| What does "per purchase" mean? |  |  |
| This means that customers will only be permitted to purchase up to $\$ 50$ of selected school supplies on one receipt. Any amount |  |  |
| over this price Limit will not be eligible. Multiple transactions can be rung up to allow the customer to purchase all of their eligible |  |  |
| tax free items. |  |  |
| For example, if a customer has $\$ 100$ of eligible school supplies in their shopping cart, the cashier will be required to ring up two  <br> separate $\$ 50$ transactions.  |  |  |
| This requirement only applies to school supplies, and does not apply to clothing and footwear, computers, computer related  <br> accessories or computer software items that are eligible. Customers may purchase as many of these eligible items in a single <br> transaction as they want.  |  |  |
