imaging™ delivers superior clarity, the best target separation and the highest resolution images of fish and structure at a longer range than any other structure imaging technology.

Active Imaging 3-in-1

Active Imaging DownScan with FishReveal

# FishReveal™ Smart Target View

Get the best of CHIRP sonar and DownScan Imaging<sup>™</sup> on one screen with the exclusive FishReveal™ Smart Target view that helps you easily recognize fish from structure and cover on high-detailed DownScan images. FishReveal makes fish identification easy and removes the need to display CHIRP sonar and DownScan Imaging in a twopanel split-screen display. FishReveal is compatible with HDS LIVE and Elite Ti<sup>2</sup> displays.

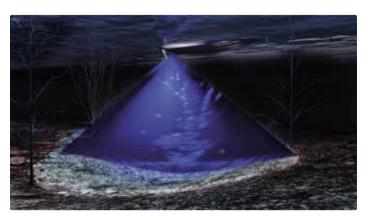

### LiveSight<sup>™</sup>— fishing in real time\*

You've never fished like this before. Sonar interpretation made simple, LiveSight™ sonar turns all fishing into sight fishing, delivering the most detailed views of fish, down to every turn and flip of the tail, as they swim in and around cover. You'll be fishing in real-time as you watch fish react to your lure, see how they are relating to structure and gain insight on what's working, what's not and what to do next.

Perfect for drop shotting and vertical jigging, or tracking bait in front of your boat, LiveSight lets you get a bead on the fish, so you'll know whether they are actively feeding. Mount the transducer in a front-facing position to cast toward the fish, or mount it in a down-facing position to do some vertical jigging below your boat.

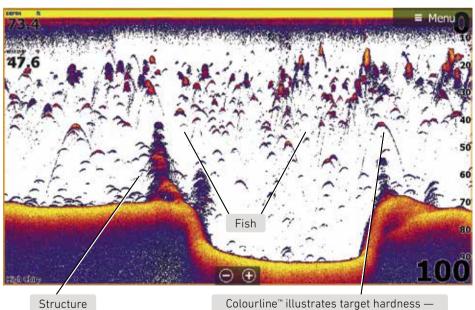

LiveSight Forward

LiveSight Down

<sup>\*</sup>Coming early 2019

the lighter the colour, the harder the target

### CHIRP and Broadband Sonar™

See fish, structure and the bottom with greater clarity—right out of the box—with Lowrance CHIRP and Broadband Sounder sonar featuring exclusive Advanced Signal Processing (ASP™). CHIRP and Broadband feature unparalleled target separation and screen clarity to give anglers the best view of individual fish targets, even when fish targets are close to the bottom or suspended in tight schools.

Stream video from your smartphone to HDS LIVE 16 and 12-inch models with an HDMI cable.

# LiveCast<sup>™</sup>— Smartphone integration

You no longer have to choose between watching the big game and spending a day on the water with LiveCast smartphone integration. Watch video, view Google maps and fishing data on the high-resolution screen of your HDS LIVE display via the HDMI connection on HDS LIVE 16-and 12-inch models. View data from your smartphone and keep your eye on the fish with a LiveCast-sonar split screen.

### **Smartphone notifications**

Keep your eyes on the fish and never miss an important text or call with built-in smartphone notifications. Turn off phone notifications for uninterrupted fishing, or leave them on to receive popup notifications on the screen of your HDS LIVE or Elite Ti<sup>2</sup> display.

A popup will appear on the screen of HDS LIVE and Elite Ti<sup>2</sup> displays when you receive a call or text message.

# BEST FISHFINDING SYSTEM ON THE PLANET

NEW

**ACTIVE IMAGING** 

Whether you are a tournament fisherman, seasoned pro or weekend warrior—any angler that is serious about catching fish in freshwater or saltwater—we have your fishfinder. It's HDS LIVE.

It's no secret that HDS displays have been the choice of fishing pros for years, so we didn't have to go back to the drawing board to create HDS LIVE; we just made the best fishfinder/ chartplotter in the world even better. HDS LIVE features high-detail Active Imaging™ and LiveSight™ real-time sonar, plus new features like LiveCast™ and smartphone notifications, in addition to the best suite of navigation tools ever built into an HDS display.

