Introduction

This guide was developed in order to provide issuers of Exchange-Traded Funds (“ETF”), Exchange-Traded Notes (“ETN”), and NextShares with an overview of the initial and continued listing program at Nasdaq. Although Nasdaq rules allow for the listing of a variety of Exchange-Traded Products (“ETP”), this particular guide focuses on the requirements specific to ETFs, ETNs and NextShares.

For questions regarding this guide or the requirements regarding other types of ETPs, please contact Nasdaq Listing Qualification Department directly at ETP_Regulation@nasdaq.com.

For additional information, please see our list of [FREQUENTLY ASKED QUESTIONS](#).

Please note that this document is meant only as a reference guide. In the case of any conflict between information found in this guide and the Nasdaq Listing Rules, the Nasdaq Listing Rules will prevail.

Listing Requirements

This section of the guide includes the quantitative listing requirements and certain other necessary representations for the included products.

Passive ETFs

Below are the quantitative listing requirements for ETFs that are issued by an open-end investment management company and track an underlying index (“Passive ETF”). Passive ETFs are subject to the requirements of Nasdaq Rule 5705(b).

Upon application, if Nasdaq determines that an ETF does not meet one of the requirements, the ETF may be denied listing.

UNLESS OTHERWISE NOTED, PASSIVE ETFS MUST MEET THE LISTING STANDARDS BELOW ON BOTH AN INITIAL LISTING AND CONTINUED LISTING BASIS.

If Nasdaq determines that an ETP does not meet one of the requirements once listed, the ETP may be subject to the delisting process. Please see the “Deficiency Process” section of this guide for further details. Nasdaq may also halt trading for certain deficiencies, as described in the “Trading Halts” section of this guide.

The listing rules require that the underlying index fall into one of the following four categories:

1. U.S. Equity
2. Global Equity
3. Fixed Income
4. Multifactor

Nasdaq Listing Center

The Nasdaq Listing Center is the primary portal for the submission of listing applications, certifications and other information to Nasdaq. In order to create and submit form, the user must create an account. This can be done by clicking on “Create new user account” on the home page of the [Listing Center](#).

Initial Listing Application

In order for and ETP to be listed on Nasdaq, a listing application must be submitted by the issuer and approved by Nasdaq.

All applicable entry and application fees are due prior to listing. However, only the \$1,000 application fee is non-refundable if the product does not list on Nasdaq. Note: For issuers of Active ETFs that are seeking approval of a 19b-4 rule proposal prior to listing, the listing application as well as the non-refundable application fee must be submitted before the drafting of the appropriate rule filing may begin.

Disclosure of Material News

ETF issuers make prompt disclosure to the public through any [Regulation FD](#) compliant method (or combination of methods) of disclosure of any material information that would reasonably be expected to affect the value of its securities or influence investors' decisions. ETF Issuers must, prior to the release of the information, provide notice of such disclosure to Nasdaq's MarketWatch Department ("MarketWatch").

Events Requiring Disclosure: In addition to the events included in [Listing Rule IM-5250-1](#), ETF issuers should also notify MarketWatch of material events relating to the listed ETF. These events include, but are not limited to:

1. Liquidation of the trust or ETF
2. Suspension of the creation or redemption process
3. Restatement of the NAV¹⁷

Disclosure Instructions: Issuers should notify Nasdaq of the pending release of material information based on the following schedule:

Release Time	Notification Requirement
7:00 a.m. to 8:00 p.m. ET	At least 10 minutes prior to release
All other times	Prior to 6:50 a.m. ET

Notification must be provided to MarketWatch through the Electronic Disclosure submission system accessible at <https://www.nasdaq.net/ED/IssuerEntry.aspx>. MarketWatch does not accept material news disclosures by fax or phone, except in emergency situations.

MarketWatch reviews material news notifications and, when appropriate, may implement a temporary trading halt to permit the public dissemination of the material news. See the "Trading Halts" section of this guide or our [frequently asked questions](#) for further information.

¹⁷ Restatements of more than 1% from the previous NAV are considered material. See FAQ 1321 for further details.

Trading Halts

Trading halts may be implemented for a variety of reasons. For ETFs, the most common reasons are below.

Material News Disclosure: A trading halt benefits current and potential shareholders by halting all trading in any Nasdaq securities until there has been an opportunity for the information to be disseminated to the public and provides the public with an opportunity to evaluate the information and consider it in making investment decisions. This decreases the possibility of some investors acting on information known only to them and alerts the marketplace to the fact that news has been released.

MarketWatch takes into account the timing of the disclosure by the company, the relative importance of the material news and any other factors that might necessitate a temporary trading halt in its evaluation of the material disclosure. Nasdaq usually reaches out to the issuer before making a halt determination.

MarketWatch generally implements trading halts from 7:00 a.m. – 8:00 p.m. ET. Between 4:00 a.m. and 7:00 a.m. ET, MarketWatch may implement temporary trading halts at the request of a Nasdaq company when related to material news or in conjunction with a regulatory trading halt imposed by a foreign listing market.

Trading is normally resumed in a stock about thirty minutes following dissemination of the material disclosure through a Regulation FD compliant method, although Nasdaq may vary the length of the trading halt in consultation with the company or when Nasdaq is scheduling trading resumptions around the open or close of regular market hours.

ETF Related Issues: Trading may also be halted in an ETF due to the consideration of, among other factors:

1. The extent to which trading has ceased in underlying securities;
2. Whether trading has been halted or suspended in the primary market(s) for any combination of underlying securities accounting for 20% or more of the applicable current index group value;
3. If the Intraday Indicative Value is not being disseminated at the required frequency or has stopped being disseminated;
4. If the NAV is not being disseminated to all market participants at the same time or at all; or
5. The presence of other unusual conditions or circumstances deemed to be detrimental to the maintenance of a fair and orderly market.

Deficiency: Trading may be halted due to an ETF's non-compliance with certain of Nasdaq's listing requirements.

For a complete list of halt reasons and the related codes please see [Nasdaq Trader](#).

Deficiency Process

ETFs that fail to meet the continued listing standards are subject to possible delisting from Nasdaq. Nasdaq will notify issuers in writing that the ETF is deficient and generally provide the ETF issuer 45 calendar days to submit a plan to regain compliance. If the plan is accepted, Nasdaq can issue an extension of up to 180 calendar days from the date of the original deficiency letter. Issuers are required to disclose all notices of deficiency, delisting determination letters and public reprimand letters. See [Listing Rule IM-5810-1](#) for further information.

If an ETF receives a delisting determination, it may appeal the determination. In order to appeal, the ETF issuer must provide notice to Nasdaq within seven days of receipt of the determination letter and pay a fee of \$10,000.

Please see our [frequently asked questions](#) for further information.
