THE PENTAGON

The Pentagon was completed in 1943 during an era when craftsmanship and quality of work were important. It is laid out in a common sense fashion and is easy to navigate once you understand the logic of the office door number (floor, ring, corridor and bay; Example: 2D153A). Below you will find the typical floorplan of the Pentagon:

HOW TO FIND A ROOM IN THE PENTAGON

For demonstration purposes, we will use room **2D153A** to provide helpful tools when locating a room in the Pentagon.

2 :

The first number or letter indicates the floor on which the room is located.
B = Basement; M = Mezzanine; 1-5 = Floors

D :

The next letter is the ring on which the room is located. Rings are designated A, B, C, D, and E for the Mezzanine and floors 1-5. The additional rings, F and G, are in the basement only.

1 :

The next digit(s) indicates the corridor on which the room is located. Corridors are designated 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10.

53 :

The last two digits indicate the specific bay or room number assigned to an office.