### **Key features**

- •Sleek, low-profile design
- •SolarMAX™ HD Screen Technology
- Built-in Low, Medium and High CHIRP
- Integrated support for New Active Imaging<sup>™</sup> and StructureScan<sup>®</sup> 3D with Active Imaging
- LiveSight™ real-time sonar compatible\*
- FishReveal<sup>™</sup> Smart Target View
- New C-MAP® Genesis Live mapping
- Preloaded C-MAP AU/NZ Enhanced mapping

- Smartphone notifications
- LiveCast™ smartphone integration (HDS LIVE 16/12 only)
- HALO24 Radar ready
- Broadband Radar<sup>™</sup> compatible
- C-MAP® Easy Routing + Navionics® Autorouting capability\*\*
- Six-panel splitscreen (HDS LIVE 16/12
- Touchscreen control of trolling motor and outboard pilot
- SonicHub®2
- Mercury VesselView Link ready

View all of your structure imaging side-by-side — on the screen at the same time — for the first time.

<sup>\*</sup>Coming soon - early 2019

<sup>\*\*</sup>Subscription may be required

# BEST FISHFINDING VALUE

FishReveal makes it easier to see fish by separating the fish from structure.

### Premium Features at an Affordable Price.

Offering popular premium features at a more affordable price than any display in its category, Elite Ti<sup>2</sup> give anglers a level of powerful fishfinding and navigation functionality usually reserved for more expensive fishfinder/chartplotters.

Add Elite Ti<sup>2</sup> to your rig and enjoy premium features that not only make Elite Ti<sup>2</sup> easy to use, but make it easier for you to have more success on the water—from Active Imaging™, C-MAP Genesis Live onscreen map creation, and preloaded C-MAP AU/NZ Inland mapping to wireless networking and smartphone notifications.

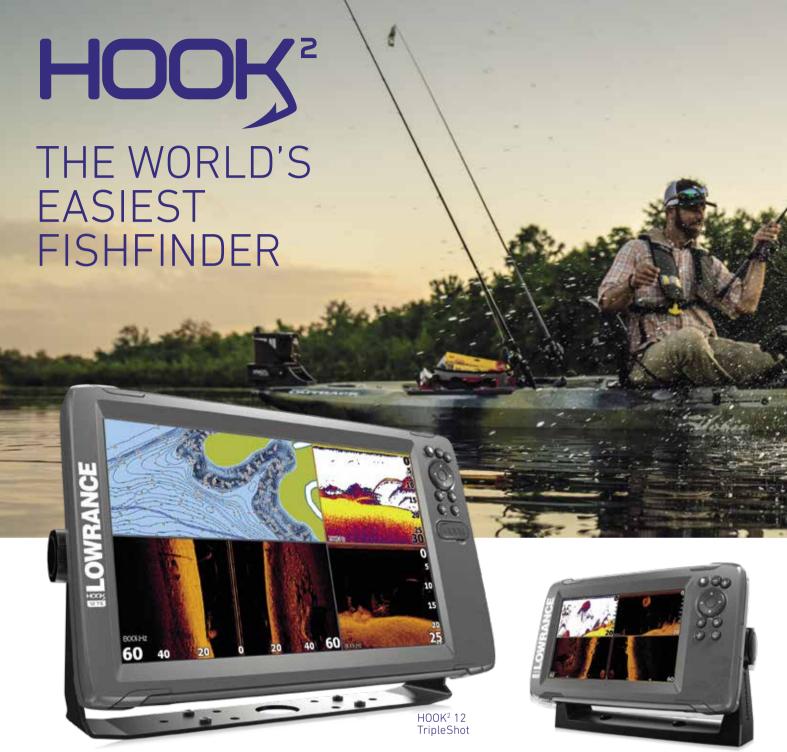

**Key features** 

- Easy-to-use touchscreen
- Active Imaging<sup>™</sup> support
- FishReveal™ Smart Target View
- · Wireless networking
- Smartphone Notifications
- Preloaded C-MAP AU/NZ mapping
- C-MAP® Easy Routing + Navionics®
   Autorouting capability\*
- C-MAP Genesis Live
- Touchscreen control of MotorGuide® Xi5 trolling motors
- Engine integration
- Wireless connectivity
  - \*Subscription may be required

With Active Imaging 3-in-1 sonar, you will drill fewer holes in your boat and get all of your sonar—CHIRP, SideScan and DownScan Imaging™—from a single transducer install.

