

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, April 10, 2020 – 0800 MT  
National Preparedness Level 1**

**National Fire Activity (April 3 – April 9, 2020)**

|                               |                       |
|-------------------------------|-----------------------|
| Initial attack activity:      | Light (623 new fires) |
| New large incidents:          | 10                    |
| Large fires contained:        | 9                     |
| Uncontained large fires:***   | 1                     |
| Area Command teams committed: | 3                     |
| NIMOs committed:              | 1                     |
| Type 1 IMTs committed:        | 2                     |
| Type 2 IMTs committed:        | 1                     |

Nationally, there are 0 large fires being managed under a strategy other than full suppression.

\*\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

This report will post every Friday at 0800 Mountain Time unless significant activity occurs.

Area Command teams (Team 1 Stutler, Team 2 Sexton and Team 3 Jalbert) along with IMT2 (EA Silver Team) have been assigned by the National Multi-Agency Coordinating Group (NMAC) to develop a national COVID-19 wildland fire response plan.

NIMO (Houseman) has been assigned to COVID-19 support at Forest Service headquarters in Washington D.C.

IMT1 (GB Team 2) has been assigned to Intermountain R4 Regional Office COVID-19 Support, providing complexity analysis, risk assessments and short/long-term planning guidance.

IMT1 (NW Team 3) has been assigned to the Spokane Regional Health District, WA, assisting with strategic planning and building capacity.

\*\*\*Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

\*\*\*Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

**Predictive Services Discussion:** High pressure along the West Coast will continue to promote warm and dry conditions along the Pacific Coast through the weekend. Inland, however, a pattern change will occur near and east of the Continental Divide on Saturday afternoon as an unseasonably cold trough of low pressure over Canada strengthens and expands south to encompass most of the country. Late season snow is expected across Montana and Wyoming Saturday and could reach as far south as Nebraska on Sunday.

A cold airmass is expected to be fully in place by the beginning of the workweek. Light to moderate snow will be possible across northeastern New Mexico and the Texas Panhandle on Monday. Moderate to heavy snow is possible across Colorado, Kansas, and southern Nebraska Wednesday night and Thursday. The core of the trough and associated cold air will begin to shift east from the Great Plains to the Mississippi and Ohio River Valleys by Wednesday night. This will allow for a moderation in temperatures to occur across the West to begin. In Alaska, the alternating pattern of weak high pressure ridge events promoting warm and dry conditions and weak frontal systems bringing late season snow will continue through the week.

## Taking A Nap Near The Fireline

*Operational Engagement Category*

Firefighting is often exhausting work and firefighters can find themselves needing to sleep while on the fireline. Before pausing to rest, firefighters must weigh the following considerations:

- Are lookouts posted? Discuss who that lookout can be. Can the lookout on the knob across the draw watch over you, or does it need to be your partner on the fireline alternating rest times?
- Is the area free of hazards (falling snags or rolling materials, etc.)? Discuss what you need to do to create a safe resting area.
- Are you still within agency work and rest guidelines? Review what these guidelines are.
- Does your crew need a break? Have they been pushed too hard? Talk about situations where you need to simply take yourself and/or your crew off the fire for uninterrupted rest.
- To reduce risks:
  - Keep lookouts posted; rotate lookouts.
  - Communicate crew conditions and status to supervisor or chain-of-command contact.
  - Have firefighters discuss ways that they find to rest on the fireline and suggestions for methods to alternate shifts for more effective firefighting.
