Position of CFS	<ul style="list-style-type: none"> Information on product distribution outside the Macau is not available from the food safety website in Macau. CFS is investigating whether the affected batch has been imported to Hong Kong. Preliminary investigation so far does not identify local sale of the affected product. Acquisition of the products through online purchase or international travel cannot be excluded. Consumers should discard the products and not consume them. CFS will remain vigilant and monitor for any new development and take appropriate actions when necessary. Investigation by CFS is ongoing. <i>Salmonella</i> infection may cause fever and gastrointestinal upset