## You will be free to focus on fishing with HOOK<sup>2</sup>.

HOOK<sup>2</sup> offers a hassle-free fishing experience with an easy menu layout, direct-access keypad and the Lowrance fishfinding performance anglers have counted on for decades.

What makes HOOK<sup>2</sup> different is its core feature, Autotuning sonar, which delivers the best sonar image every time by automatically adjusting sonar settings as fishing conditions change.

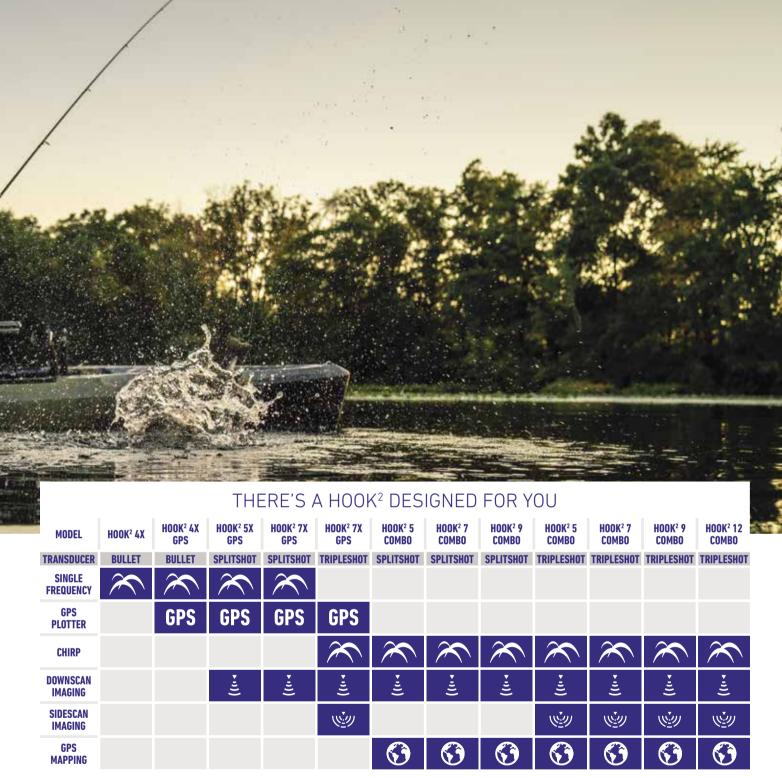

HOOK<sup>2</sup> is ready to fish right out of the box. Just install it on your rig and go.

Its ease of use is rivaled only by its reliability on the water. You will see more fish in the water column and cover more water in less time with HOOK<sup>2</sup>, which offers models with High CHIRP, Broadband sonar, SideScan and DownScan Imaging options.

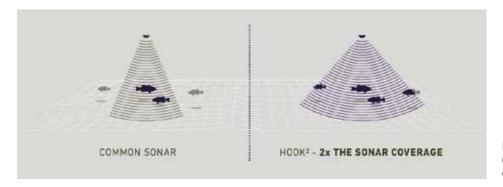

**Key features** 

HOOK<sup>2</sup> 7x TripleShot

- Autotuning sonar
- Wide-angle sonar
- Models offering Broadband Sounder<sup>™</sup>,
   High CHIRP, plus SideScan and
   DownScan Imaging<sup>™</sup>
- Preloaded C-MAP AU/NZ mapping

Select a HOOK<sup>2</sup> for the way you fish from combos featuring TripleShot 3-in-1, SplitShot 2-in-1 and Bullet sonar with chartplotter or basic GPS plotter navigation capability.

HOOK<sup>2</sup> wide-angle sonar delivers double the sonar coverage of other fishfinders.

# **CASTABLES**

FishHunter Pro

The days of having to own a boat to use fishfinding sonar are over. Take FishHunter Pro anywhere you fish—dock, bank, wharf or rocks—and you will always know where to cast.

- No internet or cellular connection required
- Reliable WiFi connection with range up to 160 ft. (55m)
- View sonar returns on your smartphone
- Tri-frequency transducer with 381kHz, 475kHz and 675kHz frequencies
- Create custom colour contour maps
- Requires free FishHunter App (available on iOS and Android)

### FishHunter 3D

You don't have to own a boat to reap the benefits of fishfinding sonar. Whether you fish from a dock, the bank, the wharf or from the rocks, take FishHunter 3D and you will always know where to cast.

