NEVER BUY OR LEASE A USELESS PIECE OF EQUIPMENT AGAIN!

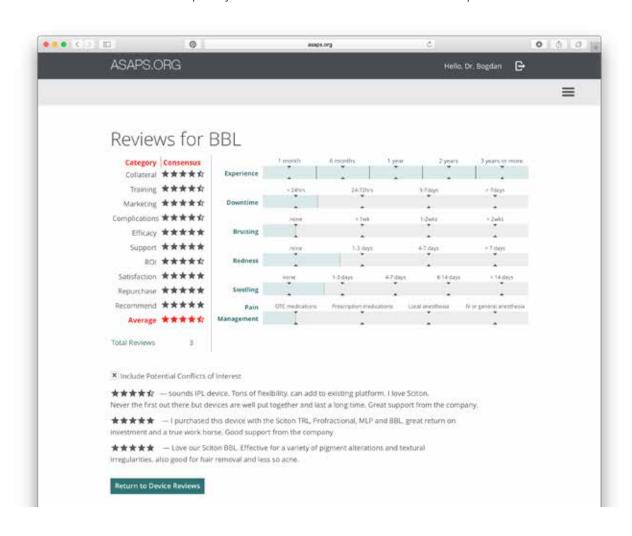

INTRODUCING THE SURGEON AS CONSUMER SOLUTION – THE SITE WHERE YOU WRITE THE REVIEWS--AND USE THEM!

How many of us have been approached to buy or lease the latest 510K device, only to find it later serving as a very expensive coat rack? While the ones that live up to their promise are a big hit with patients and practice—what about the ones that don't live up?

Society members have long asked for help, and here it is! The Surgeon as Consumer Solution (SAC) is a closed site, accessible only through ASAPS.org and only for active ASAPS members. It uses a simple star rating system to rank equipment on everything from clinical efficacy to ROI.

Visit asaps.org now, log-in, click on "Surgeon as Consumer," and you have fellow surgeons' device reviews at your fingertips—and the ability to share your views with others. All completely free— an ASAPS benefit of membership!

NEW! THE AESTHETIC NEURAL NETWORK (ANN)

A COMPLIMENTARY ASAPS MEMBER PRACTICE BENCHMARKING TOOL

Imagine, with Just One Click:

- · Charting Your Practice Growth
- Discovering Areas You Can Improve
- · Benchmarking Yourself Against Your Peers
 - o All of this with NO data entry required

The Aesthetic Neural Network is a new benefit for members that harnesses the power of your own data to let you benchmark your practice among those of your peers in a safe, private, and secure environment.

HOW DOES IT WORK?

A piece of plug and play equipment is delivered to your office that "reads" your data and transfers it to a highly secure cloud environment. Your data is then put through a series of processes that allows for a universal language: for example, liposuction is liposuction, not Dr. Smith's exclusive body contouring program, which lets you compare your practice to those of others in a common nomenclature – and to see how you're doing on many of your critical endpoints.

HOLD ON - WHAT'S A "CLOUD ENVIRONMENT"?

It's a fancy term for hosting your data on the internet instead of on a server. The ANN cloud has the highest level of security possible today (HITRUST). As opposed to "public clouds" – think Amazon or Google – ours is a private cloud only for individual ASAPS members. Its's a level of security you most likely don't have in your office.

WHY SHOULD I GIVE YOU MY DATA?

You aren't obligated to let us use your deidentified data of course, but we can't offer the service without it. The data is aggregated to allow it to be delivered back to you in the form of usable reports or dashboards that will help you pin point practice deficiencies – and practice areas of excellence too. Unlike other systems you can actually measure your performance against others. You won't know whose data it is – it's all deidentified.

OK SO I CAN BENCHMARK MY PERFORMANCE. MY PRACTICE IS VERY SUCCESSFUL NOW, WHY SHOULD I GET INVOLVED IN THIS?

Maybe you shouldn't. ANN isn't a one size fits all solution and maybe you don't need to know how you're doing competitively. But if you're just starting out, or would like to see a higher ROI, or maybe are getting ready to sell or take on a new partner, this is information you literally cannot get anywhere else. And what if you want to know exactly how much of your practice revenue and expense comes from each procedure, which procedures generate the most follow-up business, and whether your revenue profile is changing year to year? ANN can tell you that, and a lot, lot more, for free.

Continued on next page ...

WHO IS DEVELOPING THIS?

C-level developers, security experts and data analysts. The team is led by AnzuMedical, the same group that brought you RADAR.

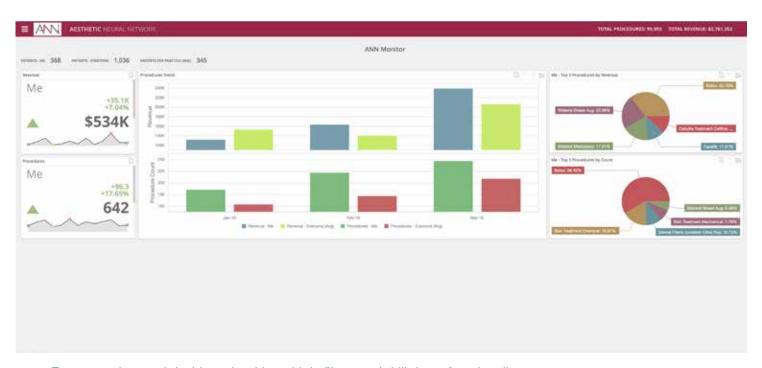

WHY ARE YOU PROVIDING THIS SERVICE – WHAT'S IN IT FOR ASAPS?

As a member organization, we are always looking for high return on your dues investment and helping your practice grow is high on the list for most members.

The aggregated data in ANN can be used for research, advocacy, patient safety issues – the list is only restricted by your imagination.

For more information on the Aesthetic Neural Network, please contact ASAPS at 562.799.2356 or asaps@surgery.org.
