# Introduction

Commercial pig farming in India for meat production is one of the best and profitable business ideas for the Indian people. There are several highly meat producing pig breeds available around the globe. Some of those are very suitable for commercial meat production according to the weather and climate of India. A few years back, pig farming had a bad image in the society (only socially backward down-trodden class Indian people used to raise pigs since the time immemorial and they were not respectable people).

But at present the scenario has changed tremendously and commercial pig farming in India is no more restricted to lower class people. Now people are conscious about the economic value of pigs like other domestic livestock animals. And higher caste, educated people also started commercial pig farming business in a modern and scientific manner. China, Russia, America, Brazil and West Germany are the world largest pig producing country. In India Uttar Pradesh is the largest pig producing state.

## Advantages of Pig Farming:

- Pigs grow faster than any other animals. They have higher feed conversion efficiency. That means, they have a great feed to meat converting ratio. They can convert all types of inedible feeds, forages, certain grains byproduct obtained from mills, damaged feeds, meat byproducts, garbage etc. into valuable, nutritious and delicious meat.

- Pigs can eat and consume almost all types of feed including grains, damaged food, forage, fruits, vegetables, garbage, sugarcane etc. Sometimes they even eat grasses and other green plants or roots.
- Pigs become mature earlier than other animals. A sow can be bred for first time at their age of 8-9 months. They can farrow twice a year. And in each farrowing they give birth of 8-12 piglets.

- Pork has high energy due to high fat percentage.
- Initial investment is very low in setup piggery unit.
- High meat percentage are produced by pigs.

## **Market Outlook**

Pigs are one of the oldest forms of livestock, having been domesticated as early as 7000 BC.

Pig farming is very important component in North East India. Out of total pig population in India, 28% are grown in this region.

India's imports of pig meat increased at an average annual rate of 11 percent.

In 2015, the volume jumped 28 percent from the previous year.

India imports about 527 tons a year which is mainly destined for hotels, restaurants and supermarkets. The major exporters to the Indian market are Belgium, Sri Lanka and Spain. The most frequently imported products are pork belly, chops, loin, tenderloin, neck, shoulder, spare ribs, bacon, ham, salami and sausages.

# Global Pork Export Share

Livestock plays an important role in Indian economy. About 20.5 million people depend upon livestock for their livelihood. Livestock contributed 16% to the income of small farm households as against an average of 14% for all rural households. Livestock provides livelihood to two-third of rural community.

It also provides employment to about 8.8 % of the population in India. India has vast livestock resources. Livestock sector contributes 4.11% GDP and 25.6% of total Agriculture GDP.

The total meat production in India is about 60 per cent as against small ruminants (15 per cent), pigs (10 per cent) and poultry (12 per cent).

# Reasons for buying our report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

# Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

# Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on **Pig Farming** ” provides an insight into the **Pig Farming** market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of **Pig Farming** project. The report assesses the market sizing and growth of the Indian **Pig Farming** Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

**We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Pig Farming sector in India along with its business prospects. Through this report we have identified Pig Farming project as a lucrative investment avenue.**