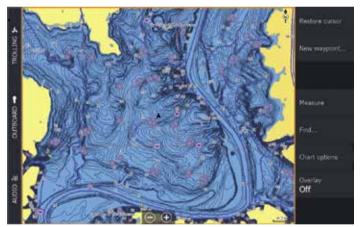

- No internet or cellular connection required
- Reliable WiFi connection with range up to 200 ft. (65m)
- View sonar returns on your smartphone
- Includes 5 tri-frequency transducers with 381kHz, 475kHz and 675kHz frequencies
- 3D fishing, Directional Casting and Ice fishing views
- Create custom colour contour maps and structure maps
- Requires free FishHunter App (available on iOS and Android)

Recent upgrades to C-MAP charts make targeting key fishing areas easier than ever. From the high-detail C-MAP Australia and New Zealand mapping preloaded in Lowrance displays, to C-MAP Genesis Live, you'll find fishholding structure like drop-offs, shoals and points with ease.

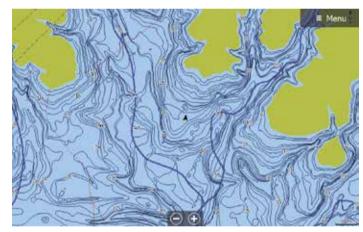

C-MAP AU/NZ

### C-MAP AU/NZ Enhanced Charts for HDS Live

Whether you are fishing at your local estuary, out on the coast or the deep blue, C-MAP Enhanced charts has you covered with complete C-MAP charts and high resolution bathymetric data boaters have relied on for years.

### **Key features**

- Complete C-MAP vector charts for Australia and New Zealand
- Offshore high resolution bathymetric data to help identify peaks, drop-offs and canyons
- Custom Depth Shading to help identify areas of interest

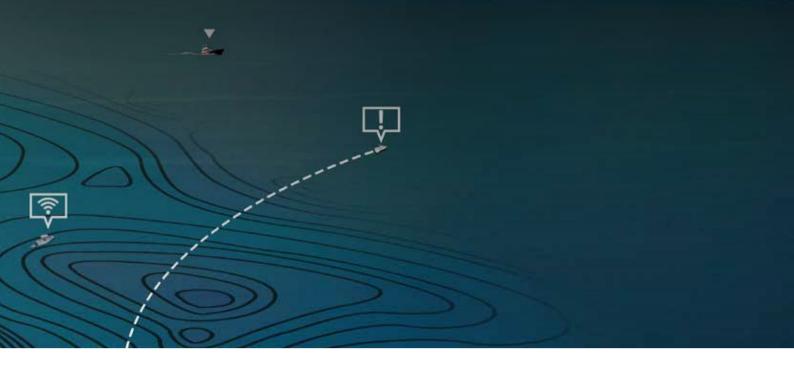

### C-MAP AU/NZ Enhanced Charts for Hook2 and Elite Ti<sup>2</sup>

To help you get out on the water as quickly as possible we've also preloaded charts from C-MAP to help you get on the water quicker.

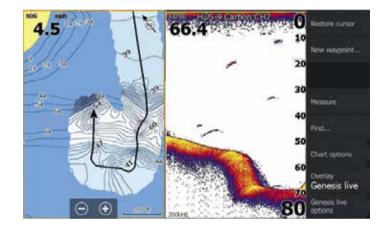

### **Key features**

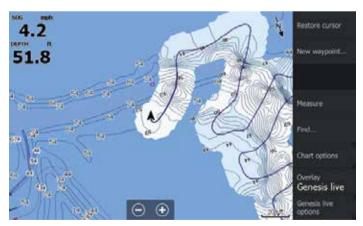

- Complete C-MAP Vector Charts including contours, NavAids, Wrecks and more
- Detailed Marina/Port Plans across Australasia
- Coastal contours and Tides

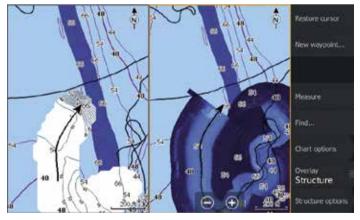

### C-MAP Genesis Live — mapping in real time

Update the mapping of your favourite fishing spot or map uncharted areas with ½ foot contours—in real time—on the screen of your fishfinder/chartplotter with C-MAP Genesis Live. Target key fishing areas with Genesis Live maps, which make it easy to find areas where fish like to hide, like dropoffs, reefs, points and more.

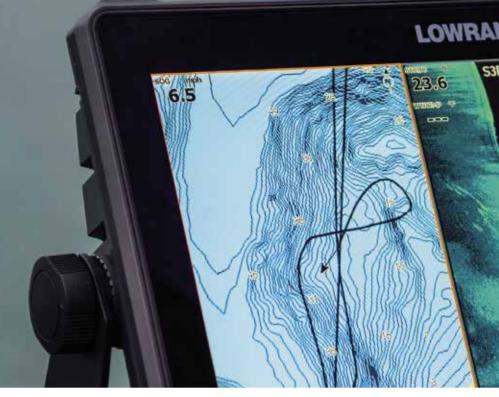

Set up a Genesis Live + StructureMap™ splitscreen and get a sideby-side view of depth contour and StructureMap mapping in real time.

# MAPPING UPGRADES

Lowrance fishfinder/chartplotters are compatible with a multitude of chart upgrade options to suit your mapping preferences including C-MAP, Navionics, CMOR, Trax and more.

### **C-MAP Genesis**

C-MAP Genesis empowers you to create high-definition custom fishing maps with amazing detail and one-foot contours that show key fish-holding areas for greater success on the water. Take advantage of the free online social map created by other users and download your favourite waterbodies. Better maps equal better fishing. Find out more at genesismaps.com

### Benefits of C-MAP Genesis™

- Improve the mapping on your favourite waterbodies by submitting your sonar logs to the Genesis Social Map.
- View and download unlimited Social Maps for free.
- Contour lines spaced as closely as
   1 foot are overlaid upon blue-shaded depth shading
- Custom Depth Shading

### Genesis™ Edge features

- Unlimited viewing and downloads of personal trips
- Bottom Hardness Layer
- Vegetation Layer
- Option to merge maps with Social Map or keep them Private

### C-MAP MAX-N+

C-MAP MAX-N+ coastal charts provide accurate, up-to-date information, unique features and specialized content to enhance every boating adventure.

- High-Res Coastal Contours (HRB) on coastal areas
- Dynamic Tides & Currents
- Satellite Imagery
- Shaded Relief
- High-Resolution Aerial Photos with Harbor and Approach Details for enhanced situational awareness
- Marina Info/Port Services helps traveling boaters enjoy sailing worldwide
- Custom Depth Shading
- Local and Wide coverage areas

### **Navionics®**

Navionics charts offer optional highdefinition layers, including 3D, Satellite Overlay, Panoramic Port Pictures, Dynamic Tides & Current, SonarChart™ Live and much more.

### SonarChart™ Live from Navionics

SonarChart™ Live allows you to create personal 1 ft/.5 m HD Bathymetry maps that display in real time while navigating. The feature can be enabled by connecting wirelessly to sonar from a mobile device that has a Navionics boating app installed, or it can be displayed directly on the screen of compatible Lowrance® displays.

# NAVIGATION

Navigating with Lowrance has never been safer or easier — from new, revolutionary HALO24 Radar and new Link-6S and Link-9 VHF Radios to the Precision-9 compass and SmartSteer™ control of the Lowrance® Outboard Pilot and MotorGuide® Xi5 trolling motors — you will have more control and greater situational awareness than ever.

### **HALO24 Radar**

HALO24 revolutionizes radar by offering an almost real-time view, with industry-first 60 RPM operation at close range for the ultimate in collision avoidance. Identify hazards in an instant with VelocityTrack™ Doppler technology, and enjoy simultaneous short and long-range coverage—up to 48 nautical miles—from one compact 24-inch dome antenna.

- 48 nm range from a compact 24-inch dome
- Advanced pulse compression technology with beam sharpening

- Simultaneous Dual Range operation sees both near and far
- Ultra-fast 60 RPM operation at ranges up to 1.5 nm
- VelocityTrack<sup>™</sup> Doppler technology for collision avoidance
- Easy operation with harbour, offshore, weather, and bird modes
- MARPA target tracking (up to 10 targets, 20 in dual range)
- Ready instantly from standby

# 36

### **Broadband 4G Radar**

- Up to 36nm range
- Instant On<sup>™</sup>: Solid-state technology produces an immediate, accurate on-screen image, without the lengthy warm-up delay of magnetron pulse radars.
- Beam sharpening

## Broadband 3G Radar

- Up to 24mm range
- Instant On<sup>™</sup>: Solid-state technology produces an immediate, accurate on-screen image, without the lengthy

- Advanced Surface Clutter Rejection
- MARPA Target Tracking: Track up to 10 targets. Requires a heading sensor.
- Safe: Extremely Low Emissions. Emits less radiation than a mobile phone so it can be mounted anywhere.

warm-up delay of magnetron pulse radars.

### Link-9

The Link-9 features an integrated GPS receiver, a removable fist mic, NMEA 2000® connectivity, a built-in dual channel AIS receiver with AIS plot functionality, dual watch, tri-watch, all-scan, more intuitive user interface, a larger LCD and a new industrial design.

#### Link-6S

Communicate clearly with this dependable Class D DSC Approved marine VHF radio featuring an integrated GPS antenna, a four-button fist microphone, intuitive rotary and keypad controls and a new front-mountable mechanical design for easy installation.

#### Point-1 GPS

Integrated electronic compass provides 10Hz GPS position updates plus compass heading for chart stabilization and radar overlay, plus accurate vessel heading, even at low speeds.

### Precision-9

The Precision-9 Compass measures motion on nine separate axes to supply the most accurate heading and rate-of-turn information possible for Lowrance autopilot, radar and navigation systems.

### **NAIS 500**

Reduce your risk of collision with this latest generation, fully-integrated, Class-B AIS transponder — essential for navigating today's busy shipping lanes and congested ports.

With Lowrance networking solutions, you can download C-MAP Genesis maps, map purchases and software updates directly to HDS LIVE and Elite Ti<sup>2</sup> displays. Share information across units and even control your HDS LIVE or Elite Ti<sup>2</sup> display from a smartphone/tablet.

### SonicHub®2 Marine Audio Server

The Lowrance® SonicHub2 features integrated Bluetooth®, allowing you to stream music including Pandora® (where available) from a smartphone or tablet. The system supports AM/FM

radio, playback from a USB drive or iPod and features SiriusXM® radio (US only) connectivity—all with full control from your HDS LIVE or Elite Ti<sup>2</sup> display.

### **NMEA 2000**©

Lowrance NMEA 2000 network devices will share and/or display user-selectable data with displays

and instruments installed on a NMEA 2000 network.

#### Ethernet

Lowrance Ethernet Extension Cable allows two or more HDS displays to be networked together. This allows external GPS antenna, transducer or Radar antenna to be shared across the network. Available sizes include 1.82m, 4.55m, 76.58m and 15.15m.

### Link

Available for download on both Android and IOS, the free Link app allows users to control Lowrance® multifunction displays from a smartphone or tablet.

### Flexible Control

Work with charts, sonar, and radar, control your on-board entertainment system, view data from connected engines and instruments, and much more (excludes autopilot control). With Link, you're constantly connected to your boat's key systems from anywhere on board - making it easier to plan trips, fish, sail, handle maintenance, and otherwise make the best of your time on the water.

### **Wireless Backup**

Link gives you the ability to wirelessly back up and restore waypoints, routes, and tracks directly to your mobile device. This makes it easier than ever to protect your valuable boating data against loss or theft, and to keep your backups up-to-date with zero hassle.

### **Display Compatibility**

The Link app is compatible with Simrad NSS evo3, NSS evo2, NSO evo2, NSS7/8/12\*, and GO series displays: Lowrance HDS Carbon, HDS Gen3, HDS Gen2 Touch\*. HDS Gen2\*\*, and Elite Ti fishfinder/chartplotters; and B&G Zeus<sup>3</sup>, Zeus<sup>2</sup>, Zeus Touch\*, and Vulcan sailing chartplotters. Displays without built-in wireless connectivity require an additional WIFI-1 module.

To enable the Link app, a free software update may be required for your display.

- \* Mirroring only no backup functionality.
- \*\* View only no backup or remote control functionality.

### **Device Compatibility**

Link works with the Apple iPhone 5s and later devices running iOS 9 or above, and is designed to work with Android devices running Android 4.4 or above.
